Production Control in the Process Industry E. O'shima,C. F. H. van Rijn,2014-07-04 The papers within this volume reflect the multidisciplinary approach taken by the workshop to the development and improvement of existing production control theories and practices as applied to the process industry Subjects covered include production planning quality control and assurance operational control and maintenance strategy The development of this area is seen by those at the workshop as only being achieved by various groups working together rather than in isolation so that the overall aim of production control is not lost in too much detail This volume will provide the reader with essential information on new initiatives in the process industry with regard to production control

Managing Cybersecurity in the Process Industries CCPS (Center for Chemical Process Safety),2022-04-19 The chemical process industry is a rich target for cyber attackers who are intent on causing harm Current risk management techniques are based on the premise that events are initiated by a single failure and the succeeding sequence of events is predictable A cyberattack on the Safety Controls Alarms and Interlocks SCAI undermines this basic assumption Each facility should have a Cybersecurity Policy Implementation Plan and Threat Response Plan in place The response plan should address how to bring the process to a safe state when controls and safety systems are compromised The emergency response plan should be updated to reflect different actions that may be appropriate in a sabotage situation IT professionals even those working at chemical facilities are primarily focused on the risk to business systems This book contains guidelines for companies on how to improve their process safety performance by applying Risk Based Process Safety RBPS concepts and techniques to the problem of cybersecurity
