Covenantal Biomedical Ethics for Contemporary Medicine James J. Rusthoven, 2014-04-29 Principles based biomedical ethics has been a dominant paradigm for the teaching and practice of biomedical ethics for over three decades Attractive in its conceptual and linguistic simplicity it has also been criticized for its lack of moral content and justification and its lack of attention to relationships This book identifies the modernist and postmodernist worldviews and philosophical roots of principlism that ground the moral minimalism of its common morality premise Building on previous work by prominent Christian bioethicists an alternative covenantal ethical framework is presented in our contemporary context Relationships constitute the core of medicine and understanding the ethical meaning of those relationships is important in providing competent and empathic care While the notion of covenant is articulated through the richness of meaning taught in the Christian Scriptures covenantal commitment is also appreciated in Islamic Jewish and even pagan traditions as well In a world of increasing medical knowledge and consequent complexity of care such commitment can help to resist enticements toward the pursuit of self interest It can also improve relationships among caregivers each of whose specific expertise must be woven into a matrix of care that constitutes optimal medical practice for each vulnerable and needy patient

Forthcoming Books Rose Arny, 2002-02 *Suffering and Bioethics* Ronald M. Green, Nathan J. Palpant, 2014-08-01 Long before it cured disease medicine aimed to relieve suffering but despite that precedence the relief of suffering often takes a back seat in today's biomedical research and treatment Modern bioethics too has been slow to come to terms with suffering Attention to ethical quandaries has sometimes displaced attention to the experience of patients This book seeks to place

suffering at the center of bioethical thinking once again Among the questions its contributors explore are What is the meaning of suffering How does it relate to pain If there can be pain without suffering can there be suffering without pain Does suffering require advanced cognitive abilities Can animals suffer Many believe that we have strong obligations to relieve or minimize suffering what are the limits of these obligations Does the relief of suffering justify the termination of a patient's life as proponents of euthanasia maintain What is the bearing of suffering on the cherished bioethical principle of autonomy Can suffering impair a patient's ability to make reasoned choices To what extent must the encounter with suffering be an important component of medical education Do religious traditions ever move from efforts to explain and relieve suffering to positions that justify and promote it The aim of this book is to undertake a new foray into this foreign territory of suffering With a foreword by the distinguished bioethicist Daniel Callahan its twenty two chapters authored by leading scholars in science and bioethics are organized so as to examine suffering in its biological psychological clinical religious and ethical dimensions

Procreative Ethics Fritz Oehlschlaeger, 2010-01-01 Procreative Ethics addresses questions at the beginning of life from a point of view that is alternatively philosophical and Christian The author seeks to defend philosophically some positions taken partly on Christian grounds while also trying to make the implications of Christian convictions intelligible to those who do not necessarily share those convictions The author positions himself neither as a moral friend nor moral stranger preferring instead the role of moral acquaintance to his audience From that position the goal is to find areas of fruitful agreement while clarifying differences that may lead to truer reconciliations further on in the conversation The book opens with an attempted natural law defense of artificial contraception devotes four chapters to criticism of current defenses of abortion and then takes up in six remaining chapters such matters as genetic enhancement of children the justice or injustice of genetic revision the harm conundrum or non identity problem designing for disability and reproductive cloning

Journal of the Society of Christian Ethics, 2008

Bioethics Arthur B. LaFrance, 2006 This casebook begins by defining an ethical community and membership within that community follows with the role of the individual focuses then on the patient provider relationship and closes with bioethical choices The essential premise is that humans must exist in relation to each other and do so as biological beings The central questions then are how do we assert and respect ourselves as individuals and what claims do our communities have upon us Surprisingly there is a large body of caselaw much of it from the Supreme Court dealing with these issues That is the point of this casebook As so Cruzan and Griswold and Casey as well as a number of less familiar cases appear recast for their bioethical significance A number of new issues are also explored such as memory and emotion and physical integrity and sexual predators This new edition of Bioethics Health Care Human Rights and the Law includes the following coverage Reproductive issues of abortion surrogacy and cloning Identity issues of gender change family and same sex marriage Midlife issues such as transplants and tissue donation harvesting End of life issues including persistent vegetative states and assisted death Extensive coverage of the

patient provider relationship including informed consent conflicts of interest confidentiality competence and medical experimentation and Coverage of issues such as status of nonequals e g prisoners and incompetents and the undead e g anencephalics testing conscience and dissent and public health matters e g tobacco and alcohol and discussion of the way society should respond
