Conserving Wildlife International Education And Communication Approaches:

Conserving Wildlife Susan Kay Jacobson, 1995 This volume explores fifteen exemplary education and communication programs that have contributed to the conservation of wildlife and natural resources around the world presenting the perspectives necessary to confront the unabated extinction of animal and plant species and increasing human pressure on tropical and temperate forests wetlands and marine environments Includes documented examples of conservation education programs with sections on planning implementing and assessing each program *The Conservation Handbook* William J. Sutherland, 2008-04-15 Textbooks on the principles of conservation biology abound Yet how does one put this theoretical knowledge into practice The aim of *The Conservation Handbook* is to provide clear guidance on the implementation of conservation techniques The wide range of methods described include those for ecological research monitoring planning education habitat management and combining conservation with development Nineteen case studies illustrate how the methods have been applied The book will be of interest to conservation biology students and practicing conservationists worldwide For each copy of the book sold another copy will be sent free to a practicing conservationist outside Western Europe North America Australia New Zealand and Japan Foreword by E O Wilson Concise practical guide packed full of ideas methods and advice Provides solutions for the main conservation problems most commonly encountered 18 global case studies illustrate the application of techniques *The Conservation Handbook* Donations Project this book is being sent free to those practising conservationists outside Western Europe North America Australia New Zealand and Japan who are otherwise unlikely to obtain a copy These copies are provided at cost price by Blackwell Science the publisher and paid for with the author's royalties Each book sold means another one will be donated **Conservation Science and Action** William J. Sutherland, 2009-07-01 *Conservation Science and Action* is intended for upper level undergraduate and graduate courses in conservation biology This book reviews the latest thinking and approaches and in doing so provides a readily accessible reference work for conservation professionals and managers Because conservation biology is now one of the most dynamic disciplines in the life sciences William Sutherland and his international team of authors have selected many of the liveliest topics where key advances are currently being made They stress ideas point to unresolved issues and suggest possible future developments Finally since conservation is an applied subject the book's emphasis throughout is on action Essential reading for senior undergraduate and postgraduate students taking courses in conservation biology one of the most dynamic disciplines in the life sciences Contributions from leading figures in the field who have selected the liveliest topics where key advances are being made Reviews the latest thinking and approaches Contributors cover a range of taxonomic groups include aquatic and terrestrial plants and animals and give examples from around the world Emphasis given to action and all chapters have an applied component *Conservation Across Borders* Charles C. Chester, 2012-02-13 Conservationists have long been aware that political boundaries rarely coincide with natural boundaries From the establishment of early peace

parks to the designation of continental migratory pathways a wide range of transborder mechanisms to protect biodiversity have been established by conservationists in both the public and private sectors Conservation Across Borders presents a broad overview of the history of transboundary conservation efforts and an accessible introduction to current issues surrounding the subject Through detailed examinations of two initiatives the International Sonoran Desert Alliance ISDA and the Yellowstone to Yukon Initiative Y2Y the book helps readers understand the benefits and challenges of landscape scale protection In addition to discussing general concepts and the specific experience of ISDA and Y2Y the author considers the emerging concept of conservation effectiveness and offers a comparative analysis of the two projects The book ends with a discussion of the complex relationships among civil society governments and international borders By considering the history goals successes and failures of two divergent initiatives the book offers important insights into the field of transborder conservation along with valuable lessons for those studying or working in the field

Conservation in the 21st Century: Gorillas as a Case Study T.S. Stoinski, H. D. Steklis, P.T. Mehlman, 2009-07-09 Like other fields of science wildlife conservation is a changing field Threats facing wild populations of apes and other species say 20 years ago are likely not the same ones most pressing today and even where threats have remained unchanged more effective means of addressing them may be available now Conservation scientists have learned from many years of experience and both theoretical and technological advances today provide conservation tools not available in the past This volume identifies the primary problems faced in conserving wild populations of gorillas throughout Africa pinpointing new approaches to solving these problems and outlining the increased role that zoos can play in gorilla conservation It includes expertise of field scientists in a variety of disciplines to discuss current conservation threats novel approaches to conservation and potential solutions

Ecology and Conservation of the Maned Wolf Adriana G. Consorte-McCrea, Eliana Ferraz Santos, 2013-10-24 Wolves are controversial figures worldwide and much effort has focused on how to conserve them while addressing public concerns With its solitary habits and fruit eating diet the endangered maned wolf roams the South American grasslands and swamps playing a vital part in maintaining biodiversity hotspots Compared to the grey wolf little is known about its relationship with local people and the environment and the reasons for its decline making research about this unique species an urgent concern Ecology and Conservation of the Maned Wolf Multidisciplinary Perspectives gathers the work of leading researchers from diverse disciplines and countries covering up to date research on the biology ecology and conservation of the maned wolf It presents innovative insights that can benefit conservation strategies and offers perspectives for the future of the species The book is divided into three parts Part I explains the general issues concerning the maned wolf population viability the relationship between maned wolves and people and the management of captive maned wolves It also reviews current aspects of species biology including conservation genetics feeding ecology social structure and reproduction and conservation medicine Part II contains case studies that present knowledge gathered from conservation programs and field research in all countries where

the species is currently found Brazil Uruguay Argentina Bolivia and Paraguay Part III offers perspectives from diverse fields of research exploring the challenges and opportunities connecting maned wolf conservation efforts with those of its habitat and of other endangered species This includes education and communication tools the application of human dimensions research to maned wolf conservation ethnoconservation perspectives and the ecological and socioeconomic challenges to the conservation of the cerrado habitat

Conservation Psychology Susan Clayton, Gene Myers, 2015-09-28 People are inseparable from natural ecosystems and understanding how people think about experience and interact with nature is crucial for promoting environmental sustainability as well as human well being This is the new edition of what is now the leading textbook in conservation psychology the field that explores connections between the study of human behavior and the achievement of conservation goals Completely updated this book summarizes theory and research on ways in which humans experience nature it explores people's conceptions of nature and environmental problems their relationship with nature and their moral lenses on nature and examines ways to encourage conservation oriented behavior at both individual and societal levels Throughout the authors integrate a wide body of research demonstrating the role of psychology in promoting a more sustainable relationship between humans and nature New sections cover human perceptions of environmental problems new examples of community based conservation and a positive psychology perspective that emphasizes the relevance of nature to human resilience Additional references are to be found throughout this edition along with some new examples and a reorganisation of chapters in response to reader feedback This fascinating volume is used for teaching classes to senior undergraduate and graduate students of Conservation Psychology Environmental Psychology and Conservation Science in departments of Psychology Geography Environmental Science and Ecology and Evolution It is equally suitable as a starting point for other researchers and practitioners psychologists conservation biologists environmental scientists and policy makers needing to know more about how psychological research can inform their conservation work

The Ecology, Exploitation and Conservation of River Turtles Don Moll, Edward O. Moll, 2004-04-08 The underlying theme of this book is that a widespread taxonomically diverse group of animals important both from ecological and human resource perspectives remains poorly understood and in decline while receiving scant attention from the ecological and conservation community This volume proposes a comprehensive overview of the world's river turtles ecology conservation and management It begins with a categorization of taxa which inhabit flowing water habitats followed by information on their evolutionary and physical diversity and biogeography Within the framework of ecology the authors discuss the composition of river turtle communities in different types of lotic habitats and regions population dynamics movements reproductive characteristics and behavior predators and feeding relationships In a conservation and management section the authors identify and evaluate the nature and intensity of factors which threaten river turtle survival almost all of which involve direct human exploitation or indirect effects of human induced habitat alteration and degradation They then list and evaluate the various schemes which have

been proposed or employed to halt declines and restore populations and make recommendations for future management plans for specific species and regions In closing they state their viewpoint concerning future research directions and priorities and an evaluation of future prospects for survival of the world s river turtle species

Marine Resource Conservation and Poverty Reduction Strategies in Tanzania Jennifer K. Sesabo,2007-05-11 The Tanzanian coastal areas are socially nutritionally economically and environmentally important yet they are vulnerable to both over exploitation and degradation of their habitats This book demonstrates the extent which various socio economic dimensions of rural coastal households influence livelihood pathways production efficiency and attitudes towards conservation initiatives

Natural Resource Valuation and Policy in Brazil Peter H. May,2000-01-11 Brazil s environmental problems especially Amazon deforestation have attracted considerable attention particularly in the developed world Peter May brings a sharper and more critical focus to bear on this topic by offering a general overview and seven microeconomic case studies on particular problems in the Brazilian environment Focusing on discrete resource problems at a subnational scale this practical book shows how work at the state and local level can lead to more sustainable development policies not only in Brazil but also in many other developing nations Uniting specific Brazilian applications of more general principles of natural resource and environmental valuation to support policy making for land use and economic development *Natural Resource Valuation and Policy in Brazil* shows how such methods support efforts to incorporate environmental concerns in decision making processes

Fundamentals of Conservation Biology Malcolm L. Hunter, Jr.,James P. Gibbs,2009-03-12 In the new edition of this highly successful book Malcolm Hunter and new co author James Gibbs offer a thorough introduction to the fascinating and important field of conservation biology focusing on what can be done to maintain biodiversity through management of ecosystems and populations Starting with a succinct look at conservation and biodiversity this book progresses to contend with some of the subject s most complex topics such as mass extinctions ecosystem degradation and over exploitation Discusses social political and economic aspects of conservation biology Thoroughly revised with over six hundred new references and web links to many of the organizations involved in conservation biology striking photographs and maps Artwork from the book is available to instructors online at www.blackwellpublishing.com/hunter and by request on CD ROM

Sirenian Conservation Ellen Hines,John E. Reynolds III,2012-05-20 This important scientific volume comprehensively explores the biology and ecological status of manatees and dugongs in all of the geographic regions where they can be found today from the Caribbean to Eastern Africa from Arabia to the Amazon and from Japan through the South Pacific to Australia Many of these dwindling populations are situated in developing countries locales that have previously received little attention in the scientific literature In these areas people occupying rivers or coastlines still capture sirenians for food and other uses oil

bones for carving leather In addition disruption erosion or complete loss of sirenian habitat occurs because of dredge and fill coastal run off chemical pollution and damage from boat propellers Sirenian Conservation features contributions from an international group of scientists who are working to address the many challenges to manatee and dugong food supply environment reproduction and survival They share stories of programs that rescue rehabilitate release and monitor these animals offer reports on practical replicable and cost effective management techniques and summarize current research strategies

Conservation Monique Borgerhoff Mulder, Peter Coppelillo, 2018-06-05 Nearly 90 percent of the earth's land surface is directly affected by human infrastructure and activities yet less than 5 percent is legally protected for biodiversity conservation and even most large protected areas have people living inside their boundaries In all but a small fraction of the earth's land area then conservation and people must coexist Conservation is a resource for all those who aim to reconcile biodiversity with human livelihoods It traces the historical roots of modern conservation thought and practice and explores current perspectives from evolutionary and community ecology conservation biology anthropology political ecology economics and policy The authors examine a suite of conservation strategies and perspectives from around the world highlighting the most innovative and promising avenues for future efforts Exploring highlighting and bridging gaps between the social and natural sciences as applied in the practice of conservation this book provides a broad practically oriented view It is essential reading for anyone involved in the conservation process from academic conservation biology to the management of protected areas rural livelihood development to poverty alleviation and from community based natural resource management to national and global policymaking

Agroforestry and Biodiversity Conservation in Tropical Landscapes Götz Schroth, Gustavo A. B. da Fonseca, Celia A. Harvey, Claude Gascon, Heraldo L.

Vasconcelos, Anne-Marie N. Izac, 2013-03-22 Agroforestry the practice of integrating trees and other large woody perennials on farms and throughout the agricultural landscape is increasingly recognized as a useful and promising strategy that diversifies production for greater social economic and environmental benefits Agroforestry and Biodiversity Conservation in Tropical Landscapes brings together 46 scientists and practitioners from 13 countries with decades of field experience in tropical regions to explore how agroforestry practices can help promote biodiversity conservation in human dominated landscapes to synthesize the current state of knowledge in the field and to identify areas where further research is needed Agroforestry and Biodiversity Conservation in Tropical Landscapes is the first comprehensive synthesis of the role of

agroforestry systems in conserving biodiversity in tropical landscapes and contains in depth review chapters of most agroforestry systems with examples from many different countries It is a valuable source of information for scientists researchers professors and students in the fields of conservation biology resource management tropical ecology rural development agroforestry and agroecology **African Rain Forest Ecology and Conservation** William Weber, Lee J. T. White, Lisa Naughton-Treves, Amy Vedder, 2001-01-01 Extending from west Africa to Madagascar from the vast lowland Congo Basin to the archipelago of forest islands on its eastern rim the African rain forest is surpassed in size only by the Amazon This book sheds light on the current efforts to understand and conserve the African rain forest an area in need of urgent action to save its biological wealth cultural heritage and economic potential Written by conservation scientists and practitioners based in the African rain forest the book offers a multidisciplinary perspective that integrates many biological and social sciences Early chapters trace the forces from paleoecological factors to recent human actions that have shaped the African forest environment The next chapters discuss the dominant biological patterns of species ranging from the distinctive elephants gorillas and okapi to the less well known birds butterflies and amphibians Other chapters focus on how such different groups as hunter gatherers forest farmers bushmeat hunters recent immigrants and commercial foresters have used the forests Several authors stress the need for tighter links between research and conservation action The final section draws lessons from the collective experience of those working in an Africa wracked by political strife and economic hardship

Carnivore Conservation John L. Gittleman, 2001-06-28 Carnivores are the focus of intense attention and resources in conservation biology It is often argued that because carnivores are at the top of the food chain if they are protected then other taxa will also be afforded adequate protection Carnivores are also charismatic and compete with humans for dwindling space and environmental resources In the past 10 years theoretical and empirical studies on carnivores have developed very quickly This volume reviews and summarises the current state of the field describes limitations and opportunities for carnivore conservation and offers a conceptual framework for future research and applied management As such it will be of interest to students and researchers of conservation biology mammalogy animal behaviour ecology and evolution

Deforestation Around the World Paulo Moutinho, 2012-03-30 Deforestation and forest degradation represent a significant fraction of the annual worldwide human induced emission of greenhouse gases to the atmosphere the main source of biodiversity losses and the destruction of millions of people's homes Despite local regional causes its consequences are global This book provides a general view about deforestation dynamics around the world incorporating analyses of its causes impacts and actions to prevent it Its 17 Chapters organized in three sections refer to deforestation impacts on climate soil biodiversity and human population but also describe several initiatives to prevent it A special emphasis is given to different remote sensing and mapping techniques that could be used as a source for decision makers and society to promote forest conservation and control deforestation **Parrots** Noel F.
