Evaluating Alternative Cancer Therapies David J.

Hess, 1999 At least half a million American cancer patients are using complementary and alternative medicine therapies such as dietary programmes supplements imagery and herbs but little has been done to evaluate these therapies or to provide information about them to the public As North American cancer rates in recent decades have risen so that a person's lifetime risk is now over one in three the questions that patients and clinicians have about alternative treatments have continued to grow How can patients and clinicians make sense of the various options

Germ of Lies David Rasnick, 2008-09-03 When her best friend commits suicide on discovering she was HIV positive Core Fletcher an attractive journalist decides to investigate the validity of the publicly accepted theory of the cause of AIDS Using her skills in reporting and scientific research she begins her investigation in the institutions of healthcare government and the media to which the public has delegated all handling of the problem Uncovering a tangle of fears taboos myths greed lust for power and privilege according to caste she discovers that virtually everything the public has been told about AIDS is false and is known to be false at the highest levels of Government including the Department of Health and Human Services National Institutes of Health and Centers for Disease Control HIV is not in fact the cause of AIDS and some scientists despite severe obstacles are exposing the biggest scientific medical blunder of all time
