## **Basic Ideas Reconsidered Progress In Self Psychology:**

**Progress in Self Psychology: Basic ideas reconsidered** Arnold Goldberg, 1985      **Progress in Self Psychology, V. 15** Arnold I. Goldberg, 2013-06-17 Volume 15 of Progress in Self Psychology conveys the rich pluralism of contemporary self psychology with respect to a central theoretical and clinical issue the nature of the self and the manner in which it can best be studied This topic is initially addressed through a series of papers reassessing selfobject transferences and the selfobject function of interpretation It is then approached via the theory of psychoanalytic technique with papers that focus on boundaries and intimacy and on Surface Depth and the Isolated Mind And it culminates in two case studies that elicit animated discussion delineating different perspectives intersubjective motivational systems and self selfobject on the self in relation to the therapeutic process Two studies comparing Melanie Klein and Heinz Kohut a discussion of how current cultural attitudes affect parenting a relational view of the therapeutic partnership and an integration of Silvan Tomkins affect theory with self psychology add breadth to this timely and provocative collection Volume 15 includes additional letters from the Kohut Archives and a moving account of Kohut's struggle with his own impending death      **Progress in Self Psychology, V. 19** Mark J. Gehrie, 2013-05-13 The contributors to Explorations in Self Psychology volume 19 of the Progress in Self Psychology series wrestle with two interrelated questions at the nexus of contemporary discussions of technique How authentic and relationally invested should the self psychologically informed analyst be and what role should self disclosure play in the treatment process The responses to these questions embrace the full range of clinical possibilities Dudley and Walker argue that empathically based interpretation precludes self disclosure whereas Miller argues in favor of authentic self expression and against the self psychologist's frustrating attempt to decenter from frustration or anger Consideration of the utility of a consistently empathic stance continues with Weisel Barth's clinical presentation and the discussions that it elicits about management of her patient's primary destructiveness Lenoff's critical rereading of Kohut's Examination of the Relationship Between Mode of Observation and Theory and Rieveschl's self psychological work with adolescents and Neville Symington's theory of narcissism Contributions to applied analysis explore topics as diverse as an exchange of dreams between John Adams and Benjamin Rush Mann's Death in Venice the films of Ingmar Bergman psychotherapy of the elderly and disabilities in the sensory motor integration in children And Volume 19 concludes with Constance Goldberg's candid and enlightening reminiscence of Heinz Kohut a very complex man with whom to be in a relationship      *Progress in Self Psychology, V. 16* Arnold I. Goldberg, 2013-06-17 Volume 16 of Progress in Self Psychology How Responsive Should We Be illuminates the continuing tension between Kohut's emphasis on the patient's subjective experience and the post Kohutian intersubjectivists' concern with the therapist's own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity Teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst's empathy subjectivity and authenticity Responses to the tension encompass the stance

of intersubjective contextualism advocacy of active responsiveness and emphasis on the thorough going bidirectionality of the analytic endeavor Balancing these perspectives are a reprise on Kohut s concept of prolonged empathic immersion and a recasting of the issue of closeness and distance in the analytic relationship in terms of analysis of the tie to the negative selfobject Additional clinical contributions examine severe bulimia and suicidal rage as attempts at self state regulation and address the self reparative functions that inhere in the act of dreaming Like previous volumes in the series volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations Here self psychology is brought to bear on psychotherapy with placed children on work with adults with nonverbal learning disabilities and on brief therapy Rector s examination of twinship and religious experience Hagman s elucidation of the creative process and Siegel and Topel s experiment with supervision via the internet exemplify the ever expanding explanatory range of self psychological insights

**Progress in Self Psychology, V. 17** Arnold I. Goldberg, 2013-05-13 Volume 17 of Progress in Self Psychology The Narcissistic Patient Revisited begins with the next installment of Strozier s From the Kohut Archives first publication of a fragment by Kohut on social class and self formation and of four letters from his final decade Taken together Hazel Ipp s richly textured Case of Gayle and the commentaries that it elicits amount to a searching reexamination of narcissistic pathology and the therapeutic process This illuminating reprise on the clinical phenomenology Kohut associated with narcissistic personality disorder accounts for the volume title The ability of modern self psychology to integrate central concepts from other theories gains expression in Teicholz s proposal for a two tiered theory of intersubjectivity in Brownlow s examination of the fear of intimacy and in Garfield s model for the treatment of psychosis The social relevance of self psychology comes to the fore in an examination of the experience of adopted children and an inquiry into the roots of mystical experience both of which concern the ubiquity of the human longing for an idealized parent imago Among contributions that bring self psychological ideas to bear on the arts Frank Lachmann s provocative Words and Music which links the history of music to the history of psychoanalytic thought in the quest for universal substrata of psychological experience deserves special mention Annette Lachmann s consideration of empathic failure among the characters in Shakespeare s Othello and Silverstein s reflections on Schubert s self states and selfobject needs in relation to the specific poems set to music in his Lieder round out a collection as richly broad based as the field of self psychology itself

Progress in Self Psychology, V. 14 Arnold I. Goldberg, 2013-05-13 Volume 14 of Progress in Self Psychology The World of Self Psychology introduces a valuable new section to the series publication of noteworthy material from the Kohut Archives of the Chicago Institute for Psychoanalysis In this volume From the Kohut Archives features a selection of previously unpublished Kohut correspondence from the 1940s through the 1970s The clinical papers that follow are divided into sections dealing with Transference and Countertransference Selfobjects and Objects and Schizoid and Psychotic Patients As Howad Bacal explains in his introduction these papers bear witness to the way in which self psychology has increasingly become a

relational self psychology a psychology of the individual's experience in the context of relatedness Coburn's reconstrual of countertransference as an experience of self injury in the wake of unresponsiveness to the analyst's own selfobject needs Livingston's demonstration of the ways in which dreams can be used to facilitate a playful and metaphorical communication between analyst and patient Gorney's examination of twinship experience as a fundamental goal of analytic technique and Lenoff's emphasis on the relational aspects of phantasy selfobject experience are among the highlights of the collection Enlarged by contemporary perspectives on gender and self experience and a critical examination of Kohut Loewald and the Postmoderns Volume 14 reaffirms the position of self psychology at the forefront of clinical developmental and conceptual advance

**Progress in Self Psychology, V. 13** Arnold I. Goldberg, 2013-05-13 Volume 13 provides valuable examples of the very type of clinically grounded theorizing that represents progress in self psychology The opening section of clinical papers encompasses compensatory structures facilitating responsiveness repressed memories mature selfobject experience shame in the analyst and the resolution of intersubjective impasses Two self psychologically informed approaches to supervision are followed by a section of contemporary explorations of sexuality Contributions to therapy address transference and countertransference issues in drama therapy an intersubjective approach to conjoint family therapy and the subjective worlds of profound abuse survivors A concluding section of studies in applied self psychology round out this broad and illuminating survey of the field

**Progress in Self Psychology, V. 18** Arnold I. Goldberg, 2013-06-17 Postmodern Self Psychology the last volume of the Progress in Self Psychology series under the editorship of Arnold Goldberg charts the path of self psychology into the postmodern era of psychoanalysis It begins with Goldberg's thoughtful consideration of the several tributaries of self psychological thought in the decades after Kohut and continues with Mark Gehrie's elaboration of reflective realism as a self psychological way out of epistemological quagmires about the essential reality of the analytic endeavor Clinical contributions offer contemporary perspectives on clinical themes that engaged Kohut in the 1970s a study of the effect of moments of meeting on systems of pathological accommodation a reappraisal of empathy as a bi directional negation and an assessment of the diverse clinical phenomena that justify a prolonged understanding only phase of treatment The theory section of Volume 18 comparably charts the movement of self psychology toward a postmodern sensibility Contributors reappraise intersubjectivity theory as a contextualist treatment approach consistent with dynamic systems theory return to Kohut's concept of selfobject relationships with special attention to the separate subjective and intersubjective components of selfobject experiences and develop one of Kohut's early ideas into a theory of forward edge transferences that strengthen normal self development In all Volume 18 is a richly insightful progress report on the current status of self psychology and a fitting capstone to Arnold Goldberg's distinguished tenure as editor of the Progress in Self Psychology series

Progress in Self Psychology, V. 20 William J. Coburn, 2013-07-04 Transformations in Self Psychology highlights the manner in which contemporary self psychology has become in the words of series editor William Coburn a

continuing series of revolutions within a revolution Of special note are contributions that explore the bidirectional influences between self psychology and other explanatory paradigms The volume begins with Stern's thoughtful attempt to integrate self psychological and relational perspectives on transference countertransference enactments Fosshage and Munschauer's presentation of a case of extreme nihilism and aversiveness elicits a series of discussions that constructively highlights divergent perspectives on the meaning and role of enactment in treatment and on the so called empathy authenticity dichotomy The productive exploration of theoretical differences also enters in the redefinition of notions of gender and sexuality a topic of increasing interest to self psychologists Differing perspectives which give rise to differing clinical emphases emerge in the exchanges of Clifford and Goldner and of VanDerHeide and Hartmann The special contextualist demands of work with intercultural couples foster a more integrative sensibility with self psychological borrowings from interpretive anthropology and attachment theory Clinical contributors to Volume 20 explore manifestations of a tension that permeates all analytic work that between the patient's newly emerging ability to expand the self in growth consolidating ways and the countervailing dread to repeat Enlarged by Malin's personal reflections of Fifty Years of Psychoanalysis and by book review essays focusing on the writings of Lachmann and Stolorow respectively Transformations in Self Psychology bespeaks the continuing vitality of contemporary self psychology

Emotions in Child Psychotherapy Kenneth Barish, 2009-04-10 Emotions are the common ground of child psychotherapy and a therapist's essential means of communication with children Improved emotional resilience must be the shared therapeutic goal of all those who work with children and families In Emotions in Child Psychotherapy Kenneth Barish presents an integrative framework for child therapy based on a contemporary understanding of the child's emotional experience Barish begins with a concise review of recent advances in the psychology and neuroscience of emotions and an analysis of several emotions interest shame and pride anxiety anger and sadness that are essential but often underappreciated in therapeutic work with children Offering an emotion based perspective on optimal and pathological development in childhood Barish argues that in pathological development negative emotions have become malignant and children are locked in vicious cycles of interaction that perpetuate defiance and withdrawal Based on these principles Barish presents a comprehensive model for therapeutic work with children and families He demonstrates how a systematic focus on the child's emotions provides new understandings of all phases of the therapeutic process and effective means of solving persistent clinical problems how to engage more children in treatment mitigate the child's resistance and provide the kind of understanding to children that promotes openness initiative and pro social character development Finally Barish offers a set of active therapeutic strategies that will help repair family relationships damaged by frequent anger and resentment as well as specific techniques to help parents resolve many of the most common challenges of childrearing Emotions in Child Psychotherapy includes extensive clinical illustrations and addresses many of the problems faced at some time by every child therapist Both richly informative and highly practical this

book will be value to all students of child therapy and to practicing clinicians of differing theoretical orientations **The**

**Silent Past and the Invisible Present** Paul Renn,2012-04-27 Drawing on research in the fields of cognitive and developmental psychology attachment trauma and neuroscience as well as 20 years in forensic and private practice Paul Renn deftly illustrates the ways in which this research may be used to inform an integrated empirical hermeneutic model of clinical practice He suggests that silent invisible processes derived from the past maintain non optimal ways of experiencing and relating in the present and that a neuroscience understanding of the dynamic nature of memories and of the way in which the implicit and explicit memory systems operate and interact is salient to a concomitant understanding of trauma personality development and therapeutic action Specifically Renn argues that an intersubjective psychodynamic model can use the power of an emotionally meaningful therapeutic relationship to gradually facilitate both relational and neurological changes in patients with trauma histories Taken as a whole these themes reflect a paradigmatic shift in psychoanalytic thinking about clinical work and the process of change Discovering Therapeutic Efficacy Howard Bacal,2025-07-31

Discovering Therapeutic Efficacy brings together selected papers and book chapters by Howard Bacal spanning 40 years as a psychoanalyst psychiatrist and psychotherapist The book includes several key pieces of writing influenced by psychoanalytic figures Bacal had the rare opportunity to study under including Michael Balint Wilfred Bion Heinz Kohut Marion Milner J D Sutherland and Donald Winnicott The chapters variously describe how the concept of optimal responsiveness is pivotal to the uniqueness of therapeutic need and how each psychoanalytic dyad discovers its unique capacity to implement it Bacal describes how this led him to develop specificity theory a process theory of therapeutic possibility Discovering Therapeutic Efficacy is replete with illustrative clinical examples It will be of great interest and of practical usefulness not only to psychoanalysts but to every practitioner of dynamic psychotherapy as they strive to be as optimally responsive as they can to their patients and students The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC 4 0 license **The Self**

**Psychology of Addiction and its Treatment** Richard B. Ulman,Harry Paul,2013-04-03 In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work provides new ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the

representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date The Clinical Exchange Joseph D. Lichtenberg, Frank M. Lachmann, James L. Fosshage, 2013-06-17 In this practical sequel to the same authors Self and Motivational Systems TAP 1992 Lichtenberg Lachmann and Fosshage offer ten principles of technique to guide the clinical exchange These principles which pertain equally to exploratory psychotherapy and psychoanalysis integrate the findings of self psychology with recent developmental research that has refined our understanding of the self as a center of experience and motivation The ten principles of technique not only provide a valuable framework for attending to a wide range of motivations but lead to basic revisions in the theory and technical management of affects transference and dreams *The Annual of Psychoanalysis, V. 26/27* Jerome A. Winer, 2013-06-17 Volume 26 27 begins with publication of The Annual s first prize essay Samuel Abrams s How Child and Adult Analysis Inform and Misinform One Another This is followed by a series of papers originally prepared for a symposium honoring John E Gedo These papers span the clinical topics of obsessiveness sublimation dreams and self analysis and analyzability and also delve into applied psychoanalysis and art history with two studies of Vincent van Gogh and another of Alberto Giacometti These papers not only convey the impressive range of Gedo s own interests but embody the high scholarly and clinical standards that Gedo has long held both for himself and for the field in general Section III offers original contributions to clinical analysis in the form of the consideration of the role of affective engagement in the analyst s usability thoughtful assessment of the perils of parental projection in child analytic work and comparison of a failed and successful supervision in the same psychoanalytic case Section IV examines psychoanalysis and the arts with two further studies of van Gogh an analytic reading of Nabokov s Lolita and more general examinations of psychoanalysis in relation to dramatic art and film analysis The volume closes with two provocative scholarly essays bearing on the roots of psychoanalysis the correspondence between Mabel Dodge and her analysts Smith Ely Jelliffe and A A Brill as a vehicle for reviewing the issue of extra and postanalytic contact between analyst and patient and an examination of Freud Lacan and the uneasy relationships among literature psychoanalysis and the female subject Volume 26 27 offers readers a rich harvest of contemporary insights about psychoanalysis including its history and evolution its continuing clinical refinement and its scholarly applications outside the consulting room **Scripture, Cultures, and Criticism** K. K. Yeo, 2022-08-23 This collection of nineteen representative essays is a Festschrift written by former colleagues and students in honor of Prof Dr Robert Jewett 1933 2020 and his legacy Our hope is that future generations of Bible readers will find this textbook on biblical interpretation helpful for navigating through the strong winds of exegetical theological and hermeneutical methods Jewett s expansive research interests have inspired each author in this tribute volume each of whom has witnessed to the ways that helmsman Jewett has navigated through the often choppy ocean waters of biblical

*Symptom-Focused Dynamic Psychotherapy* Mary E. Connors, 2013-05-13 Traditionally psychoanalytically oriented clinicians have eschewed a direct focus on symptoms viewing it as superficial turning away from underlying psychopathology But this assumption is an artifact of a dated classical approach it should be reexamined in the light of contemporary relational thinking So argues Mary Connors in *Symptom Focused Dynamic Psychotherapy* an integrative project that describes cognitive behavioral techniques that have been demonstrated to be empirically effective and may be productively assimilated into dynamic psychotherapy What is the warrant for symptom focused interventions in psychodynamic treatment Connors argues that the deleterious impact of symptoms on the patient's physical and emotional well being often impedes psychodynamic engagement Symptoms associated with addictive disorders eating disorders OCD and posttraumatic stress receive special attention With patients suffering from these and other symptoms Connors finds specific cognitive behavior techniques may relieve symptomatic distress and facilitate a psychodynamic treatment process with its attentiveness to the therapeutic relationship and the analysis of transference countertransference Connors model of integrative psychotherapy which makes cognitive behavioral techniques responsive to

a comprehensive understanding of symptom etiology offers a balanced perspective that attends to the relational embeddedness of symptoms without skirting the therapeutic obligation to alleviate symptomatic distress In fact Connors shows active techniques of symptom management are frequently facilitative of treatment goals formulated in terms of relational psychoanalysis self psychology intersubjectivity theory and attachment research A discerning effort to enrich psychodynamic treatment without subverting its conceptual ground Symptom Focused Dynamic Psychotherapy is a bracing antidote to the timeworn mindset that makes a virtue of symptomatic suffering

**Jesus in Our Wombs** Rebecca J. Lester, 2005 In *Jesus in Our Wombs* Rebecca J Lester takes us behind the walls of a Roman Catholic convent in central Mexico to explore the lives training and experiences of a group of postulants young women in the first stage of religious training as nuns Lester who conducted eighteen months of fieldwork in the convent provides a rich ethnography of these young women s journeys as they wrestle with doubts fears ambitions and setbacks in their struggle to follow what they believe to be the will of God Gracefully written finely textured and theoretically rigorous this book considers how these aspiring nuns learn to experience God by cultivating an altered experience of their own female bodies a transformation they view as a political stance against modernity Lester explains that the Postulants work toward what they see as an authentic femininity one that has been eclipsed by the values of modern society The outcome of this process has political as well as personal consequences The Sisters learn to understand their very intimate experiences of the Call and their choices in answering it as politically relevant declarations of self Readers become intimately acquainted with the personalities family backgrounds friendships and aspirations of the Postulants as Lester relates the practices and experiences of their daily lives Combining compassionate engaged ethnography with an incisive and provocative theoretical analysis of embodied selves *Jesus in Our Wombs* delivers a profound analysis of what Lester calls the convent s technology of embodiment on multiple levels from the phenomenological to the political
