The Haiti Exception Alessandra Benedicty-Kokken, Kaiama L. Glover, Mark Schuller, Jhon Picard Byron, 2016 This collection of essays considers the ways and extent of Haiti s exceptionalisation its perception in multiple arenas as definitively unique with respect not only to the countries of the North Atlantic but also to the rest of the Americas Painted at once as repulsive and attractive abject and resilient singular and exemplary Haiti has long been framed discursively by an extraordinary epistemological ambivalence The nation has served at once as cautionary tale model for humanitarian aid and development projects and point of origin for general theorizing of the so called Third World What to make of this dialectic of exemplarity and alterity How to pull apart this multivalent narrative so as to examine its constituent parts The contributors to *The Haiti Exception* take up these and other such questions from a variety of methodological and disciplinary perspectives among which Africana Studies anthrohistory art history Black Studies Caribbean Studies education ethnology Jewish Studies literary studies performance studies and urban studies As they revise and interrogate their respective praxes they accept the challenge of thinking about the particular stakes of and motivations for their own commitment to Haiti Engaging in the

decidedly risky anthropological practice of reflexivity the scholars activists and other social actors gathered here consider their own often fraught role in constructing Haiti in and as narrative

Unsafe Motherhood Nicole S. Berry,2010-10-01 S heds light not only on the obstacles to making motherhood safer but to improving the health of poor populations in general Social Anthropology Since 1987 when the global community first recognized the high frequency of women in developing countries dying from pregnancy related causes little progress has been made to combat this problem This study follows the global policies that have been implemented in Solol Guatemala in order to decrease high rates of maternal mortality among indigenous Mayan women The author examines the diverse meanings and understandings of motherhood pregnancy birth and birth related death among the biomedical personnel village women their families and midwives These incongruous perspectives in conjunction with the implementation of such policies threaten to disenfranchise clients from their own cultural understandings of self The author investigates how these policies need to meld with the everyday lives of these women and how the failure to do so will lead to a failure to decrease maternal deaths globally From the Introduction An unspoken effect of reducing maternal mortality to a medical problem is that life and death become the only outcomes by which pregnancy and birth are understood The specter of death looms large and limits our full exploration of either our attempts to curb maternal mortality or the phenomenon itself Certainly women s survival during childbirth is the ultimate measure of success of our efforts Yet using pregnancy outcomes and biomedical attendance at birth as the primary feedback on global efforts to make pregnancy safer is misguided
