Air Defence Of Britain 1914 1918:

The Air Defence of Britain 1914-1918 Christopher Cole, E. Frank Cheesman, 1984 En meget grundig gennemgang af det engelske luftforsvar mod dag og natluftangreb under 1 verdenskrig **Battle of Britain 1917** Jonathan Sutherland, Diane Canwell, 2006-06-19 In the autumn of 1916 the Germans began to equip with the Gotha twin engine bomber The Gothas were designed to carry out attacks across the channel against Britain A group of four squadrons was established in Belgium and they carried out their first bombing raid towards the end of May 1917 This 22 aircraft sortie against the town of Folkestone caused 95 deaths In mid June a force of 18 Gothas attacked London in broad daylight Over 90 British fighters met them but not one Gotha was brought down This bombing raid caused 162 deaths From mid September an even larger more potent bomber joined the Gothas The Zeppelin Staaken Riesenflugzeug or Giant bomber It had a range of about 800km 500 miles The Gotha Giant night raids continued throughout 1917 almost unscathed until December when the British began to have success in intercepting the Gothas at night Anti aircraft fire was also becoming more effective and the increased use of barrage balloons affected the bombers By the end of the war a 50 mile long line of barrage balloons surrounded London In the meantime the Giants continued a small but influential campaign against London On 16 February during a four aircraft raid a Giant dropped a 1 000 kg 2 200 lb bomb the largest used by anyone in the war and blew up a wing of the Chelsea hospital *The Routledge Atlas of the First World War* Martin Gilbert, 2013-04-03 From its origins to its terrible legacy the tortuous course of the Great War is vividly set out in a series of 174 fascinating maps Together the maps form a comprehensive and compelling picture of the war that shattered Europe and illustrate its military social political and economic aspects Beginning with the tensions that already existed the atlas covers the early months of the war from the fall of Belgium to the fierce fighting at Ypres and Tannenberg the developing war in Europe from Gallipoli to the horrors of the Somme and Verdun life at the front from living underground the trench system and the mud of Passchendaele to the war graves technology and the new horrors from phosgene gas attacks to submarines tanks and mines the home fronts from German food riots to the air defence of Britain the Russian Revolution and the collapse of Austria Hungary the aftermath from war debts and war deaths to the new map of Europe This third edition contains an entirely new section depicting the visual remembrance of the war a fascinating visitors guide to the memorials that commemorate the tragedy of the Somme *The Development of British Naval Aviation, 1914-1918* Alexander Howlett, 2021-06-08 The Royal Naval Air Service RNAS revolutionized warfare at sea on land and in the air This little known naval aviation organization introduced and operationalized aircraft carrier strike aerial anti submarine warfare strategic bombing and the air defence of the British Isles more than 20 years before the outbreak of the Second World War Traditionally marginalized in a literature dominated by the Royal Flying Corps and the Royal Air Force the RNAS and its innovative practitioners nevertheless shaped the fundamentals of air power and contributed significantly to the Allied victory in the First World War The Development of British Naval

Aviation utilizes archival documents and newly published research to resurrect the legacy of the RNAS and demonstrate its central role in Britain's war effort Strategy & Intelligence Michael Dockrill, David French, 1996-01-01 Collection of essays which summarise the latest literature on Britain's participation in the First World War and also opens up new lines of investigation **Winged Warfare** Michael Paris, 1992 This original study provides a significant reinterpretation of the development of air power in Britain highlighting how in the period before 1914 aerial warfare was already becoming an increasingly forceful concept Great War Britain West Sussex: Remembering 1914-18 West Sussex County Council, 2014-08-04 The First World War claimed over 995 000 British lives and its legacy continues to be remembered today Great War Britain West Sussex offers an intimate portrayal of the county and its people living in the shadow of the war to end all wars A beautifully illustrated and highly accessible volume it describes local reaction to the outbreak of war charts the experience of individuals who enlisted the changing face of industry the work of the many hospitals in the area the effect of the conflict on local families the women who defied convention to play a vital role on the home front and concludes with a chapter dedicated to how the county and its people coped with the transition to life in peacetime once more The Great War story of West Sussex is told through the testimony of those who were there and is vividly illustrated with evocative images from the archives of West Sussex County Council and local museums **Archibald Liversidge, FRS** Roy M. MacLeod, 2009 When Archibald Liversidge first arrived at Sydney University in 1872 as reader in Geology and Assistant in the Laboratory he had about ten students and two rooms in the main building In 1874 he became professor of geology and mineralogy and by 1879 he had persuaded the senate to open a faculty of science He became its first dean in 1882 In 1880 he visited Europe as a trustee of the Australian Museum and his report helped to establish the Industrial Technological and Sanitary Museum which formed the basis of the present Powerhouse Museum's collection Liversidge also played a major role in the setting up of the Australasian Association for the Advancement of Science which held its first congress in 1888 For anyone interested in Archibald Liversidge his contribution to crystallography mineral chemistry chemical geology strategic minerals policy and a wider field of colonial science *Aircraft of the Royal Navy* David Hobbs, 2024-11-30 This is a comprehensive study of every aircraft type ordered for the Royal Navy since 1908 It includes fixed and rotary wing aircraft rigid and non rigid airships unmanned aircraft and pilotless target aircraft together with many designs that were ordered but not built so that the importance placed on them by the Naval Staff or their potential technological impact on carrier design and operations can be explained Every type even unsuccessful single prototypes is described the majority are illustrated by photographs many of which come from the author's own collection and the fifty most significant aircraft have detailed drawings The Australian and Canadian Fleet Air Arms operated RN aircraft types for many years after their formation and these are included together with other types they have operated subsequently to give a more complete overview The book describes over 400 different types of aircraft built by over 100 different manufacturers to offer the most detailed coverage of RN aircraft ever produced

Research for the book took over forty years and reference material included Admiralty Archives and an array of material in the public domain including manufacturers data individual aircraft pilot s notes and a wealth of published sources David Hobbs is uniquely well placed to write this book having served in the RN for thirty three years and retired with the rank of Commander He flew both fixed and rotary wing aircraft and his log book contains 2300 flying hours with 807 day and night deck landings He served in seven British aircraft carriers and spent four years within RN Director General Aircraft Department where he was closely involved with Sea Harrier carrier trials and introduced new visual landing aids for night recoveries and liaised with the USN on carrier operating techniques This is his eleventh book for Seaforth Publishing

Interacting Francoism José M. Faraldo, Gutmaro Gómez Bravo, 2023-06-23 The book presents various investigation into 20th century European dictatorships with its focus on Franco s dictatorship and the Spanish Civil War Francisco Franco s dictatorship in Spain 1936 1939 1975 1978 was a modern form of authoritarianism with a strong totalitarian period like many other dictatorships of the time Francoism occupies a place in history alongside other different dictatorships of its age and a comparative analysis might prove to be a powerful tool in order to understand how in the middle of the 20th century such a repressive and authoritarian form of political control emerged One of the most forgotten fascisms which at the same time was influenced by and influenced other dictatorships there are many aspects of the transnational connections of Francoism that remain under researched Following this methodology thus an attempt is made to situate Francoism in the context of the other dictatorships of the time in an attempt to transcend explanations centered on the nation The chapters cover groundbreaking topics such as the Spanish Civil War as one of the first total wars or Spanish fascism in context as one of the main European totalitarianisms The chapters always have more than one dimension they speak of interrelation entanglement collaboration and diffusion and in general put the different dictatorships essentially Francoism diverse Fascisms and Communism in context and comparison

Gotha Terror Ian Castle, 2024-12-30 By the autumn of 1916 advances in Britain s air defense capability had all but ended the Zeppelin menace which had haunted the nation for almost two years However an emerging complacency regarding the aerial threat was immediately shattered by the introduction in 1917 of the Grosskampfflugzeug better known as the Gotha bomber Whereas Zeppelin airships had attacked individually and stealthily under the cover of darkness the German Army now had a squadron of bomber aeroplanes capable of brazenly attacking London and south east England in broad daylight thereby unleashing a new wave of terror on the British population Britain having downgraded its aerial defenses after the apparent defeat of the Zeppelins was forced to rethink The improvements instigated compelled the German raiders to change their tactics too as each side strived to gain the upper hand And all the time the German Navy Zeppelins whose campaign had not been abandoned entirely continued to strike when opportunity allowed The story of these dramatic air raids is told by incorporating numerous never before published eye witness accounts revealing a personal view of the experiences shared by those who lived through the conflict both on the ground and in the air

The German air campaign against the United Kingdom in the First World War was the first sustained strategic aerial bombing campaign in history Yet it has become dwarfed by the enormity of the Blitz of the Second World War but for those caught up in the tragedy of these raids the impact was every bit as devastating In *Gotha Terror* Ian Castle tells the full story of the 1917 1918 raids in unprecedented detail in what is the final book in a trilogy completing the story of Britain's Forgotten Blitz

Bloody Paralyser Rob Langham, 2017-03-13 *Bloody Paralyser* The Giant Handley Page Bombers of the First World War tells the story of the largest British bombers of the First World War and the men who flew them In 1915 the biggest plane ever seen in Britain took flight for the first time a twin engine monster with a 100 foot wingspan designed to be a Bloody Paralyser to the Germans Operating mainly at night the Handley Page bombers attacked Germany and German occupied towns and cities disrupting the enemy's industry and transport and targeting U boats that were causing heavy losses to merchant shipping The men that flew in the Bloody Paralyzers were the forerunners of the crews of Bomber Command in the Second World War and now their story is told in their own words

The Conduct of Hostilities in International Humanitarian Law, Volume I Wolff Heintschel von Heinegg, 2023-06-14 This volume is the first of two addressing the legal regime governing the use of force during armed conflicts Traditionally labeled Hague Law today the norms it examines are commonly referred to as conduct of hostilities rules At the heart of this body of law is the principle of distinction which requires that civilians and civilian objects be distinguished from combatants and military objectives during military operations It is the purest expression of the foundational balance between humanitarian considerations and military necessity that has underpinned international humanitarian law since its inception The essays selected consider the theoretical and practical difficulties of maintaining the balance in the face of evolving means and methods of warfare and competing perspectives as to how it is best achieved Also addressed is the law governing warfare at sea and in the air Essays focusing on the former examine early norms and analyze their continuing relevance to today's maritime operations whilst those exploring the latter inject much needed clarity into the subject an essential task in light of the centrality of aerial warfare in modern combat operations

The Eastern Fleet and the Indian Ocean, 1942-1944 Charles Stephenson, 2022-04-06 A study of the British Royal Navy's activities in the Indian Ocean during World War II led by Admiral Sir James Somerville The story of the British Eastern Fleet which operated in the Indian Ocean against Japan has rarely been told Although it was the largest fleet deployed by the Royal Navy prior to 1945 and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the Second World War So Charles Stephenson's deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves British pre war naval planning for the Far East is part of the story as is the disastrous loss of the battleship Prince of Wales and battlecruiser Repulse in 1941 but the body of the book focuses on the new fleet commanded by Admiral Sir James Somerville and its operations against the Japanese navy and aircraft as well as Japanese and German submarines Later in the war once the fleet

had been reinforced with an American aircraft carrier it was strong enough to take more aggressive actions against the Japanese and these are described in vivid detail Charles Stephenson's authoritative study should appeal to readers who have a special interest in the war with Japan in naval history more generally and Royal Navy in particular Praise for *The Eastern Fleet and the Indian Ocean 1942-1944* This meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work The text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index This is not only a book for naval historians but also for anyone with an interest in the War in the Indian Ocean region Highly recommended Military Historical Society I enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of Admiral Somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the Japanese Dr John Rickard author and webmaster of the Military History Encyclopedia on the Web

Churchill and Fisher Barry Gough, 2017-10-06 A vivid study of the politics and stress of high command this book describes the decisive roles of young Winston Churchill as political head of the Admiralty during the First World War Churchill was locked together in a perilous destiny with the ageing British Admiral Jacky Fisher the professional master of the British Navy and the creator of the enormous battleships known as Dreadnoughts Upon these Titans at the Admiralty rested British command of the sea at the moment of its supreme test the challenge presented by the Kaiser's navy under the dangerous Admiral Alfred von Tirpitz Churchill and Fisher had vision genius and energy but the war unfolded in unexpected ways There were no Trafalgars no Nelsons Press and Parliament became battlegrounds for a public expecting decisive victory at sea An ill fated Dardanelles adventure by ships alone as Churchill determined on top of the Zeppelin raids on Britain brought about Fisher's departure from the Admiralty in turn bringing down Churchill They spent the balance of the war in the virtual wilderness This dual biography based on fresh and thorough appraisal of the Churchill and Fisher papers is a story for any military history buff It is about Churchill's and Fisher's war how each fought it how they waged it together and how they fought against each other face to face or behind the scenes It reveals a strange and unique pairing of sea lords who found themselves facing Armageddon and seeking to maintain the primacy of the Royal Navy the guardian of trade the succour of the British peoples and the shield of Empire

Over the Top Spencer Jones, Peter Tsouras, 2014-10-30 Although separated from the modern reader by a full century the First World War continues to generate controversy and interest as the great event upon which modern history pivoted Not only did the war cull the European peoples of some of their best and brightest it also led to the destruction of the Austro Hungarian German Ottoman and Russian empires and paved the way for the Second World War This thought provoking book explores ten alternate scenarios in which the course of the war is changed forever How would the war have changed had the Germans not attacked France but turned their main thrust against Russia had the Greeks joined the allies at Gallipoli or had the British severed the communications of the Ottoman Empire at Alexandretta What if there was a more decisive outcome at Jutland if the alternative plans for the Battle of the Somme in 1916 had been put into effect or if the Americans intervened in 1915 rather 1917 Expertly written by leading military historians this is a compelling and credible look at what might have been

Zeppelin Inferno Ian Castle, 2022-05-31 At the beginning of 1916 as the world entered the second full year of global conflict the cities towns and villages of Britain continued to lay vulnerable to aerial bombardment Throughout that period German Zeppelin airships and seaplanes had come and gone at will their most testing opposition provided by the British weather as the country's embryonic defences struggled to come to terms with this first ever assault from the air Britain's civilians were now standing on the frontline the Home Front like the soldiers who had marched off to war But early in 1916 responsibility for Britain's aerial defence passed from the Admiralty to the War Office and as German air attacks intensified new ideas and plans made dramatic improvements to Britain's aerial defence capability While this new system could give early warning of approaching raiders there was a lack of effective weaponry with which to engage them when they arrived

Behind the scenes however three individuals each working independently were striving for a solution The results of their work were spectacular it lifted the mood of the nation and dramatically changed the way this campaign was fought over Britain The German air campaign against Britain in the First World War was the first sustained strategic aerial bombing campaign in history Despite this it has become forgotten against the enormity of the Blitz of the Second World War although for those caught up in the tragedy of these raids the impact was every bit as devastating In *Zeppelin Inferno* Ian Castle tells the full story of the 1916 raids in unprecedented detail in what is the second book in a trilogy that will reveal the complete story of Britain's Forgotten Blitz
