Niels Van Antwerpen

Air Navigation Based On Principles Met:

Cross-border Provision of Air Navigation Services with Specific Reference to Europe Niels Van Antwerpen, 2008-01-01 The tremendous flow of air traffic traversing the airspace of the European Union demands extraordinary vigilance on the part of air navigation service providers Although the first requirement of air navigation services is obviously the enhancement of safety providers must also attend to the efficiency and optimisation of airspace capacity and the minimisation of air traffic delays As technological and operational improvements proceed in these areas jurisdictional issues of responsibility and liability particularly in cases of mid air collisions become ever sharper and more in need of precise definition This detailed and insightful exposition focuses on these issues from three overlapping perspectives the international and European legal framework dealing with air navigation services the question of state responsibility and the question of liability for damage inflicted by air navigation service providers The author's in depth analysis includes examination of many elements among them the following the interrelated roles of the International Civil Aviation Organization ICAO the European Civil Aviation Conference ECAC the European Organisation for the Safety of Air Navigation EUROCONTROL the European Community's European Aviation Safety Agency EASA and other international bodies the Single European Sky initiative its establishment of Functional Airspace Blocks FUA's and its ongoing research program SESAR establishment of transparent lines of state responsibility in the context of cross border provision of air navigation services and prospects for the imposition of a transparent liability regime on corporatized air navigation service providers In conclusion the author enumerates the essential elements required for cross border provision of air navigation services and offers well thought out final recommendations and conclusions on the most preferable way to pursue such cross border provision within and outside the European Community A model agreement for the delegation of air navigation service provision appears as an appendix All professionals concerned with air navigation in Europe and elsewhere will appreciate the depth of knowledge and commitment apparent in this book The deeply informed insights manifest in its pages will be of enormous value to aviation agency officials and air law practitioners everywhere **Air Navigation Law** Ruwantissa Abeyratne, 2012-03-14 The aviation community in which the International Civil Aviation Organization ICAO the International Air Transport Association IATA and the Civil Air Navigation Services Organization CANSO play leading roles is hard at work in bringing aviation into the 21st Century In doing so the United States and Europe have taken proactive steps forward in introducing modernization particularly in moving towards more efficient air traffic management systems within NextGen and SESAR Elsewhere in the fields of personnel licensing rules of the air accident investigation and aeronautical charts and information significant strides are being made in moving from mere regulation to implementation and assistance calculated to make all ICAO member States self sufficient in international civil aviation However these objectives can be achieved only if the aviation industry has a sustained understanding of the legal and regulatory principles applying to the various areas of air

navigation This book provides that discussion Some of the subjects discussed in this book are sovereignty in airspace flight information and air defence identification zones rules of the air personnel licensing meteorological services operations of aircraft air traffic services accident and incident investigation aerodromes efficiency aspects of aviation and environmental protection aeronautical charts and information the carriage of dangerous goods and NextGen and SESAR Except for NextGen and SESAR these subjects form the titles of the Annexes to the Chicago Convention that particularly involve the rights and liabilities of the key players involved in air navigation **The Recent Increase in Air Traffic Control Delays** United States. Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Aviation,2001

Organizational Routines Meet Experimental Psychology Maximilian Eberl,2018-09-03 Using an experimental approach Maximilian Eberl evaluates the role of implicit learning CBM AAT for the modification of organizational routines Taking a vertical perspective on the collective entities in organizations shows an increasing role of impulsive processes the lower the level gets The horizontal perspective demonstrates the potential of implicit learning for the replication of routines Finally the time perspective highlights the contributions of implicit learning strategies for change in and of routines as well as the contributions of implicit learning to deal with the path dependence of routines Accelerated Modernization of the U.S. Air Traffic Control and Navigation System United States. Civil Aeronautics Board. Air Coordinating Committee,1957

Fundamentals of Sustainable Aviation Eva Maleviti,2023-11-10 Fundamentals of Sustainable Aviation is the first textbook to survey the critical field of sustainability within the aviation industry Taking a systems thinking approach it presents the foundational principles of sustainability and methodically applies them to different aviation sectors Opening with the basics of sustainability emphasising the Sustainable Development Goals the book then considers the environmental economic and social dimensions of aviation The following chapters apply these insights to aviation design supply chains operations maintenance and facilities The final chapter examines the concept of resilience in sustainable aviation Overall the textbook shows how future sustainability can be achieved by making better decisions today Students are supported with international case studies throughout the book Slides test questions and a teaching manual are available for instructors This textbook is the ideal resource for courses on sustainable aviation globally and will also be of great interest to professionals in the field
