## **Air And Space Power For The Twenty First Century A Primer:**

**Aerospace power in the twenty-first century a basic primer** Clayton K. S. Chun, 2001 Dr Chun's *Aerospace Power in the Twenty First Century A Basic Primer* is a great start towards understanding the importance of aerospace power and its ability to conduct modern warfare. Aerospace power is continually changing because of new technology threats and air and space theories. However, many basic principles about aerospace power have stood the test of time and warfare. This book provides the reader with many of these time-tested ideas for consideration and reflection. Although *Aerospace Power in the Twenty First Century* was written for future officers, individuals desiring a broad overview of aerospace power are invited to read, share and discuss many of the ideas and thoughts presented here. Officers from other services will find that this introduction to air and space forces will give them a good grasp of aerospace power. More experienced aerospace leaders can use this book to revisit many of the issues that have affected air and space forces in the past and that might affect them in the future. Air Force officers will discover that *Aerospace Power in the Twenty First Century* is a very timely and reflective resource for their professional libraries. It covers chapter by chapter the anti-air battle in wars from Yom Kippur 1973 onwards, a readable, well-researched and well-presented book. Army Rumour Service (ARRS) Anti-aircraft artillery truly came into prominence during the Second World War, shooting down more aircraft than any other weapon and seriously affecting the conduct of air operations. Development continued into the Cold War, resulting in the extensive introduction of surface-to-air missiles or SAMs. Though the first combat success of such weapons was during the Vietnam War when a Soviet-designed S-75 Dvina missile shot down a USAF F-4C Phantom on 24 July 1965, it was the Yom Kippur War of 1973 which brought surface-to-air missiles to the center stage. During this short but bitter conflict, Egyptian and Syrian air defenses shot down nearly fifty Israeli aircraft in the first three days alone, almost a fourth of Israel's entire combat aircraft fleet. In all, Israel lost 104 aircraft during the war, and for the first time, more aircraft were lost to SAMs than any other cause. The age of surface-to-air missiles had dawned. In this unique examination, the author details the development of not just surface-to-air missiles but all anti-aircraft artillery since 1972. The part that such equipment played in all of the major conflicts since then is explored, including the Soviet-Afghan War, the Falklands War, in which Rapier was deployed, the conflict in Lebanon, Kosovo, and Bosnia, the Gulf War, Operation Desert Storm.

in 1991 and Operation Iraqi Freedom in 1993 The investigation is brought right up to date by a study of the weapons tactics and engagements seen in the conflicts in Syria and Yemen      **Eagles Overhead** Matt Dietz,2023-02-15 US Air Force Forward Air Controllers FACs bridge the gap between air and land power They operate in the grey area of the battlefield serving as an aircrew who flies above the battlefield spots the enemy and relays targeting information to control close air support attacks by other faster aircraft When done well Air Force FACs are the fulcrum for successful employment of air power in support of ground forces Unfortunately FACs in recent times have been shunned by both ground and air forces their mission complicated by inherent difficulty and danger as well as by the vicissitudes of defense budgets technology leadership bureaucracy and doctrine Eagles Overhead is the first complete historical survey of the US Air Force FAC program from its origins in World War I to the modern battlefield Matt Dietz examines their role status and performance in every US Air Force air campaign from the Marne in 1918 World War II Korea Vietnam Desert Storm and finally Mosul in 2017 With the remaking of the post Vietnam US military and the impact of those changes on FAC the Air Force began a steady neglect of the FAC mission from Operation Desert Storm through the force reductions after the Soviet Union s collapse and into the post 9 11 wars in Iraq and Afghanistan Eagles Overhead asks why FACs have not been heavily used on US battlefields since 2001 despite their warfighting importance Dietz examines the Air Force FAC s theoretical doctrinal institutional and historical frameworks to assess if the nature of air warfare has changed so significantly that the concept and utility of the FAC has been left behind From these examinations Eagles Overhead draws conclusions about the potential future of Air Force FACs
