**AIDS** Elizabeth Fee, Daniel M. Fox, 2023-09-01 When AIDS was first recognized in 1981 most experts believed that it was a plague a virulent unexpected disease They thought AIDS as a plague would resemble the great epidemics of the past it would be devastating but would soon subside perhaps never to return By the middle 1980s however it became increasingly clear that AIDS was a chronic infection not a classic plague In this follow up to *AIDS The Burdens of History* editors Elizabeth Fee and Daniel M Fox present essays that describe how AIDS has come to be regarded as a chronic disease Representing diverse fields and professions the twenty three contributors to this work use historical methods to analyze politics and public policy human rights issues and the changing populations with HIV infection They examine the federal government's testing of drugs for cancer and HIV and show how the policy makers choice of a specific historical model chronic disease versus plague affected their decisions A powerful photo essay reveals the strengths of women from various backgrounds and lifestyles who are coping with HIV A sensitive account of the complex relationships of the gay community to AIDS is included Finally several contributors provide a sampling of international perspectives on the impact of AIDS in other nations When AIDS was first recognized in 1981 most experts believed that it was a plague a virulent unexpected disease They thought AIDS as a plague would resemble the great epidemics of the past it would be devastating but would soon subside perhaps neve

of particular films from the archive looking at the portrayal of people living with HIV AIDS the narrative of HIV as a chronic illness and the contemporary context of particular films The third section looks at how stigma and trauma are negotiated in the material in the Face of AIDS film archive discussing ideas about suffering and culpability The final section contributes perspectives on and by the filmmaker as activist and auteur This interdisciplinary collection is placed at the intersection of medical humanities sexuality studies and film and media studies continuing a tradition of studies on the cultural and social understandings of HIV AIDS

**Patient Zero and the Making of the AIDS Epidemic** Richard A. McKay, 2017-11-22 Now an award winning documentary feature film The search for a patient zero popularly understood to be the first person infected in an epidemic has been key to media coverage of major infectious disease outbreaks for more than three decades Yet the term itself did not exist before the emergence of the HIV AIDS epidemic in the 1980s How did this idea so swiftly come to exert such a strong grip on the scientific media and popular consciousness In Patient Zero Richard A McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries old ideas and fears about contagion and social disorder McKay presents a carefully documented and sensitively written account of the life of Ga tan Dugas a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV AIDS epidemic developed and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS and how many individuals grappled with the notion of patient zero adopting challenging and redirecting its powerful meanings as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic With important insights for our interconnected age

Patient Zero untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats What McKay gives us here is myth smashing revisionist history at its best
