Shame and the Aging Woman J. Brooks Bouson,2016-08-19 This book brings together the research findings of contemporary

feminist age studies scholars shame theorists and feminist gerontologists in order to unfurl the affective dynamics of gendered ageism In her analysis of what she calls embodied shame J Brooks Bouson describes older women's shame about the visible signs of aging and the health and appearance of their bodies as they undergo the normal processes of bodily aging Examining both fictional and nonfiction works by contemporary North American and British women authors this book offers a sustained analysis of the various ways that ageism devalues and damages the identities of otherwise psychologically healthy women in our graying culture Shame theory as Bouson shows astutely explains why gendered ageism is so deeply entrenched in our culture and why even aging feminists may succumb to this distressing but sometimes hidden cultural affliction The Ages of Life Ulla Kriebner, Roberta Maierhofer, 2014-03-15 The binary construction of young and old which is based on a biogerontological model of aging as decline can be redefined as the ambiguity of aging from a cultural studies perspective This concept enables an analysis of the social functions of images of aging with the aim of providing a basis for interdisciplinary exchange on gerontological research The articles in this publication conceive the relationship between living and aging as a productive antagonism which focuses on the interplay between continuity and change as a marker of life course identity aging and growing older are processes which cannot be reduced to the chronology of years but which are shaped by the individual's interaction with the changing circumstances of life Age Rage and Going Gently Oliver Davis, 2006 This wide ranging study looks at how the ageing process has alternately been figured in and excluded from twentieth century French literature philosophy and psychoanalysis It espouses a critical interdisciplinarity and calls into question the assumptions underlying much research into ageing in the social sciences work in which the negative aspects of growing older are almost invariably suppressed It offers a major reappraisal of Simone de Beauvoir's great but neglected late treatise *La Vieillesse* and presents the first substantial discussion of a lost documentary film about old age in which Beauvoir appears and which she helped to write *PROMENADE AU PAYS DE LA VIEILLESSE* Questioning Beauvoir's own rather reductive reading of Gide's work on old age this study analyses the way in which his *Journal* and *Ainsi soit-il* experiment with a range of representational models for the senescent subject The encounter between psychoanalysis and ageing is framed by a reading of Violette Leduc's autobiographical trilogy in which she suggests that psychoanalysis to its detriment simply cannot allow ageing to signify This claim is tested in a critical survey of recent theoretical and clinical work by psychoanalysts interested in ageing in France the UK and the US Lastly Herv Guibert's recently republished photo novel about his elderly great aunts Suzanne et Louise is examined as a work of intergenerational empathy and is found in addition to be an important statement of his photographic aesthetic Navigating between the extremes of fury age rage and serene acceptance going gently this study aims throughout to examine the role which ageing plays in formal as well as thematic terms in writing the life of the subject *Literature and Ageing* Elizabeth Barry, Margery Vibe Skagen, 2020 New approaches to the topics of old age and becoming old depicted in a range of texts from modern literature The central focus of this book is

the experience of growing old as represented in literature from the mid nineteenth century to the present day an experience shaped by changes in longevity a new science of senescence the availability of state pensions and other phenomena of recent history The collection considers the increasing prominence of stories of ageing challenging the idea that old age is an uneventful time outside of the parameters of literary narrative Instead age increasingly is the story As the older population swells political crises are construed as the old stealing from the young and the rights of older people are sacrificed to the economics of care it becomes ever more important to think about and question as literature does the symbolic aspects of ageing the cultural imaginary that determines the way that society sees old age The work in this volume explores age stories in relation to futurity precarity and climate change It brings to light narratives of resistance to colonial imperialism and reproductive futurism framed in terms of age and tests the lived experience of growing old and the challenge it offers to individualistic conceptions of selfhood work and care The literary works examined hailing from England North America Japan and the Caribbean and including texts by Margaret Drabble Samuel Beckett and Matthew Thomas ask how we feel about ageing so often the determinant of how we think about it

Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the *Handbook of Communication and Aging Research* captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over

65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging **Gerontology** Kenneth Ferraro, Janet Wilmoth, 2006-09-11 Designated a Doody's Core Title THE GROUNDBREAKING TEXT ON GERONTOLOGY UPDATED TO ADDRESS THE INTERDISCIPLINARY NATURE OF THE STUDY OF AGING What is Gerontology How Does Aging Affect the Mind and the Body How Does Social Context Influence Aging and Life Course Development What are the Needs and Interests of an Older Population These questions are sparking the most important research in gerontology and this third edition of the perennial text brings the research and its resulting theories from across the various disciplines into one broad overview of gerontology This interdisciplinary approach is key to developing a strong gerontological imagination a necessary base for the study of gerontology Use this volume to discover the cellular realities of aging alongside the social forces that play a role in developing Alzheimer's Study the effects of nutrition and exercise in older lives and learn how the demographics of aging affect them By combining knowledge from different disciplines Wilmoth and Ferraro have created a comprehensive picture of gerontology today that will enhance any course instruction and provide a new window into the future of the discipline Springer Publishing Serving the Healthcare and Helping Professions for More Than 55 Years **'Rock On': Women, Ageing and Popular Music** Abigail Gardner, 2016-03-16 For female pop stars whose star bodies and star performances are undisputedly the objects of a sexualized external gaze the process of ageing in public poses particular challenges Taking a broadly feminist perspective Rock On women ageing and popular music shifts popular music studies in a new direction Focussing on British American and Latina women performers and ageing the collection investigates the cultural work performed by artists such as Shirley Bassey Petula Clark Madonna Celia Cruz Grace Jones and Courtney Love The study crosses generations of performers and audiences enabling an examination of changing socio historical contexts and an exploration of the relationships at play between performance strategies star persona and the popular music press For instance the strategies employed by Madonna and Grace Jones to engage with the processes and issues related to public ageing are not the same as those employed by Courtney Love or Celia Cruz The essays in this insightful collection reflect on the ways that artists and fans destabilise both the linear trajectories and the compelling weight of expectations regarding ageing by employing different modalities of resistance through persona reinvention nostalgia postmodern intertextuality and even early death as the ultimate denial of age
