Conserver Society A Workable Alternative:

The Conserver Society Kimon Valaskakis,1979 *The Conserver Society : a Workable Alternative for the Future* Kimon Valaskakis,1979 *Life in 2030* John B. Robinson,2007-10-01 Life in 2030 is a ground breaking practical and above all positive vision of life in twenty first century Canada As we move into the next century the development of sustainable and environmentally benign patterns of resource utilization and socioeconomic development is an essential priority In this book John Robinson and his co authors investigate the possibility and impacts of a sustainable future for Canada **The Conserver Society** F. E. Trainer,1995-09-15 Moving beyond the now widely accepted assertion that the current way of life in rich countries is not sustainable Australian environmentalist Trainer describes what a sustainable society might look like and suggest paths to get from here to there Arguing that the basis must be more materially simple living standards and small scale self sufficient local economies he discusses housing food production energy the design of settlements the development of a new economy and the shift to new values The examples of change already implemented and measures to accelerate them focus on nudging local communities rather than overturning governments and corporations Paper edition unseen 19 95 Distributed in the US by Humanities Press Annotation copyright by Book News Inc Portland OR **The Conserver Society** Karl E. Henion,Thomas C. Kinnear,American Marketing Association,1979 **Global Environmental Risk** Jeanne X. Kasperson,Roger E. Kasperson,2013-05-13 Despite international initiatives such as the Earth Summit in 1992 and ongoing efforts to implement the Kyoto Protocol human activities continue to register a destructive toll on the planetary environment At root research on global environmental risk seeks new pathways for reversing unsustainable trends curtailing ongoing destructive activities and creating a life sustaining planet This book takes stock of the distinctive challenges posed by global environmental risks the capacity of knowledge systems to identify and characterize such risks and the competence of human society to manage the unprecedented complexity Particular attention trains on engaging in ways conducive to enhancing social learning and adaptation the large uncertainties inherent in these risks Various chapters enlist different scales of analysis to explore the manifestation and causes of global environmental risks in all the diversity of their regional expression Throughout the editors and contributors accord prominence to the vulnerability of people and places to environmental degradation Understanding vulnerability is a neglected key to assessing the nature of the risks and determining strategies for altering trajectories of threat Global risk futures the editors argue are not intractable and are still amenable to a risk analysis enterprise that is democratic in principle humanistic in concept and geared to the realities that pertain to the particular societies locales and regions that will ultimately bear the risk **Alternatives** ,1989 Perspectives on society and environment **The Fourth Wave** Herman Maynard,Susan E. Mehrtens,1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler s revolutionary description of

third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change The Fourth Wave examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees

Evaluation of Alternative Transmission System Expansion Programs, Southwestern Ontario, Plan Stage Environmental Assessment (EA) B1(3v); Appendices, 1981 **The Earth as Transformed by Human Action** B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere
