Conserving Biological Diversity In Managed Tropical Forests:

Conserving Biological Diversity in Managed Tropical Forests Jill M. Blockhus, 1992 At the meeting of the International Tropical Timber Organization held in Bali in 1990 ITTO adopted the target of ensuring that all tropical timber marketed internationally should by the year 2000 come from forests that are managed sustainably This study is an attempt to determine whether the member countries of the ITTO have a legal and administrative basis for managing their production forests in ways which will allow these forests to contribute to biological diversity conservation It also attempts to assess the extent to which such management is already applied on the ground through member country studies A set of guidelines on ways in which management of production forests could be improved is included **Timber Production and Biodiversity Conservation in Tropical Rain Forests** Andrew Grieser Johns, 1997-07-10 How timber production and tropical biodiversity conservation can be balanced *Conservation and management of tropical forests and biological diversity in Zaire* Jeff Goodson, 1988 Proceedings of the Session on Tropical Forestry for People of the Pacific. Seventeenth Pacific Science Congress C. Eugene Conrad, Leonard A. Newell, 1994 Covers forestry research in Asia and the Pacific management of tropical forests for products and energy forests and wildlife management tropical rainforests of northern Australia forest resources in New Guinea management factors affecting forests fire management in Central America biological diversity and much more Graphs and photos **Proceedings of the Session on Tropical Forestry for People of the Pacific, XVII Pacific Science Congress, May 27-28, 1991, Honolulu, Hawaii**, 1992 **Biological Diversity** L. N. Petrov, 2003 One of the cornerstones of life s wonders is the vast array of species filling the planet From plants to animals to humans there is no shortage of beings to provide spice of life variety is said to be Periodically scientists announce the discovery of a new form of life so it seems as if Earth is capable of producing new species just to keep us on our toes At times the immense breadth of living things can even feel overwhelming as one pauses to ponder how numerically insignificant humans are when compared to the insect population Given the biological diversity of the planet it is incumbent upon humans to safeguard the natural beauty of the environment To that end conservation takes on special importance necessitating the balancing of industrial expansion with preserving the flora and fauna surrounding us This book is an important tool in understanding and researching the many different life forms spanning the globe Collected here is a substantial and carefully selected listing of relevant literature on biological diversity and its conservation Following this bibliography are author title and subject indexes to allow for further access to this information The sheer bulk of the works about biological diversity can be so intimidating that a book such as this one becomes useful in sorting through the resources about the importance of life s variety *The National Biological Diversity Conservation and Environmental Research Act* United States. Congress. Senate. Committee on Environment and Public Works. Subcommittee on Environmental Protection, 1991 **General Technical Report PSW.**, 1978 **Surveying Marbled Murrelets at Inland Forested Sites**, 1990 Forest Genetic Resources Conservation and
