**Manipulating Anisotropic Transport and Superconductivity by Focused Ion Beam Microstructuring** Maja D. Bachmann,2020-08-28 This thesis presents pioneering work in the relatively new field of focused ion beam FIB sculpting of single crystals to produce bespoke devices and enable the investigation of physics that cannot be studied in bulk samples It begins with a comprehensive and didactic account of how to achieve this sculpting revealing the tricks of the trade of state of the art FIB microstructuring In subsequent chapters the author presents ground breaking results obtained from microstructures of the delafossite oxide metal PdCoO<sub>2</sub> and the heavy fermion superconductor CeIrIn<sub>5</sub> In these elegant forefront experiments a new form of directional ballistic transport in the ultra pure delafossites is described and explained Furthermore a new way to spatially modulate superconductivity induced by strain is demonstrated with electrical transport measurements that agree well with predictions based on thermoelastic finite element simulations

**Dining Room Detectives** Silvia Bauckova,2015-09-04 In the structuralist understanding as proposed by John G Cawelti a classical detective novel is defined as a formula which contains prescribed elements and develops in a predefined ritualistic manner When described in this way the crime fiction formula very closely resembles a recipe when one cooks they also add prescribed ingredients in a predefined way in order to produce the final dish This surprising parallel serves as the starting point for this book's analysis of classical detective novels by Agatha Christie Here a structuralist approach to Golden Age crime fiction is complemented by methodology developed in the field of food studies in order to demonstrate the twofold role that food plays in Christie's novels namely its function as an element of the formula a literary device but also as a cultural sign Christie employed food on various different levels of her stories in order to portray characters construct plots and depict settings What is more incorporating domesticity and food in her novels helped her fundamentally alter the rigid conventions of the crime fiction genre as it developed in the nineteenth century and enabled her to successfully introduce the character of the female detective and to feminise the detective novel as

such Embrace the Darkness Lilly Gayle, 2025-10-31 An experimental vaccine gives vampire Gerard Delaroache hope for the first time in two centuries until two people are brutally murdered and he suspects a conspiracy between vampires and mortals To solve the crime he must put his trust in a beautiful detective But is former soldier and MP turned detective Amber Buckley a threat to his existence Or the answer to his prayers Amber Buckley and her partner are assigned to do follow up interviews in the Lifeblood of America slayings Amber believes she and Reid are just new eyes on a cold case That is until she meets Gerard Delaroache Something about him teases long buried memories Amber would rather not chase However the two join together falling into more than resolution of a murder case It seems Amber has some dark secrets of her own To find their way into the light Amber and Gerard must first EMBRACE THE DARKNESS **Television** Toby Miller, 2003 Bringing together the most important writings on television in theoretical historical empirical and political terms from the USA and Europe with significant coverage of other international works this collection demonstrates television's global significance as a field of study to disciplines across both the humanities and social sciences **Detecting Texts** Patricia Merivale, Susan Elizabeth Sweeney, 2011-06-07 Although readers of detective fiction ordinarily expect to learn the mystery's solution at the end there is another kind of detective story the history of which encompasses writers as diverse as Poe Borges Robbe Grillet Auster and Stephen King that ends with a question rather than an answer The detective not only fails to solve the crime but also confronts insoluble mysteries of interpretation and identity As the contributors to Detecting Texts contend such stories belong to a distinct genre the metaphysical detective story in which the detective hero's inability to interpret the mystery inevitably casts doubt on the reader's similar attempt to make sense of the text and the world Detecting Texts includes an introduction by the editors that defines the metaphysical detective story and traces its history from Poe's classic tales to today's postmodernist experiments In addition to the editors contributors include Stephen Bernstein Joel Black John T Irwin Jeffrey T Nealon and others *Digital Encounters* Aylish Wood, 2007-04-17 Digital Encounters is a cross media study of digital moving images in animation cinema games and installation art In a world increasingly marked by proliferating technologies the way we encounter and understand these story worlds game spaces and art works reveals aspects of the ways in which we organize and decode the vast amount of visual material **The Detective**, 1989 The Psychologist as Detective Randolph A. in determining the length of the current utterance Papers in the collection also consider the role of prosody in the early acquisition of grammar the lateralization of prosody in the brain and the extent to which prosody can be claimed to guide rather than support syntactic structural analysis
