Transnational Influences on Values and Practices in Nordic Educational Leadership Leif Moos, 2013-03-15 This book explores to what extent transnational influences change national local values and practices in the Nordic educational systems It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses It describes how national discourses and regulation influences school leadership values culture and practice in competition with traditional values The transnational and global discourse on educational leadership is mostly formed according to Anglo American thinking and tradition Pivotal foundations of this discourse are strong hierarchical societies class societies with liberal democracies and clearly streamed education systems The Nordic discourse however builds on a more equal society and flat hierarchies with participatory democracy and on comprehensive schooling with strong local community roots Leadership thinking and practices are formed by the culture and context they are part of they are primarily shaped by the national local values traditions and practices and only partially shaped by politics discourses and literature Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo American origin and many of the research projects have Anglo American foundations it is difficult to distinguish the sources for leadership thinking and practice This book distinguishes the Nordic from the Anglo American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic

countries **A Decade of Research on School Principals** Helene Ärlestig, Christopher Day, Olof Johansson, 2015-11-13
This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries Each of these directions has its own particular cultural educational and policy history Taken together the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals and their contributions to the improvement of teaching and the learning and achievement of students The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students progress and achievement and to promote equity and social justice **The Politics of Education** Marjorie Lamberti, 2004-10-01 Although the early history of progressive education is often associated with John Dewey in America the author argues convincingly that the pedagogues in the elementary schools in the big cities of Imperial Germany were in the avant garde of this movement on the European Continent Far more than a history of ideas this study provides the first comprehensive analysis of the culture wars over the schools in Germany in the 1920s Going up to the Nazi seizure of power the author s narrative sheds new light on the courageous defense of the republican state by the progressive educators in the 1930s and the relationship between the traditionalists opposition to school reform and the attraction of certain sections of the teaching profession to the Nazi movement **Germany, 1947-1949** United States.
