Agriculture And Economic Growth:

The role of agriculture in economic development. Focusing on linkages beyond agriculture Veena Soni, 2020-06-19
Academic Paper from the year 2020 in the subject Economics Economic Cycle and Growth language English abstract Those of us who preach the gospel of agriculture with evangelical zeal find the text compelling and convincing We are regularly possessed by the spirit only to look around and see our colleagues in other sectors in country management or even our senior management doubting yawning or subtly edging towards the door We face the implicit query If agriculture can do such great things why have they not yet happened The past decade has been one of agro pessimism The promises that agricultural development seem to hold did not materialise This pessimism seemed to coincide with pessimism about Sub Saharan Africa Especially for Sub Saharan Africa the hope was that economic development would be brought about by agricultural development After the success of the green revolution in Asia the hope was that a similar agricultural miracle would transform African economies But this hope never materialised agricultural productivity did not increase much in SSA and worse the negative effects of the green revolution in Asia became more apparent such as pesticide overuse and subsequent pollution Also in Asia the yield increases tapered off The sceptics put forward several arguments why agriculture is no longer an engine of growth For instance the liberalisation of the 1990s and greater openness to trade has led to a reduction in the economic potential of the rural sector cheap imported Chinese plastic buckets out compete the locally produced pottery On the other hand it does mean cheaper imported supplies With rapid global technical change and increasingly integrated markets prices fall faster than yields rise So rural incomes fall despite increased productivity if they are net producers The integration of rural with urban areas means that healthy young people move out of agriculture head to town leaving behind the old the sick and the dependent It is often also the men who move to urban areas leaving women in charge of the farm This has resulted in the increased sophistication of agricultural markets and value chains which excludes traditional smallholders who are poorly equipped to meet the demanding product specifications and timeliness of delivery required by expanding supermarkets The natural resource base on which agriculture depends is poor and deteriorating *Agriculture and Economic Growth* Yair Mundlak, 2000 Agriculture as a sector Factor growth and allocation Technology Static and dynamic behavior *Agricultural Development and Economic Growth* Herman McDowell Southworth, Bruce F. Johnston, 1967 Composite work on the relationship of rural development to economic growth with particular reference to developing countries covers economic implications of agrarian reform land tenure traditional social structures human resources development marketing trade price policy taxation agricultural policy etc Map references and bibliographies *Agriculture and Economic Development in Europe Since 1870* Pedro Lains, Vicente Pinilla, 2008-09-11 Whilst many books on the European economy have focused on the analysis of its industrial sectors this book draws attention to the often ignored contribution made by the development of European agriculture over the past two centuries In doing so the authors adopt a

revisionist perspective on the subject addressing the lack of coherent study of the agricultural sector and reassessing old theories about the links between agricultural and economic development In focusing on those countries which by 1870 still had a large agricultural sector namely France Germany Italy Denmark The Netherlands Sweden Spain Portugal Poland Hungary Greece and Turkey this book determines the role of the agricultural sector in the economic development of Europe These chapters demonstrate how the rate of development in the agricultural sector depended on specific industrial political and market conditions the diversity of ways and timings through which transformation was achieved is also considered

Agriculture and Economic Growth in an Open Economy--the Case of Argentina Domingo Cavallo,Yair Mundlak,1982 Research report on the role of the agricultural sector in overall economic growth in Argentina from 1940 1971 explains the econometric model used for analysing the functioning of a market economy studies effects of trade liberalization exchange rate policies and domestic taxation public investment and Terms of Trade production functions consumer expenditure etc Bibliography and graphs Agriculture and Economic Growth in Argentina, 1913-84 Yair Mundlak,Domingo Cavallo,Roberto Domenech,1989-01-01 The noted economist Yair Mundlak presents here a theory of the growth of the agricultural sector within the context of a growing economy He explores the various aspects of the dynamics of agriculture and their relationship to the dynamics of the economy at large offering a unique blend of theory methodology and empirical analysis The rate of agricultural growth has varied across countries and over time even though the main innovations in agricultural technology have been made available to all countries Consequently the difference in performance is due to the use made of the available technology Mundlak treats the implementation of technology as an economic decision similar to decisions about resource supply and allocation The development of agriculture like that of other sectors is determined to a large degree by the economic environment especially public policies This framework permits the author to evaluate the effects of policies on growth by examining their effects on sectoral incentives Mundlak shows that neutral macroeconomic policies may have a stronger effect on sectoral growth than sector specific policies The book contains problem sets and will be a reference and text for graduate level courses *Agricultural Development in the World Periphery* Vicente Pinilla,Henry Willebald,2018-02-06 This book brings together analysis on the conditions of agricultural sectors in countries and regions of the world s peripheries from a wide variety of international contributors The contributors to this volume proffer an understanding of the processes of agricultural transformations and their interaction with the overall economies of Africa Asia and Latin America Looking at the nineteenth and twentieth centuries the onset of modern economic growth the book studies the relationship between agriculture and other economic sectors exploring the use of resources land labour capital and the influence of institutional and technological factors in the long run performance of agricultural activities Pinilla and Willebald challenge the notion that agriculture played a negligible role in promoting economic development in the nineteenth and twentieth centuries when the impulse towards industrialization in the developing world was more impactful The

Contribution of Agriculture to Economic Growth Erh-Cheng Hwa,1983-01-01 **Agriculture and Economic Growth in England 1650-1815** Eric Lionel Jones,2024 Originally published in 1967 this was the first book to discuss why agricultural supply became more responsive and to provide broadly based evidence of the ways in which that responsiveness may have influenced the growth of the economy The editor chose 7 essays reprinted in full to illustrate altered perspectives of agricultural change His substantial introduction places the beginnings of a significant rise in farm output as far back as the mid seventeenth century and concludes that agriculture played a vital but complicated role in the economy of eighteenth century England **Agriculture and economic growth** ,1970 *Agriculture and Economic Growth* Yair Mundlak,Yigal Danin,Zvi Tropp,1974 The Role of Agricultural Taxation and Anti-agriculture Bias in Economic Growth Alexander Sarris,Food and Agriculture Organization of the United Nations,2001 The study reviews the role of agricultural terms of trade in development and growth whether or not at early stages of development agriculture should be taxed and if policies should contain an anti agriculture bias It then reviews the ways in which anti agriculture bias expresses itself in various countries Publisher s description The Balance Between Industry and Agriculture in Economic Development Vadiraj R. Panchamukhi,Jeffrey G. Williamson,1989-02-06 This volume of papers from the Eighth World Congress deals with changes in proportions and growth rates of sectors of the economy in relation to economic development It includes a survey of theories of sectoral balance and studies of structural transformation in the Kuznets traditon *The Role of Agriculture in Economic Development* ,1966 **Agriculture and Economic Growth in England, 1650-1815** Eric Lionel Jones,1967 *Economic growth, convergence and agricultural economics* Will Martin,2019-11-26 After nearly two centuries of lagging behind the industrial countries growth in many developing countries has surged since the early 1990s This outperformance has major implications for almost all areas of agricultural economics and if continued will likely do so into the future This paper aims to identify the key ways in which the changes in rich and poor country growth rates matter for agricultural economists as a basis for formulating better research agendas A key impact arises through sharp increases in demand for agricultural resources as demand for livestock products increases This changing structure of food demand has important implications for nutrition studies and policies with the emergence of a double burden of malnutrition On the supply side growth in developing countries tends to increase domestic food supply which is also boosted by increases in research and development spending Growth in developing countries both stimulates and benefits from increases in infrastructure investment evaluation of which requires new analytical tools discussed at this conference Negative impacts include the contribution of increased demand for livestock products to global greenhouse gas emissions In terms of trade policy developing country growth is tending to lead to convergence of agricultural policies with the pattern of assistance seen in today s developed countries raising concerns about the future need to deal with collective action problems particularly those that increase the volatility of world prices
