The Science of Composting Marco de Bertoldi, 2013-11-11 The European Union initially demonstrated its interest in waste in the late 70s with the programme on Waste Recycling Research and Development At that time composting was only present as a coordination activity and it was only later that specific research programmes in the area were within Europe which was largely instrumental in setting up a series of European conferences seminars and work shops Some of these have resulted in publications which have made significant contributions to developments in the understanding of composting and the use of composts In particular the outputs from meetings in Oxford 1984 Udine 1986 Neresheim 1988 and Angers 1991 are worthy of note Composting has seen significant changes since the 70s when the major thrust in Europe was using mixed municipal solid waste as a feed material Many composting plants which were built to use this material were closed due to the poor quality of the compost which made it very difficult to market As a result the main areas of interest as far as the municipalities are concerned are now with biowaste and source separated organics This interest is apparent from the many new plants which are being constructed across Europe and the ready market which exists for the products In parallel with the renewed interest of the municipalities other areas such as agriculture and the wastewater treatment industries are also developing their own schemes

American Horticultural Society Essential Guide to Ecological Gardening American Horticultural Society, 2026-01-06. From the foremost authority on gardening in North America, the American Horticultural Society comes an authoritative handbook focused on the important practice of ecological gardening. The AHS Essential Guide to Ecological Gardening shares insight on the many ways gardeners can embrace nature for a healthier, more vibrant home landscape. True ecological gardening goes far beyond the battle cry of "Leave the leaves spread across social media every autumn." It is about making thoughtful decisions in your garden each and every day, knowing they impact the millions of plants and animals living there and the greater environment beyond. Becoming a responsible steward of a thriving garden ecosystem has never been more important. This modern and increasingly popular approach treats the garden as the living ecosystem it is. Some of the ecological gardening concepts you'll learn in these beautifully illustrated pages include how to design a garden that's both aesthetically pleasing and ecologically sound. Foster a greater diversity of plants and animals through considerate gardening practices. Prevent stormwater runoff with the use of rain gardens and rain capturing systems. Reduce and replace resource intensive lawns. Maintain your garden in a nature friendly way. Incorporate keystone plants in your garden that support a broad diversity of life. Manage weeds and pests safely. Conduct wildlife friendly garden cleanups. Foster pollinators, soil organisms, and other wildlife by focusing on native plants. By adopting and implementing the principles of ecological gardening, you and your garden will become part of the solution, and you'll have a beautiful, resilient garden you can feel good about. Also included in this series is AHS Essential Guide to Organic Vegetable Gardening and AHS Essential Guide to Perennial Gardening.
