CONSTELLATIONS is a beautifully illustrated fascinating guide to all 88 constellations including an illustrated star map for each. In CONSTELLATIONS award winning astronomy writer Govert Schilling takes us on an unprecedented visual tour of all 88 constellations in our night sky. Much more than just a stargazer's guide, CONSTELLATIONS is a complete history of astronomy as told by Schilling through the lens of each constellation. The book is organized alphabetically by constellation. Profiles of each constellation include basic information such as size, visibility, and number of stars, as well as information on the discovery and naming of the constellation and associated lore. Beyond details about the constellation itself is information about every astronomical event that took place or discovery made in the vicinity of the constellation. In the constellation of Cygnus the Swan we encounter the location of the first confirmed black hole. A stop at Gemini the Twins is a chance to say hello to the dwarf planet Pluto and in Orion the hunter we find the location of the first identified gamma ray burst. Stunning star maps throughout the book by acclaimed star mapmaker Wil Tirion show us the exact location of every constellation, the details of its structure, as well as its surrounding astronomical neighbors.
