Aids Epidemic:

Thirty Years of the HIV/AIDS Epidemic in Argentina Fernando Lavadenz, Carla Pantanali, Eliana Zeballos, 2015-08-06 The 1992 creation of the National HIV AIDS Program was a fundamental step for Argentina to reach the second lowest burden of HIV AIDS in South America From 2000 to 2010 Argentina further reduced the already low HIV AIDS incidence of 15.9 per 100 000 by 25 percent and reduced the burden by 21 percent This study analyzes the national and inter provincial burden of disease the demographics of new HIV cases the demand and supply sides of service delivery and conducts a cost benefit analysis of the National HIV AIDS Program over the last decade Though the National HIV AIDS Program was an instrumental step towards these achievements this book also examines other key programmatic innovations that have been essential to the country's success in the fight against HIV AIDS including the introduction of universal free antiretroviral treatment a comprehensive legal framework for sexual and reproductive rights the introduction of incentives and results based financing in the HIV AIDS program electronic monitoring of supplies and medicines and implementation of an electronic clinical governance system for improving the quality of care and patient follow up among others Despite high costs of the Program this study found the Argentine National HIV AIDS Program is cost beneficial From 2000 to 2010 4 379 potential lives were saved Nonetheless the fight against this epidemic poses continuous challenges including a stubbornly high number of new infections among young men who have sex with men inequalities in HIV AIDS rates between provinces insufficient coverage of HIV diagnostic testing insufficient HIV testing of tuberculosis patients low expenditure on HIV prevention high comparative cost of antiretroviral treatment and questions regarding the long term financial sustainability of the AIDS program considering the increasing number of patients in treatment **Thirty Years of the HIV AIDS Epidemic in Argentina** An Assessment of the National Health Response delves into the combination of factors that make Argentina a success story in combating HIV AIDS **2008 Report on the Global AIDS Epidemic** Joint United Nations Programme on HIV/AIDS., 2008 Knowing your epidemic is essential for everyone involved in the response to HIV Extensively illustrated with graphs and charts this biennial report presents concise but comprehensive summaries of major issues in the global AIDS response Annexes provide HIV estimates and data 2001 and 2007 and also country progress indicators **AIDS Epidemic Update** UNAIDS, World Health Organization, 2010-03-24 The annual AIDS epidemic update reports on the latest developments in the global AIDS epidemic With maps and regional summaries the 2009 edition provides the most recent estimates of the epidemic's scope and human toll and explores new trends in the epidemic's evolution **AIDS Epidemic Update, December 2006** Joint United Nations Programme on HIV/AIDS., World Health Organization, 2006 This annual update reports on developments in the global HIV AIDS epidemic and draws on the most recent data available to give global and regional estimates of its scope and human toll Despite promising developments in global efforts to address the AIDS epidemic including increased access to effective treatment and prevention programmes the number of people living with HIV
