Basic College Mathematics Elayn Martin-Gay, 2011-01-01 **Basic College Mathematics** K. Elayn Martin-Gay, 2011
Basic College Mathematics Fourth Edition was written to help readers effectively make the transition from arithmetic to algebra. The new edition offers new resources like the Student Organizer and now includes Student Resources in the back of the book to help students on their quest for success. **Basic College Mathematics** Charles David Miller, Stanley A. Salzman, Diana Hestwood, 1994-12-01
This fourth edition of Basic College Mathematics is designed to help students achieve success in the developmental mathematics program. This book is comprehensive, providing the necessary background and review in whole numbers, fractions, decimals, ratio and proportions, percent, and measurement, as well as an introduction to algebra and geometry and a preview of statistics. Preface *Basic College Mathematics* Charles D. Miller, Stanley A. Salzman, Diana L. Hestwood, 1996 **Basic College Mathematics and Measurements** Miller, 1997 *Basic Engineering Mathematics* John Bird, 2005-03-05
Unlike most engineering maths texts, this book does not assume a firm grasp of GCSE maths and, unlike low-level general maths texts, the content is tailored specifically for the needs of engineers. The result is a unique book written for engineering students which takes a starting point below GCSE level. Basic Engineering Mathematics is therefore ideal for students of a wide range of abilities and especially for those who find the theoretical side of mathematics difficult. All students taking vocational engineering courses who require fundamental knowledge of mathematics for engineering and do not have prior knowledge beyond basic school mathematics will find this book essential reading. The content has been designed primarily to meet the needs of students studying Level 2 courses including GCSE Engineering and Intermediate GNVQ and is matched to BTEC First specifications. However, Level 3 students will also find this text to be a useful resource for getting to grips with the essential mathematics concepts needed for their study, as the compulsory topics required in BTEC National and AVCE A Level courses are also addressed. The fourth edition incorporates new material on adding waveforms, graphs with logarithmic scales, and inequalities, key topics needed for GCSE and Level 2 study. John Bird's approach is based on numerous worked examples supported by 600 worked problems followed by 1050 further problems within exercises included throughout the text. In addition, 15 Assignments are included at regular intervals. Ideal for use as tests or homework, full solutions to the Assignments are supplied in the accompanying Instructor's Manual, available as a free download for lecturers from <http://textbooks.elsevier.com>. *So! You Want to Study Chemistry What! You Need to Know* Gaines Bradford Jackson, 2012-03 *Basic College Mathematics* Elayn Martin-Gay, 2010-10
This edition features the exact same content as the traditional text in a convenient three-hole punched loose-leaf version. Books à la Carte also offer a great value; this format costs significantly less than a new textbook. Elayn Martin-Gay firmly believes that every student can succeed and her developmental math textbooks and video resources are motivated by this belief.
