Aggression The Myth Of The Beast Within:

Aggression John Klama, 1988 *Anger, Madness, and the Daimonic* Stephen A. Diamond, 1996-01-01 Explores the links between anger rage violence evil and creativity and describes a dynamic therapeutic approach that can help channel anger and violent impulses into constructive and creative activity

Killer Instinct Nadine Weidman, 2021-10-19 A historian of science examines key public debates about the fundamental nature of humans to ask why a polarized discourse about nature versus nurture became so entrenched in the popular sciences of animal and human behavior Are humans innately aggressive or innately cooperative In the 1960s bestselling books enthralled American readers with the startling claim that humans possessed an instinct for violence inherited from primate ancestors Critics responded that humans were inherently loving and altruistic The resulting debate fiercely contested and highly public left a lasting impression on the popular science discourse surrounding what it means to be human Killer Instinct traces how Konrad Lorenz Robert Ardrey and their followers drew on the sciences of animal behavior and paleoanthropology to argue that the aggression instinct drove human evolutionary progress Their message spread throughout popular media brought pointed ripostes Led by the anthropologist Ashley Montagu opponents presented a rival vision of human nature equally based in biological evidence that humans possessed inborn drives toward love and cooperation Over the course of the debate however each side accused the other of holding an extremist position that behavior was either determined entirely by genes or shaped solely by environment Nadine Weidman shows that what started as a dispute over the innate tendencies of animals and humans transformed into an opposition between nature and nurture This polarized formulation proved powerful When E O Wilson introduced his sociobiology in 1975 he tried to rise above the oppositional terms of the aggression debate But the controversy over Wilson's work led by critics like the feminist biologist Ruth Hubbard was ultimately absorbed back into the nature versus nurture formulation Killer Instinct explores what happens and what gets lost when polemics dominate discussions of the science of human nature

Evolution's Eye Susan Oyama, 2000-05-03 In recent decades Susan Oyama and her colleagues in the burgeoning field of developmental systems theory have rejected the determinism inherent in the nature nurture debate arguing that behavior cannot be reduced to distinct biological or environmental causes In *Evolution's Eye* Oyama elaborates on her pioneering work on developmental systems by spelling out that work's implications for the fields of evolutionary theory developmental and social psychology feminism and epistemology Her approach profoundly alters our understanding of the biological processes of development and evolution and the interrelationships between them While acknowledging that in an uncertain world it is easy to blame it on the genes Oyama claims that the renewed trend toward genetic determinism colors the way we think about everything from human evolution to sexual orientation and personal responsibility She presents instead a view that focuses on how a wide variety of developmental factors interact in the multileveled developmental systems that give rise to organisms Shifting attention away from genes and the environment as causes for

behavior she convincingly shows the benefits that come from thinking about life processes in terms of developmental systems that produce sustain and change living beings over both developmental and evolutionary time Providing a genuine alternative to genetic and environmental determinism as well as to unsuccessful compromises with which others have tried to replace them Evolution's Eye will fascinate students and scholars who work in the fields of evolution psychology human biology and philosophy of science Feminists and others who seek a more complex view of human nature will find her work especially congenial

Fighting Women Victoria Katherine Burbank, 2024-06-04 Fighting is common among contemporary Aboriginal women in Mangrove Australia Women fight with men and with other women often with the other woman Victoria Burbank's depiction of these women offers a powerful new perspective that can be applied to domestic violence in Western settings Noting that Aboriginal women not only talk without shame about their angry emotions but also express them in acts of aggression and defense Burbank emphasizes the positive social and cultural implications of women's refusal to be victims She explores questions of hierarchy and the expression of emotions as well as women's roles in domestic violence Human aggression can be experienced and expressed in different ways she says and is not necessarily always wrong Fighting Women is relevant to discussions of aggression and gender relations in addition to debates on the victimization of women and children everywhere This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1994

Aggression Seymour Feshbach, Jolanta Zagrodzka, 2013-06-29 In this volume leading international authorities present the results of their original scientific studies of aggressive behavior Written in honor of the eminent Polish psychologist Adam Fraczec for this work in this area the contributed chapters highlight the similarities and differences in the findings provided by investigators working in diverse cultural settings

The Beast Within Jessica Serra, 2024-01-30 How different from animals are we really Are humans the only creatures who love laugh cry possess morals and wage war In *The Beast Within* scientific researcher and ethologist Jessica Serra upends the assumptions that underpin our very human hypothesis that we possess a superior place in the hierarchy of organisms on Earth How did we come to think of our animality as standing in opposition to our humanity and does this reasoning have a scientific basis Through the fascinating discoveries made by ethologists anthropologists and archeologists Serra deciphers our behaviors in light of their animal roots and demystifies ideas about how different animals are from humans She compares human behaviors with those exhibited by other species in chapters spanning topics as varied as sex morality emotions intelligence and family Exploring the evolution of various animal species as well as the evolution of historical ideas about humanity and animality Serra theorizes that human behaviors and motivations may hold more in common with those of animals than we think These explorations of scientific findings encourage us to reconsider how much

we have truly removed ourselves from the beast within Death, Hope and Sex James S. Chisholm,1999-09-02 Fascinating and controversial examination of how evolutionary theory sheds light on human nature using reproductive issues as a focus

Lethal Violence Harold V. Hall,2024-11-01 Lethal Violence A Sourcebook on Fatal Domestic Acquaintance and Stranger Aggression applies the lethal violence sequence analysis to a wide ranging array of fatal aggression resulting in a multitude of observations and principles of violence This sourcebook provides base rate information and cases for each type of fatal interaction then applies the knowledge to violence related situations and settings *Slavic Sins of the Flesh* Ronald D.

LeBlanc,2012-07-03 A pathbreaking gastrocritical approach to the poetics of Dostoevsky Tolstoy and their contemporaries

Stone Age Present William Allman,1995-11-07 Have you ever wandered why men don't ask for directions Why we react with anger to infidelity Why we love music and art Why war and racism still thrive in our most sophisticated cultures In this fascinating synthesis of the disciplines of anthropology psychology linguistics philosophy and biology William Allman shows us how our minds have evolved in response to challenges faced by our prehistoric ancestors and reveals how our brains continue to harbor that legacy in the present day Scientists speculate that many of the problems of modern life from obesity to war arise because our Stone Age mind hasn't caught up with our technologically sophisticated world But Allman also reveals how morality rather than being the result of arbitrary convention is deeply rooted in our need to cooperate which has been essential to the survival of our species through its evolution The Ontogeny of Information Susan Oyama,2000-03-16 In this work the author attempts to complicate certain conventional dichotomies particularly the nature nurture split that she believes impede scientific inquiry and thought about individual development and to untangle the often subtle assumptions embedded

Toward a New Psychology of Gender Mary M. Gergen,Sara N. Davis,2013-11-12 Drawn from a brilliant array of voices primarily from psychology but also from other social sciences and humanities this unique reader of creative and intellectually provocative essays investigates the social construction of gender For the past several decades those involved with the study of the psychology of women and gender have been struggling for recognition within the framework of psychology This volume brings together the writings from psychology philosophy psychoanalysis history women's studies education and sociology that critique mainstream thinking and exemplify new ways of creating inquiry Violence in Three Plays by Eugene O'Neill : The Emperor Jones, Desire Under The Elms and Long Day's Journey Into Night Lamia Ben Youssef Zayzafoon,1992

Growing Young Ashley Montagu,1988-12-30 In this new revised edition of his landmark book Montagu compels us to reevaluate the way we think about growth and development in all its phases throughout life Humans are designed to grow and develop their childlike qualities and not to become the ossified adults prescribed by society Montagu demonstrates how our culture schools and families are in conspiracy against such childlike traits as the need to love to learn to wonder to know to explore to think to experiment to be imaginative creative and curious to sing dance or play He also reveals the many links between physical and mental aging and tells how to prevent psychosclerosis the hardening of the

mind so that we can die young as late as possible The best statement ever written on the most important neglected theme of human life and evolution Stephen Jay Gould Harvard University In this new revised edition of his landmark book Montagu compels us to reevaluate the way we think about growth and development in all its phases throughout life Humans are designed to grow and develop their childlike qualities and not to become the ossified adults prescribed by society Montagu demonstrates how our culture schools and families are in conspiracy against such childlike traits as the need to love to learn to wonder to know to explore to think to experiment to be imaginative creative and curious to sing dance or play He also reveals the many links between physical and mental aging and tells how to prevent psychosclerosis the hardening of the mind so that we can die young as late as possible *Race, Monogamy, and Other Lies They Told You, Second Edition*

Agustín Fuentes, 2022-05-10 A compelling takedown of prevailing myths about human behavior updated and expanded to meet the current moment There are three major myths of human nature humans are divided into biological races humans are naturally aggressive and men and women are wholly different in behavior desires and wiring *Race Monogamy and Other Lies They Told You* counters these pervasive and pernicious myths about human behavior Agustín Fuentes tackles misconceptions about what race aggression and sex really mean for humans and incorporates an accessible understanding of culture genetics and evolution that requires us to dispose of notions of nature or nurture Presenting scientific evidence from diverse fields including anthropology biology and psychology Fuentes devises a myth busting toolkit to dismantle persistent fallacies about the validity of biological races the innateness of aggression and violence and the nature of monogamy sex and gender This revised and expanded edition provides up to date references data and analyses and addresses new topics including the popularity of home DNA testing kits and the lies behind incel culture the resurgence of racist nativist thinking and the internet's influence in promoting bad science and a broader understanding of the diversity of sex and gender *Motivation and Emotion*
