Object Stories Steve Brown, Anne Clarke, Ursula Frederick, 2016-06-16 Archaeologists are synonymous with artifacts With artifacts we construct stories concerning past lives and livelihoods yet we rarely write of deeply personal encounters or of the way the lives of objects and our lives become enmeshed In this volume 23 archaeologists each tell an intimate story of their experience and entanglement with an evocative artifact Artifacts range from a New Britain obsidian tool to an abandoned Viking toy boat the marble finger of a classical Greek statue and ordinary pottery fragments from Roman England and Polynesia Other tales cover contemporary objects including a toothpick bell door and the blueprint for a 1970s motorcar These creative stories are self consciously personal they derive from real world encounter viewed through the peculiarities and material intimacy of archaeological practice This text can be used in undergraduate and graduate courses focused on archaeological interpretation and theory as well as on material culture and story telling

Man, Myth and Museum Eurwyn Wiliam, 2023-07-15 This is the first book to critically examine the professional work of the pioneer of open air museums in Britain and the self proclaimed founder of the Welsh Folk Museum at St Fagans and a major figure in Welsh cultural life This book places Peate's life in the context of Welsh history and assesses his impact on helping to create a particular view of Welsh culture placing great emphasis on the importance of the Welsh speaking rural craftsman and ignoring the contribution of industry to Welsh life It makes extensive use of quotation synopsis and translation for the first time giving non Welsh speakers access to his Welsh language publications about museums and folk life

Lives in Land - Mucking excavations Christopher Evans, Grahame Appleby, Sam Lucy, 2015-12-31 The excavations led by Margaret and Tom Jones on the Thames gravel terraces at Mucking Essex undertaken between 1965 and 1978 are legendary The largest area excavation ever undertaken in the British Isles involving around 5000 participants recorded around 44 000 archaeological features dating from the Beaker to Anglo Saxon periods and recovered something in the region of 1.7 million finds of Mesolithic to post medieval date While various publications

have emerged over the intervening years the death of both directors insufficient funding many organizational complications and the sheer volume of material evidence have severely delayed full publication of this extraordinary palimpsest landscape *Lives in Land* is the first of two major volumes which bring together all the evidence from Mucking presenting both the detail of many important structures and assemblages and a comprehensive synthesis of landscape development through the ages settlement histories changing land use death and burial industry and craft activities The long time gap since completion of the excavations has allowed the authors the unprecedented opportunity to stand back from the density of site data and place the vast sum of Mucking evidence in the wider context of the archaeology of southern England throughout the major periods of occupation and activity *Lives in Land* begins with a thorough evaluation of the methods philosophy and archival status of the Mucking project against the organizational and funding background of its time and discusses its fascinating and complex history through a period of fundamental change in archaeological practice legislation finance research priorities and theoretical paradigms in British Archaeology Subsequent chapters deal with the prehistoric landscape each focusing on the major themes that emerge by major period from analysis and synthesis of the data The authors draw on archival material including site notebooks and personal accounts from key participants to provide a detailed but lively account of this iconic landscape investigation

 Hacıgüzeller,Gary Lock,2018-07-27 Maps have always been a fundamental tool in archaeological practice and their
 prominence and variety have increased along with a growing range of digital technologies used to collect visualise query and
 analyse spatial data However unlike in other disciplines the development of archaeological cartographical critique has been
 surprisingly slow a missed opportunity given that archaeology with its vast and multifaceted experience with space and maps
 can significantly contribute to the field of critical mapping Re mapping Archaeology thinks through cartographic challenges
 in archaeology and critiques the existing mapping traditions used in the social sciences and humanities especially since the
 1990s It provides a unique archaeological perspective on cartographic theory and innovatively pulls together a wide range of
 mapping practices applicable to archaeology and other disciplines This volume will be suitable for undergraduate and
