B. Chaudhuri,2008 *Future of the Forest* Anand P. Vaidya,2025-04-15

Future of the Forest is the story of legal transformations of forests across India through collective action Since the nineteenth century Indian forest dwellers have been unable to enforce their claims to the land on which they live or the products of it that they use But at the turn of the twenty first century a new national movement led to the passage of the Forest Rights Act a landmark law that recognizes the tenure and use rights of India s millions of landless forest dwellers Anand P Vaidya tracks the Forest Rights Act from the movements that pushed for its passage to its drafting and the many revisions it underwent to satisfy coalitions of local peoples conservationists and a wide spectrum of political parties and movements and finally to its impact on two neighboring villages in central India s forest belt The forests have seen a long history of political authority enacted to the benefit of the powerful *Future of the Forest* follows the work of activists and forest dwellers who turned to the law to shift this balance of power *The Nature State* Wilko Hardenberg,2017-07-14 Following the industrial revolution and post war exponential increase in human population and consumption conservation in myriad forms has been one particularly visible way in which the government and its agencies have tried to control manage or produce nature for reasons other than raw exploitation Using an interdisciplinary approach and including case studies from across the globe this edited collection brings together geographers sociologists anthropologists and historians in order to examine the degree to which socio political regimes facilitate and shape the emergence and development of nature states

patterns social institutions and geographic factors that have sustained Germany's relationship to its land Unlike the American environmental movement which is still dominated by debates about wilderness conservation and the retention of untouched spaces discussions of the German landscape have long recognized human impact as part of the natural order Drawing on a variety of sites as examples including forests waterways the Autobahn and natural history museums the essays demonstrate how environmental debates in Germany have generally centered on the best ways to harmonize human priorities and organic order rather than on attempts to reify wilderness as a place to escape from industrial society Germany's *Nature* is essential reading for students and professionals working in the fields of environmental studies European history and the history of science and technology *Latin American Peasants* Tom Brass, 2004-08-02 The essays in this collection examine agrarian transformation in Latin America and the role in this of peasants with particular reference to Bolivia Peru Chile Brazil and Central America Among the issues covered are the impact of globalization and neo liberal economic policies

Wielding the Ax Thaddeus Sunseri, 2014-08-26 Forests have been at the fault lines of contact between African peasant communities in the Tanzanian coastal hinterland and outsiders for almost two centuries In recent decades a global call for biodiversity preservation has been the main challenge to Tanzanians and their forests Thaddeus Sunseri uses the lens of forest history to explore some of the most profound transformations in Tanzania from the nineteenth century to the present He explores anticolonial rebellions the world wars the depression the Cold War oil shocks and nationalism through their intersections with and impacts on Tanzania's coastal forests and woodlands In *Wielding the Ax* forest history becomes a microcosm of the origins nature and demise of colonial rule in East Africa and of the first fitful decades of independence *Wielding the Ax* is a story of changing constellations of power over forests beginning with African chiefs and forest spirits both known as ax wielders and ending with international conservation experts who wield scientific knowledge as a means to controlling forest access The modern international concern over tropical deforestation cannot be understood without an awareness of the long term history of these forest struggles *Statemaking and Territory in South Asia* Bernardo A. Michael, 2012-12-15 *Statemaking and Territory in South Asia* Lessons from the Anglo Gorkha War 1814-1816 seeks to understand how European colonization transformed the organization of territory in South Asia through an examination of the territorial disputes that underlay the Anglo Gorkha War of 1814-1816 and subsequent efforts of the colonial state to reorder its territories The volume argues that these disputes arose out of older tribute taxation and property relationships that left their territories perpetually intermixed and with ill defined boundaries It also seeks to describe the long drawn out process of territorial reordering undertaken by the British in the nineteenth and twentieth centuries that set the stage for the creation of a clearly defined geographical template for the modern state in South Asia *In Search of the Rain Forest* Candace Slater, 2004-03-22 Collection of essays offers a multi layered understanding of the social complexities of rainforest practice and representation *When Women Held the Dragon's Tongue* Hermann Rebel, 2010 Peasants tell tales one prominent
