*The role of livestock in food security, poverty reduction and wealth creation in West Africa* Food and Agriculture Organization of the United Nations , 2020-07-01 With the objective of gaining a better insight into the challenges and opportunities of the livestock sub sector in West Africa FAO has conducted several studies and held various workshops in recent years The outcomes of these studies and workshops conducted between 2009 and 2014 were published and distributed as hard copy reports and disseminated as on line publications These reports included topics such as value chains cross border transhumance animal feed resources priority animal diseases among others were informative in their

own right Still the fact that they targeted specific areas of livestock in a fragmented manner did not address the need of readers whose wish was to have a comprehensive understanding of the livestock sector in West Africa It is in response to this demand for a comprehensive outlook of the West African Livestock sub sector that different reports and studies have been compiled into this one book The book has twelve chapters covering almost all aspects of livestock in the region Attempts were made to enrich the information provided by including eight short case studies focusing on different aspects of the livestock sub sector in West Africa The book attempts to fill the gap of a need for comprehensive information on the potential performance challenges and prospects of the livestock sub sector in West Africa

*Economics of Land Degradation and Improvement - A Global Assessment for Sustainable Development* Ephraim Nkonya, Alisher Mirzabaev, Joachim von Braun, 2015-11-11 This volume deals with land degradation which is occurring in almost all terrestrial biomes and agro ecologies in both low and high income countries and is stretching to about 30% of the total global land area About three billion people reside in these degraded lands However the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources The annual global cost of land degradation due to land use and cover change LUCC and lower cropland and rangeland productivity is estimated to be about 300 billion USD Sub Saharan Africa SSA accounts for the largest share 22% of the total global cost of land degradation Only about 38% of the cost of land degradation due to LUCC which accounts for 78% of the US 300 billion loss is borne by land users and the remaining share 62% is borne by consumers of ecosystem services off the farm The results in this volume indicate that reversing land degradation trends makes both economic sense and has multiple social and environmental benefits On average one US dollar investment into restoration of degraded land returns five US dollars The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands including through such institutional and policy measures as strengthening community participation for sustainable land management enhancing government effectiveness and rule of law improving access to markets and rural services and securing land tenure The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified In this regard the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss

*Two Essays on Socio-economic Aspects of Soil Degradation* Food and Agriculture Organization of the United Nations, Leslie Lipper, Daniel Edward Osgood, 2001-01-01 Contents Dirt poor poverty farmers and soil resource investment by Leslie Lipper Methodological issues in analysing the linkages between socio economic and environmental systems by Dan Osgood and Leslie Lipper Includes 1 page abstracts in French Spanish and Arabic
