**Basic Principles of Geopolitics and History** Debabrata Sen, 1975      **Creative Environments** Andrzej P.

Wierzbicki, Yoshiteru Nakamori, 2007-06-02 Creative Environments is a follow up on the book Creative Space in the same series and by the same authors serving this time as editors of a broader book on computational intelligence and knowledge engineering tools for supporting knowledge creation This book contains four parts The first part presents a further development of models of knowledge creation presented already in Creative Space in particular the Triple Helix of normal academic knowledge creation and a new integrated model of normal academic and organizational knowledge creation called Nanatsudaki seven waterfalls Model The second part presents computational intelligence tools for knowledge acquisition by machine learning and data mining for debating brainstorming for roadmapping and for integrated support of academic creativity The third part presents the use of statistics for creativity support virtual laboratories gaming and role playing for creativity support methods of knowledge representation and multiple criteria aggregation distance and electronic learning The last part addresses knowledge management and philosophical issues and contains chapters on management of technology and knowledge management for academic R and D on knowledge management and creative holism or systems thinking in the knowledge age on technology and change or the role of technology in knowledge civilisation on the emergence of complex concepts in science and the final chapter on summary and conclusions including a proposal of an integrated episteme of constructive evolutionary objectivism necessary for the knowledge civilization age      **The**

**Superpowers** Paul Dukes, 2002-01-04 The Superpowers traces the development of the USA and Russia later USSR from 1898 through to 2000 placing the Cold War from inception to ending into the wider social economic and political context This is the first history of the two major participants and their relationship throughout the twentieth century The Superpowers explores the intertwining history of the two powers chronologically and includes discussion of the inheritance of the two great powers and their imperial background World War One and the Russian Revolution Capitalism and Socialism World War Two and its impact the conflicts in Berlin Czechoslovakia Vietnam and Afghanistan Perestroika and the end of the USSR the significance of the events of 1991 and their legacy      **Science and Civilisation in China, Part 2, Mechanical**

**Engineering** Joseph Needham, 1965-01-02 As Dr Needham s immense undertaking gathers momentum it has been found necessary to subdivide volumes into parts each to be bound and published separately The first part of Volume 4 already published deals with the physical sciences the second with the diverse applications of physics in the many branches of mechanical engineering and the third will deal with civil and hydraulic engineering and nautical technology With this part of Volume 4 then we come to the application by the Chinese of physical principles in the control of forces and in the use of power we cross the frontier separating tools from the machine We have already noticed that the ancient Chinese concept of chhi somewhat similar to the pneuma of the Greeks asserted itself prominently in acoustics but we discover here that the

Chinese tendency to think pneumatically was also responsible for a whole range of brilliant technological achievements for example the double acting piston bellows the rotary winnowing fan and the water powered metallurgical blowing machine ancestor of the steam engine as well as for some extraordinary insights and predictions in aeronautics      **Cultural**

**Nationalism in Contemporary Japan** Kosaku Yoshino, 2005-10-18 Japanese author's view of Japanese view of own society Controversial thesis that businessmen use myths of Japanese uniqueness commercially Sold over 900 in hb      NATO, Civilisation and Individuals Sarah da Mota, 2018-03-06 This book critically engages with NATO's two main referent objects of security civilisation and individuals By rethinking the seemingly natural assumption of these two referent objects it suggests the epistemological importance of an unconscious dimension to understand meaning formation and behaviour change in international security The book provides a historicised and genealogical approach of the idea of civilisation that is at the core of the Alliance in which human needs narratives and security arrangements are interconnected It suggests that there is a Civilised Subject of Security at the core of modern Western security that has constantly produced civilised and secure subjects around the world which explains NATO's emergence around a civilisational referent The book then proceeds by considering the Individualisation of Security after the Cold War as another stage of the civilising process based on NATO's military operations in Bosnia Herzegovina Kosovo and Afghanistan      **Secularization and China's Modernization**

Zhongmin Wu, 2024-12-17 This open access book examines from the perspective of secularization Since the publication of Max Weber's Protestant Ethics and the Spirit of Capitalism how to realize modernization in developing countries has become an urgent problem to be demonstrated Secularization has becoming endogenous power for Chinese modernization procedure especially since 1978 However to understand the foundation of secularization it is inevitable to tracing back to Chinese history This approach contains critical analysis and profound insight to illuminate the essence of secularization in contemporary Chinese context The author also applies the comparative approach by comparing with Protestant ethics in many Western European countries the significance of secularization has been emphasized The widespread and intense secularization boosts China into the trend modernization that covers nearly all aspects of society This book is in need for those who intended to discern the truth of Chinese modernization It is also a key tool of reflecting modernization and development in a broader sense      **SOCIOLOGY-II**, 2025-04-22 TP LAW SOLVED SERIES For LL B Bachelor of Laws 5 Years Second Semester Students of University of Lucknow

*The Cambridge Companion to Liberation Theology* Christopher Rowland, 1999-03-13 Liberation theology is widely referred to in discussions of politics and religion but not always adequately understood This Companion offers an introduction to the history and characteristics of liberation theology in its various forms in different parts of the world Authors from four continents examine the emergence and character of liberation theology in Latin America black theology Asian theology and the new situation arising from the end of the apartheid regime in South Africa The major Christian Church's attitude to liberation theology and the extent of the

movement's indebtedness to Marxism are examined and a political theologian writing from another perspective of Christian theology offers an evaluation. Through a sequence of eleven chapters readers are given a comprehensive description and evaluation of the different facets of this important theological and social movement. There is also an Introduction relating liberation theology to the history of theology and a Select Bibliography.

*Civilisations, Civilising Processes and Modernity – A Debate* Artur Bogner, Stephen Mennell, 2022-02-28

In 1984 the celebrated sociologist and historian Norbert Elias convened a major conference on Civilisations and civilising processes at the Centre for Interdisciplinary Research University of Bielefeld. Participants included the most distinguished and influential scholars in historical sociology and world history. This book will make available for the first time in one place the papers presented by the speakers and even more interestingly the transcripts of discussions at the symposium. This conference brought together eminent and internationally reputed scholars of macro history and historical sociology including Johann P Arnason, Elias, Hans Dieter Evers, Johan Goudsblom, Keith Hopkins, William H McNeill and Immanuel Wallerstein. This highly informative encounter between various leading scholars of humanity's global social history has never before been published although it was completely recorded on paper and in tape recordings. Its publication in one volume should be an important event for all students of the long term structural transformations of humanity.

The Cambridge Handbook of Natural Law and Human Rights Tom Angier, Iain T. Benson, Mark D. Retter, 2022-11-17

This Handbook provides an intellectually rigorous and accessible overview of the relationship between natural law and human rights. It fills a crucial gap in the literature with leading scholarship on the importance of natural law as a philosophical foundation for human rights and its significance for contemporary debates. The themes covered include the role of natural law thought in the history of human rights, human rights scepticism, the different notions of subjective right, the various foundations for human rights within natural law ethics, the relationship between natural law and human rights in religious traditions, the idea of human dignity, the relation between human rights, political community and law, human rights interpretation and tensions between human rights law and natural law ethics. This Handbook is an ideal introduction to natural law perspectives on human rights while also offering a concise summary of scholarly developments in the field.

The Code of Human (Civilisation) Mary Olympia Themis, 2016-05-20

Behold what manner of race the fathers of the Golden Age left behind them: Far meaner than themselves. But you will breed a viler progeny. Verily wars and cruel bloodshed shall be unto men and grievous woe shall be laid upon them. Aratus

Phaenomena 123

Aratus was a Greek poet that in his poem *Appearances* have presented the predictions delivered by Astraea, daughter of Zeus, and Themis devoted to human justice on Earth. Themis was known as goddess of divine law. The law of absolute principles of logic of endurance of humanity always would connect to rules of correctness. Accordingly, she would be

real predecessor to the institution of Supreme Court Yet it seems exactly there we have to confront the other side into claiming and declaring what Supreme is and can possibly be on Earth What I found almost necessary is to point out that if anyone is to claim any legacy on anything it has to be clear what kind of legacy can be only acceptable to be claimed first of all I am to insist on the conception of licencing of the civilizational stamp of Earth as declared with in main civilizational declarations of present times of protectionism of civil rights while we still recognize the meaning of having a soul so no anyone can claim it and interpret it as one wants especially in the future I have on mind some kind of sealing of the cultural identities of the nations in terms of qualitative differences that each nation is making promoting further straightening of civilizational values as a consequence Origin with in such perspective does and will matter Yet I am trying to establish humanity with in its abstract dimension through the set of clear rules of civilizational conduct justice and exactness that than only we can call civilisation as it will be something on what our future generations can rely *United States Air Force*

**Ideology** Mikhail Suslov,2024-02-23 A key question for the contemporary world What is Putin s ideology This book analyses this ideology which it terms Putinism It examines a range of factors that feed into the ideology conservative thought in Russia from the nineteenth century onwards Russian and Soviet history and their memorialisation Russian Orthodox religion and its political connections a focus on traditional values and Russia s sense of itself as a unique civilisation different from the West and due a special respected place in the world The book highlights that although the resulting ideology lacks coherence and universalism comparable to that of Soviet era Marxism Leninism it is nevertheless effective in aligning the population to the regime and is flexible and applicable in different circumstances And that therefore it is not attached to Putin as a person is likely to outlive him and is potentially appealing elsewhere in the world outside Russia especially to countries that feel belittled by the West and let down by the West s failure to resolve problems of global injustice and inequality
