**Case Studies of Wildlife Ecology and Conservation in India** Orus Ilyas, Afifullah Khan, 2022-11-30 This volume brings together a collection of case studies examining wildlife ecology and conservation across India. The book explores and examines a wide range of fauna across different terrains and habitats in India, revealing key issues and concerns for biodiversity conservation with a particular emphasis on the impact of humans and climate change. Case studies are as wide ranging as tigers, leopards, sloth bears, pheasants, insects, and birds across a diverse range of landscapes including forests, wetlands, and nature reserves, and even a university campus. Split into three parts, Part I focuses on how the distribution of animals is influenced by the availability of resources such as food, water, and space. Chapters examine key determinants such as diet and prey and habitat preferences, with habitat loss also being an important factor. In Part II, chapters examine human-wildlife interactions dealing with issues such as the impact of urbanisation, the establishment of nature reserves, and competition for resources. The book concludes with an examination of landscape ecology and conservation, with chapters in Part III focusing on habitat degradation, changes in land use patterns, and ecosystem management. Overall, the volume not only reflects the great breadth and depth of biodiversity in India but offers important insights into the challenges facing biodiversity conservation not only in this region but worldwide. This volume will be of great interest to students and scholars of wildlife ecology, conservation biology, biodiversity conservation, and the environmental sciences more broadly.

**Transcultural Diplomacy and International Law in Heritage Conservation** Olimpia Niglio, Eric Yong Joong Lee, 2021-05-02 This book provides a substantial contribution to understanding the international legal framework for the protection and conservation of cultural heritage. It offers a range of perspectives from well-regarded contributors from different parts of the world on the impact of law in heritage conservation. Through a holistic approach, the authors bring the reader into dialogue around the intersection between the humanities and legal sciences, demonstrating the reciprocity of interaction in programs and projects to enhance cultural heritage in the world. This edited volume compiles a selection of interesting reflections on the role of cultural diplomacy to address intolerances that often govern international relations, causing damage to human and cultural heritage. The main purpose of this collection of essays is to analyse the different cultural paradigms that intervene in the management of heritage and to advocate for improvements in international laws and conventions to enable better cultural policies of individual nations for the protection of human rights. The editors submit that it is only through open dialogue between the humanities and jurisprudence that the international community will be able to better protect and value sovereignty and promote cultural heritage for the development of a better world. This collection is relevant to scholars working in areas relating to law, management, and policies of cultural heritage conservation and protection.
