Aging Reproduction And The Climacteric:

Aging, Reproduction, and the Climacteric Luigi Mastroianni Jr.,C. Alvin Paulsen,2012-12-06 Interest in sexuality and reproductive function does not cease when people begin to age Instead a new set of questions arises Women want to know if it is safe to have babies in their late thirties and early forties They want to know more about hot flashes and other symptoms of menopause which ones are dangerous and which are merely uncomfortable They are eager to learn about the relative risks and benefits of estrogen replacement therapy Men too are concerned about age related changes in their sexual function Experts in reproductive physiology gerontology and genetics met at the National Institutes of Health in June of 1984 to discuss these and other concerns about aging and the reproductive system The conference on Aging Reproduction and the Climacteric was sponsored by the American Fertility Society The National Institute on Aging and the National Institute of Child Health and Human Development This volume is based on the proceedings of that conference **Aging,**

Reproduction, and the Climacteric Luigi Mastroianni Jr.,C. Alvin Paulsen,2012-03-19 Interest in sexuality and reproductive function does not cease when people begin to age Instead a new set of questions arises Women want to know if it is safe to have babies in their late thirties and early forties They want to know more about hot flashes and other symptoms of menopause which ones are dangerous and which are merely uncomfortable They are eager to learn about the relative risks and benefits of estrogen replacement therapy Men too are concerned about age related changes in their sexual function Experts in reproductive physiology gerontology and genetics met at the National Institutes of Health in June of 1984 to discuss these and other concerns about aging and the reproductive system The conference on Aging Reproduction and the Climacteric was sponsored by the American Fertility Society The National Institute on Aging and the National Institute of Child Health and Human Development This volume is based on the proceedings of that conference Aging, Reproduction,

and the Climacteric Luigi Mastroianni,C. Alvin Paulsen,1986-03-31 Interest in sexuality and reproductive function does not cease when people begin to age Instead a new set of questions arises Women want to know if it is safe to have babies in their late thirties and early forties They want to know more about hot flashes and other symptoms of menopause which ones are dangerous and which are merely uncomfortable They are eager to learn about the relative risks and benefits of estrogen replacement therapy Men too are concerned about age related changes in their sexual function Experts in reproductive physiology gerontology and genetics met at the National Institutes of Health in June of 1984 to discuss these and other concerns about aging and the reproductive system The conference on Aging Reproduction and the Climacteric was sponsored by the American Fertility Society The National Institute on Aging and the National Institute of Child Health and Human Development This volume is based on the proceedings of that conference *Developments in Aging: Appendixes* United States. Congress. Senate. Special Committee on Aging,1985 *Reproductive Ecology and Human Evolution* Peter T. Ellison,2017-09-04 The study of human reproductive ecology represents an important new development in human

evolutionary biology Its focus is on the physiology of human reproduction and evidence of adaptation and hence the action of natural selection in that domain But at the same time the study of human reproductive ecology provides an important perspective on the historical process of human evolution a lens through which we may view the forces that have shaped us as a species In the end all actions of natural selection can be reduced to variation in the reproductive success of individuals Peter Ellison is one of the pioneers in the fast growing area of reproductive ecology He has collected for this volume the research of thirty one of the most active and influential scientists in the field Thanks to recent noninvasive techniques these contributors can present direct empirical data on the effect of a broad array of ecological behavioral and constitutional variables on the reproductive processes of humans as well as wild primates Because biological evolution is cumulative however organisms in the present must be viewed as products of the selective forces of past environments The study of adaptation thus often involves inferences about formative ecological relationships that may no longer exist or not in the same form Making such inferences depends on carefully weighing a broad range of evidence drawn from studies of contemporary ecological variation comparative studies of related taxonomies and paleontological and genetic evidence of evolutionary history The result of this inquiry sheds light not only on the functional aspects of an organism s contemporary biology but also on its evolutionary history and the selective forces that have shaped it through time Encompassing a range of viewpoints controversy along with consensus this far ranging collection offers an indispensable guide for courses in biological anthropology human biology and primatology along with

Menopause Rogerio A. Lobo, Jennifer Kelsey, Robert Marcus, 2000-05-22 Menopause Biology and Pathobiology is a comprehensive volume covering all aspects of the biology anatomy physiology pathobiology and pharmacology of menopause as well as its diagnosis and management The book is divided into four sections Basic Biology Epidemiology Menopausal Systems Pathophysiology and Intervention Basic Biology covers such fundamentals as ovarian anatomy and physiology mechanisms of steroid hormone action chronobiological effects and premature menopause Epidemiology includes among others chapters on methodology challenges in the study of menopause how to distinguish the effects of age from those of menopause and a discussion of the key differences in demographics environmental factors and ethnicity in the menopause experience The Pathophysiology section contains chapters on menopause and its various effects on the body including sexuality skin brain the cardiovascular system cancers and mood The final section includes detailed chapters on intervention and management techniques with topics including alternative therapies to hormone replacement exercise and estrogens and osteoporosis Well referenced to allow easy look up of anything related to menopause Presents the latest thinking on basic science and clinical topics Exposes what the current gaps in our knowledge are Presents current expert opinions

Primate Reproductive Aging S. Atsalis, S. W. Margulis, P. R. Hof, Tamás Fülöp, 2008-06-16 Due to the unusually long post reproductive lifespan characteristic of human females primate reproductive aging receives a great deal of attention Promoting and supporting discussion on comparative analyses of aging

among diverse primate species including humans this publication highlights current research on female primate reproductive aging from both institutional based as well as field studies The contributions highlight the complex interaction between somatic and reproductive senescence The latter is broadly manifested along a cross taxonomic evolutionary continuum with humans at one end of the spectrum exhibiting the lengthiest post reproductive lifespan Primatologists anthropologists evolutionary biologists animal behaviorists endocrinologists neuroscientists and all scholars interested in aging and reproduction will find this book a valuable source of information Considering the increasing number of geriatric primates held in captivity it will also be helpful to animal care professionals as it calls attention to the special care that primates may require in order to monitor maintain and improve their health as they age

The Menopausal Transition C. N. Soares, M. Warren, 2009-03-30 A comprehensive review on psychiatric and gynecologic aspects

Physiological Basis of Aging and Geriatrics Paola S. Timiras, 2007-08-16 Extensively revised and updated to reflect the current state of knowledge in the study of aging this Fourth Edition offers a complete profile of the aging process at all levels from molecules and cells to demography and evolution Written by international experts in current basic and clinical aging research this text includes aspects of individual comparative and differential aging and discussions of theories and mechanisms of aging This invaluable reference illustrates how bodily systems organs and functions are affected with aging describes how genetic and environmental factors influence age related changes and addresses some of the clinical consequences of these changes for health and longevity Well illustrated with numerous tables and graphs this book presents up to date information from internationally renowned experts in various bio medical fields

Anatomy & Physiology Frederic H. Martini, Frederic Martini, 2005

Ethnic Differences in Fertility and Assisted Reproduction Fady I. Sharara, 2013-07-17 Over the past 10 years studies have shown that the rates of fertility vary in different ethnic groups Ethnic differences also play a significant role in the outcome of assisted reproductive technology ART cycles In the United States minority groups African Americans Hispanics mainly Mexicans and Central Americans East Asians Chinese Japanese Koreans Philipinos and South Asians Indians Pakistanis and Bengalis have significantly lower chances of live births compared to Caucasian women Birth outcome data collected by the Society for Assisted Reproductive Technology shows a worsening trend in conception rates between the years 1999 2000 and 2004 2006 raising more concern that the disparity in fertility rates between minority groups and white women is widening over time This comprehensive book serves to answer the questions that arise when managing infertility in a multi ethnic population An expert assembly of key leaders in the field of reproductive medicine imparts insight and clinical experience in order to identify and analyze the possible causes of racial disparities in fertility outcome Some of the reviewed causes include higher Body Mass Index BMI tubal diseases metabolic syndrome and fibroids in African Americans tubal disease and higher early pregnancy loss in Hispanics higher incidence of diminished ovarian reserve and lower BMI in East Asians and higher incidence of polycystic ovarian disease PCOS in South Asians The book also provides a review of data on

access to care and ART services in developing countries A thoughtful combination of evidence based medicine and advanced treatment options this book is sure to distinguish itself as the definitive reference on ethnic differences in assisted reproduction Skin, Mucosa and Menopause Miranda A. Farage,Kenneth W. Miller,Nancy Fugate Woods,Howard I.

Maibach,2014-11-18 An era of global population aging is upon us By 2030 one in eight people will be over age 65 Since women generally live longer than men the health and welfare of postmenopausal women will become a significant public health concern This book offers a comprehensive review of the life changes associated with menopause both at the dermatological and physiological level e g hormonal immunological and at the subcellular level It critically examines the dermatological biological and clinical challenges to postmenopausal health and well being and the current and emerging therapeutic interventions The authors advocate a holistic approach emphasizing the need to view the menopause as a life transition with various facets rather than as a series of distinct medical conditions to be managed Our goal is to offer a comprehensive resource to the researchers clinicians physicians and helping professions whose mission is to promote the health and well being of women around the world **Menopause** Juan Francisco Rodríguez-Landa,Jonathan

Cueto-Escobedo,2017-08-16 Menopause is a natural state of development in women but it is also a period of vulnerability to the development of several disorders such as vasomotor symptoms hot flashes vaginal dryness osteoporosis cognitive deterioration depression and anxiety Factors as diverse as culture diet exercise maternity age and genetics can influence the severity of symptoms that are experienced during menopause and can modify the response to diverse therapies Studying menopause from a multidisciplinary perspective will help elucidate the different factors that affect health during this specific stage of a woman s life This book presents several aspects of menopause including its evolutionary origins novel

nonhormonal therapies and the neurobiology of related disorders **Yen & Jaffe's Reproductive Endocrinology - E-Book**
