Inpatient Behavior Therapy for Children and Adolescents D.J. Kolko,Vincent B. Van Hasselt,2013-06-29 Behavior therapists on child and adolescent psychiatric inpatient units have played an increasing role in the treatment of a wide range of disorders Indeed behavioral assessment and treatment strategies in these settings have been applied to a diversity of problems including depression mental retardation autism conduct disorders attention deficit hyperactivity disorder anorexia and bulimia More recently the heuristic value of behavioral methods with substance abuse pediatric pain and child maltreatment has been documented as well Because of the multifaceted and complex challenges posed by children and adolescents who reach inpatient units behavioral clinicians have worked closely with other professionals e g psychiatrists social workers psychiatric nurses in an effort to provide broad spectrum comprehensive intervention However as a burgeoning body of clinical research attests the significant contribution of behavior therapy to successful treatment outcome is now indisputable Yet surprisingly few texts have been published concerning inpatient treatment of children and adolescents The few extant efforts in this area have not covered the broad array of issues and diagnostic populations treated nor have they considered the pragmatic day to day difficulties encountered by behaviorally oriented practitioners working in child and adolescent inpatient settings This text is an attempt to remedy such shortcomings by providing a comprehensive yet practical approach to the functions of behavior therapists on inpatient psychiatric services for children and youth

Textbook of Adolescent Psychiatry Richard Rosner,2003-08-29 Adolescent Psychiatry is the first text reference to provide such in depth comprehensive and practical coverage of this specialist area There are many questions pertinent to adolescence alone and these are highlighted throughout the book Starting with the important aspects of normal development the reader is then taken on to risk behaviour and

Child and Adolescent Psychiatry, Mental Retardation, and Geriatric Psychiatry P. Pichot,2013-03-14 The purpose of the World Psychiatric Association is to coordinate the activities of its Member Societies on a world wide scale and to advance enquiry into the etiology pathology and treatment of mental illness To further this purpose the Association organizes mono or multithematic Regional Symposia in different parts of the world twice a year and World Congresses dealing with all individual fields of psychiatry once every five or six years Between these meetings the continuation of the Association's scientific work is assured through the activities of its specialty sections each covering an important field of psychiatry The programs of the World Congresses reflect on the one hand the intention to present the coordinating functions of the Association and on the other to open a broad platform for a free exchange of views Thus the VII World Congress of Psychiatry

held in Vienna from July 11 to 16 1983 was composed of two types of scientific events those structured by the Association and those left to the initiative of the participants The first type comprised Plenary Sessions planned by the Scientific Program Committee and Section Symposia organized by the WPA sections the second embraced Free Symposia free papers video sessions and poster presentations prepared by the participants Altogether 10 Plenary Sessions 52 Section Symposia and 105 Free Symposia took place and 78 free papers and poster sessions and 10 video sessions were held

of the field of child psychiatry and examines contemporary issues facing child and adolescent psychiatrists *Handbook of Mental Health Services for Children, Adolescents, and Families* Ric G. Steele, Michael C. Roberts, 2006-03-30 Social economic and theoretical changes in the current clinical landscape are adding up to profound changes in children's services not the least of which is an expanded need for mental health services Professionals novices and veteran clinicians alike wonder how to fill this demand in the present climate of turf wars reorganizations and budget cuts The Handbook of Mental Health Services for Children Adolescents and Families cogently analyzes the issues and provides the answers from current issues and emerging therapeutic trends to new avenues of treatment Thoroughly researched and documented by industry experts it presents the widest range of mental health services available to youth and their families Areas of coverage include Specific modalities in service delivery including inpatient and day treatment facilities pediatric hospitals and community mental health centers as well as rural school and primary care settings Services tailored to special populations such as adolescent sex offenders homeless children and their families children with chronic illness oppositional teens abuse situations and children exposed to traumatic events Details on preventative programs for child abuse substance abuse STD's and gang violence An in depth examination of the latest developments in children's services including therapeutic camping and Internet based treatment Approaches and methods for evaluating service organization delivery and efficacy Few areas of mental health care demonstrate the need for complementary services as much as child and family practice does With this need firmly in mind the Handbook encourages creativity and collaboration within practice settings and across agencies For clinicians administrators school practitioners and advanced level students this is a reference certain to have lasting impact on the field

House Officer Richard L. Cohen, 2012-12-06 This book is about how young physicians experience training as medical specialists Much attention is now being drawn to the stresses of post graduate medical education their potential negative impact on the quality of patient care and the manner in which these stresses influence the professional and personal development of the physicians involved The entire focus of this book is on the firsthand experience of 52 such physicians enrolled in 16 different medical specialty training programs Because the evaluation of stress is largely a subjective one I have elected through the perception and the cognitive process to approach the question of the trainees themselves THE DOCTORS The subjects of this work are 52 young physicians who volunteered to be interviewed confidentially and anonymously during the 1986-1987 academic year They represent the specialties of anesthesiology clinical pathology dermatology emergency medicine family practice general surgery internal medicine neurology neurosurgery obstetrics and gynecology ophthalmology orthopedic surgery otolaryngology pediatrics psychiatry and radiology
