Aggressive Behaviour ,1968 Neurobiopsychosocial Perspectives on Aggression and Violence József Haller,2020-09-10 This book bridges the gap between basic science which deals with general concepts of aggression and its neurobiological foundations and law enforcement as one of the applied fields of aggression research It addresses the current state of research and practice and compares and integrates the concept of aggression with violent crime Chapters examine the types of criminal careers that cross the boundary between the two and summarize the biological psychological and social factors that underlie particular types of criminal careers Subsequent chapters discuss overlaps between biological and psychological factors and detail how and to what extent aggression may serve as explanatory mechanisms for violence The book also discusses the relationship between social problems and neuropsychological deficits addressing how the neuropsychological deficits lead to the intergenerational recycling of social problems Finally the volume explores violence and aggression from a neurobiological perspective Topics featured in this book include The heritability of aggressiveness and violence proneness Glucocorticoids in humans Aggression circuitry in animals Distorted circuitry in violent animals Biological factors of psychological change Neurobiopsychosocial Perspectives on Aggression and Violence is a must have resource for researchers clinicians and other professionals and graduate students in forensic psychology criminology criminal justice public health developmental psychology psychotherapy counseling psychiatry social work educational policy and politics health psychology nursing and behavioral therapy rehabilitation Prevention and Control of Aggression and the Impact on its Victims Manuela Bach,2013-04-17 Proceedings of the XIV World Meeting of the International Society for the Research on Aggression Prevention and Control of Aggression and the Impact on its Victims held in July 9 14 2000 in Valencia Spain Aggression is an

aspect of human society that has interested scientists for many decades and their work has provided important knowledge about its causes and way to prevent and control this behavior. However, not only scientists but many professionals working in the wide spectrum of society from family to international policy are interested in having programs of interventions capable of reducing aggression and violence in our society. This comprehensive book is a compendium of most research approaches that are currently taking place in the field of aggression focusing on the interventions to control and prevent this behavior and the impact on its victims. The chapters of the book include biological approaches to aggression such as neuroanatomy, neurochemistry, neuroendocrinology, genetics, and psychopathology; information about aggression in children and adolescents in different settings such as family, school, and community; characteristics of aggression in specific relationships such as marital and sexual; and specific settings such as bars, prisons, and traffic. It also includes cultural approaches to aggression, social prejudice, war, and programs of peace. Furthermore, a small number of representative chapters about victims are included, ranging from the impact of aggression on behavior and physiology in animal models to victims of war. As this book highlights the interventions to prevent and control aggression, they have to be diverse, highly heterogeneous, in order to deal with all aspects of human beings and society, ranging from pharmacological control in individuals to programs of peace to promote respect among people and among nations. Scientists, academics, and professionals dealing with any facet of aggression and its impact on our society will obtain in this book information about the complexity of this research field and the ways to approach our objective: eliminate aggression from the human behavioral repertoire.

Proceedings of the International Seminar on Delivering Transpersonal Guidance and Counselling Services in School (ISDTGCSS 2022) Diana Septi

Purnama, Mariani Binti Omar, Mohsin Shaikh, Yuli Nurmalasari, Natri Sutanti, Indriyana Rachmawati, 2023-03-23. This is an open access book. Innovation in the guidance and counseling profession is important so that counselors, teachers, or guidance and counseling practitioners can provide optimal services to their counselees. Along with the development of science, creativity, and technology in the fields of psychology, education, and guidance and counseling, various innovations and intervention in the implementation of counseling have been carried out. Especially with the Covid 19 pandemic, which is still on going, various creative interventions in counseling have begun to be widely used. Starting from the use of images for therapy or art therapy, dance movement, and the use of other creative media to support the counselee. The need for creative media and innovation in the implementation of counseling is very important at this time, considering that during the pandemic, the intensity of face to face contact with counselees and counselors is quite limited and most of them use online media. Saturation in the use of online media is also possible to occur a lot, therefore, with the existence of creative interventions that can be guided by a virtual counselor, it will be very interesting for the counselee as well as having a therapeutic impact. Therefore, an international seminar was held with the theme creative counseling intervention. This activity can be followed by guidance and counseling teachers, counselors, or various other mental health practitioners to increase

information and knowledge about creative interventions in counseling In the end participants can provide creative and effective counseling services to their counselees

Hormones and Aggressive Behavior Bruce B. Svare, 2013-03-07 This volume is an overview of research examining the relationship between hormones and aggressive behavior The last 15 years have witnessed a tremendous growth of knowledge in this area yet reviews written by specialists are virtually nonexistent This work is an attempt to provide a comprehensive and cohesive synthesis of this literature Chapters 1-7 provide an analysis of hormonal influences on the major forms of aggressive behavior including intermale interfemale shock induced maternal territorial and predatory aggression The focus of Chapters 8-12 is an examination of the mechanisms through which hormones might act to produce changes in agonistic responding Genetic developmental neural and biochemical influences are considered It is well known that environment social context and experience modulate the effects of hormones on behavior Thus Chapters 13-15 are designed to review the literature concerning hormone pheromone interactions hormonal responses to competition and the influence of social context on the endocrine system and aggressive behavior Frequently the principles advanced by behavioral endocrinologists are based on research in one species the rodent To provide a more comparative perspective and to examine specifically the generality of those principles generated for rodents Chapters 16-22 examine hormone aggression relationships in a variety of species including fish birds amphibians reptiles infrahuman primates humans ungulates and insects This volume should be useful to both beginning and advanced researchers in animal behavior behavioral endocrinology physiological psychology neuroendocrinology zoology physiology and psychiatry
