Aggression And Violence:

Psychobiology of Aggression and Violence Luigi Valzelli, 1981 **Aggression and Violence** David M. Stoff, Robert B. Cairns, 2014-02-04

Conceived at a time when biological research on aggression and violence was drawn into controversy because of sociopolitical questions about its study this volume provides an up to date account of recent biological studies performed mostly on humans A group of scientists recognized the importance of freedom of inquiry and deemed it vital to address the most promising biological research in the field The focus on biological mechanisms is not meant to imply that biological variables are paramount as a determinant of violence Rather biological variables operate in conjunction with other variables contributing to aggression or violence and a complete understanding of this phenomenon requires consideration of all influences bearing on it This book will familiarize readers with the rapidly growing and increasingly significant body of knowledge on the biological bases of human antisocial aggressive and violent behaviors The editors concentrated on biological influences that support the basic physiological and biochemical processes of the brain and did not cover those biological influences that impact on the health of the individual such as head injury pregnancy and birth complications diet and exposure to lead and other toxins They focused on biological influences to illuminate their role in the complex behavioral phenomenon of violence Three different approaches to the biological study of human antisocial aggressive and violent behaviors are represented genetic neurobiological and biosocial Representing each of these three approaches individual chapters from investigators in psychobiology biological psychiatry and basic clinical neurosciences address the most recent experimental findings methods theory and common misconceptions in the biological study of aggression and violence The areas of primary focus are behavior and molecular genetics neurochemistry and hormones neuroimaging psychophysiology and developmental psychobiology Generally speaking investigators following these different approaches have experience in different scientific backgrounds select different methods generate different analyses employ different conceptual definitions for some of the same terms and assume a different philosophical stance in attempting to explain violence Nevertheless all are united in their efforts to understand the biological underpinnings of violence This book then assumes a comprehensive approach wherein different levels of analysis and different approaches inform each other It is clear from the studies reported that aggression and violence are multidetermined phenomena and understanding them requires an interdisciplinary approach spanning economic sociopolitical psychological sociological and criminological as well as biomedical considerations Nature biology and nurture experience context are fundamentally inseparable in explaining aggression and violence biology may affect experience or context but experience or context also influences biology Both need to be studied in a search for explanations of this phenomena

Aggression and Violence in Adolescence Robert F. Marcus, 2007-08-06 Using confidential self report surveys and official crime statistics this book describes variations in aggression and violence during adolescence over time and by grade gender and race Early clues present in childhood to later serious violence in adolescence

are identified in longitudinal research studies Current personality and situational influences that either increase or decrease risk for aggression or violence are reviewed Aggression and violence in adolescent dating relationships is explained in relation to normal development and subject to both variation in partner and relationship differences This book describes and suggests prevention programs directed at all children children at risk and those adolescents that are unfortunately already violent

Accounting for Aggression Gerda Siann, 2024-08-08 The despair and incomprehension that often seem to be the only possible response to acts of aggression and violence have led to attempts by academics and writers from a wide variety of backgrounds to understand and explain such behaviour The concern and anxiety that is felt by many people about this subject is such that some of their accounts notably by Konrad Lorenz Desmond Morris Robert Ardrey and Anthony Storr have become popular and even best selling books Originally published in 1985 *Accounting for Aggression* provides a comprehensive synthesis and assessment of these writings and other contemporary theory and research on aggression and violence at the time The author presents a variety of accounts of aggression drawing on original work in the areas of biology sociobiology ethology psychology and sociology Each account is evaluated according both to the criteria of scientific methodology and to the extent to which it illuminates our understanding and appears to have a lasting explanatory value In the last chapter the author presents an integrative approach to the subject area which synthesizes those findings for which there appears to be substantial empirical support within a framework of the meaning

that aggressive and violent behaviour offers to those who carry it out Accounting for Aggression will be of great value to students and practitioners in the fields of psychology psychiatry social work and education Furthermore it will be welcomed by interested members of the general public who are concerned with issues such as whether or not violence is inherent in human nature the extent to which interpersonal violence is related to group violence and the extent to which violence in the media affects violent behaviour

Aggression and Violence Hue San Kuay, Graham Towl, 2021-06-09 Parent directed aggression and violence by children is a complex issue and may not be explained by focusing upon a single factor The affected parents tend to delay seeking help from professionals due to not knowing where to seek help or even an inability to identify their experiences as a problem This book provides parents and professionals with the much needed information to tackle this incidence In this book Hue San Kuay and Graham Towl draw upon the evidence from past studies and case examples to describe the occurrence of child to parent aggression and violence and highlight the roles by individuals and communities in intervening and preventing aggression and violence The nature versus nurture debate is included and callous unemotional traits are explained as a predictor of aggression The effect of parent directed aggression is discussed and prevention and intervention methods are

presented Delaying help seeking could lead to serious consequences and make it harder to effectively intervene Child to Parent Aggression and Violence is an essential read for practitioners and researchers working with parents and most importantly for parents themselves This book includes suggestions for interventions self assessment on parent directed aggression by children and points of contact as reference to ease the process for both parents and practitioners The authors will donate their royalties in full to Family Lives UK This organisation was registered as a charity in 1999 Previously known as Parentline they provide support for families through a helpline and also offer drop in sessions They give tailored parental support within the community and schools and offer support on issues such as bullying special educational needs and support for specific groups

Youth Aggression and Violence Thomas G. Moeller, 2001-06-01 The rash of school shootings in the late 1990s has generated a tremendous amount of public concern about youth aggression and violence But students trainees and professionals who work with children and adolescents have had no concise or systematic survey of our current knowledge about causes and effective approaches to intervention and prevention on which to draw Youth Aggression and Violence has filled the void Comprehensive and readable it utilizes theory and research from the developmental psychology of normal children and adolescents as well as material on abnormal forms of development such as disruptive behavior disorders and juvenile delinquency situates youthful aggression and violence within the overall framework of children's moral development integrates quantitative research with carefully considered qualitative research and case studies discusses the genetic and biological underpinnings of youthful aggression as well as family and social factors related to antisocial behavior emphasizes cognitive motivational and emotional processes involved in youth aggression and violence provides in depth coverage of juvenile killers and school violence examines female aggression and violence in a variety of contexts and critically examines a number of questions frequently discussed in conjunction with youth violence such as media violence firearm accessibility and the relationship between self esteem and aggression

Neurobiology of Aggression Mark P Mattson, 2003-03-24 Aggression is a highly conserved behavioral adaptation that evolved to help organisms compete for limited resources and thereby ensure their survival However in modern societies where resources such as food shelter etc are not limiting aggression has become a major cultural problem worldwide presumably because of its deep seeded roots in the neuronal circuits and neurochemical pathways of the human brain In Neurobiology of Aggression Understanding and Preventing Violence leading experts in the fields of the neurobiology neurochemistry genetics and behavioral and cultural aspects of aggression and violence provide a comprehensive collection of review articles on one of the most important cross disciplinary issues of our time Rather than summarize the topics covered by each author in each chapter I present a schematic diagram to guide the reader in thinking about different aspects of aggressive and violent behavior from its neurobiological roots to environmental factors that can either promote or prevent aggression to visions of some of the most horrific acts of violence of our times and then towards the development of strategies to reduce aggressive behavior and

prevent violence It is hoped that Neurobiology of Aggression Understanding and Preventing Violence will foster further research aimed at understanding the environmental genetic and neurochemical roots of aggression and how such information can be used to move forward towards the goal of eliminating violence **Aggression and Violence** ,1993

forces has only continued to grow throughout history Thanks to the advance of psychological research within the social and behavioral sciences as well as several other scientific disciplines we have more knowledge than ever before about the genetic developmental interpersonal and cultural causes of aggression Yet these findings have not been integrated into meaningful discussions about how to transform aggression research into practical applications With so many answers to the question What makes a person violent there is surprisingly little insight into How do we prevent violence In this comprehensive book editors Phillip R Shaver and Mario Mikulincer have assembled chapters from international experts to provide a broad based and multidisciplinary analysis of aggression and violence their negative consequences and promising interventions Five sections examine major theoretical perspectives genetic and environmental determinants and the psychological and relational processes underlying human violence and aggression The tone of the book is realistic in its investigation of violence as an inherent part of human genetics and interaction but hopeful in its exploration of research based interventions aimed at reducing violence in future generations In its assessment of aggression and violence across individual relational and societal levels this book will engage a broad audience This book is part of the Herzliya Series on Personality and Social Psychology Phillip R Shaver PhD a social and personality psychologist is Distinguished Professor of Psychology at the University of California Davis Before moving there he served on the faculties of Columbia University New York University University of Denver and State University of New York at Buffalo He has coauthored and co edited numerous books He is a member of the editorial boards of Attachment and Human Development Personal Relationships the Journal of Personality and Social Psychology and Emotion and has served on grant review panels for the National Institutes of Health and the National Science Foundation He has been executive officer of the Society of Experimental Social Psychology and is a fellow of both the American Psychological Association and the Association for Psychological Science Dr Shaver received a Distinguished Career Award from the International Association for Relationship Research and has served as president of that organization Mario Mikulincer PhD is professor of psychology and dean of the New School of Psychology at the Interdisciplinary Center in Herzliya Israel He has published 3 books and over 280 scholarly journal articles and book chapters He is a member of the editorial boards of several scientific journals including the Journal of Personality and Social Psychology Psychological Inquiry and Personality and Social Psychology Review and has served as associate editor of two journals Recently he was elected to serve as chief editor of the Journal of Social and Personal Relationships He is a fellow of the Society for Personality and Social Psychology and the Association for Psychological Sciences He received the EMET Prize in Social science for his contributions to psychology and the Berscheid Hatfield Award for Distinguished Mid Career Achievement from the International Association for Relationship Research

Targets of Violence and Aggression R. Baenninger, 1991-01-15 The chapters in this volume have been written by authors whose research work emphasizes the aggression eliciting characteristics of people and other animals the traits that make them targets of aggressive behavior The clear focus of the

book is on aggression by humans although some of the authors may refer to data from other species Chapters include aggression and violence towards other species sexual minorities psychiatric workers school children athletes women and drivers on highways There are additional targets of aggressive behavior which have not been included because they are not emphasised in the research literature of psychology Since the major concern of psychological science is with the behavior of individuals rather than groups topics such as racial violence warfare and political violence have been specifically excluded

The Development of Aggression and Violence in Adolescence Robert F. Marcus, 2017-05-19 This book highlights the developmental changes in aggression and violence during adolescence from a uniquely psychological perspective Developmental changes and risk factors as direct causes for violence and psychopathy have started to receive increased recognition over the last few years and in this volume Marcus charts these changes against criminological activity A meta theoretical model consisting of developmental personality and situational factors which are common or unique to each form of aggression and violence are offered with research support Empirically supported by rigorous data studies this innovative work goes a long way towards addressing the methods of prevention by which we might lower the frequency and prevalence of aggression and violence Well researched and timely in its findings this book will be of special interest to scholars of violence and crime as well as developmental psychologists
