Constitution And World Organization:

Evolving Constitutions of International Organizations Tetsuo Sato, 2023-09-14 This book analyzes the law creating process relating to the interpretation of constituent instruments of international organizations This topic is one of the key issues concerning the structures and activities of international organizations It differs from other books in the field by suggesting that under the influences of the inherent dynamism of international organizations the interpretative framework of their constituent instruments is not the same as that of ordinary treaties It also concludes that the interpretation of the constituent instruments of international organizations deviates from the interpretative framework regulated by the law of treaties as codified by the Vienna Convention on the Law of Treaties The book will be of prime interest to academics in the fields of international law and international organization and treaty law

UN Security Council Reform and the Right of Veto Bardo Fassbender, 1998-04-28 Analyse af FN's sikkerhedsråd og en reform af dette **The Oxford Handbook of International Organizations** Jacob Katz Cogan, Ian Hurd, Ian Johnstone, 2016 This text provides an authoritative account of the law and politics of international organisations. Research Handbook on the Law of International Organizations Jan Klabbers, Asa Wallendahl, 2011-05 This pioneering Research Handbook with contributions from renowned experts provides an overview of the general doctrines making up the law of international organizations. The approach of this book is taken from a novel perspective that of the tension between functionalism and constitutionalism. In doing so this Handbook presents not only practically relevant information but also provides a tool for understanding the ways in which international organizations work. It has separate chapters on specific constitutional topics and on two specific organizations the EU and the UN. Research Handbook on the Law of international Organizations will be of particular interest to academics and graduate students in the fields of international law, international politics and international relations.

The Constitution and World Organization Edward Samuel Corwin, 1970 *International Organizations, Constitutional Law, and Human Rights* John S. Gibson, 1991-09-30 Since World War II remarkable progress has been made toward establishing more effective international laws and organizations to reduce opportunities for confrontation and conflict and to enhance the pursuit of security and well being. This book offers a detailed record of that progress as well as its meaning for our times and those ahead. Taking a historical, theoretical and case study approach John Gibson provides the reader with a broad understanding of how international organizations evolved to serve the interests of their member states, how the constitutional charters of organizations provide a coherent statement of goals and means to goals and how these organizations are assuming increasing authority in the international system. The work traces the progression of international constitutional and human rights law with an emphasis on the past 45 years. In the first part Gibson discusses the historic processes of political relations and mutual reliance, the evolution of these patterns through World War II, the subsequent history of the United Nations, the prime goals of international constitutional law and the organizations' range of authority from the high state to the supra organization level. Part two offers a case study of the progression of international human rights law. Separate chapters trace the history of human rights in religion and philosophy and the role of the state in international law while the concluding chapter on the United Nations Commission on Human Rights demonstrates how organizations actually function. This book will be a valuable resource for courses in international relations and international law as well as an important addition to academic and professional libraries.

The United Nations Charter as the Constitution of the International

Community Bardo Fassbender, 2009 The a eoconstitutionalizationa of international law is one of the most intensely debated issues in contemporary international legal doctrine The term is used to describe a number of features which distinguish the present international legal order from a oeclassicala international law in particular its shift from bilateralism to community interest and from an inter state system to a global legal order committed to the well being of the individual person The author of this book belongs to the leading participants of the constitutionalization debate He argues that there indeed exists a constitutional law of the international community that is built on and around the Charter of the United Nations In this book he explains why the Charter has a constitutional quality and what legal consequences arise from that characterization

Membership in International Organizations Gerd Droesse, 2019-12-19 This book proposes that fundamental concepts of institutional law need to be rethought and revised Contrary to conventional wisdom international organizations do not need to have members and the members do not need to be states and international organizations Private sector entities may for instance also be full members Furthermore international organizations do not need to possess international legal personality nor is their autonomy a corollary of their personality Moreover the notion of subject of international law also needs to be reconsidered and the very concepts and definitions of intergovernmental organization and international organization need to change and be defined in a wider manner In this publication the legal implications of membership are analyzed and a new analytical framework for international organizations is proposed The argument is propounded that the power of creation of new organizations has passed over to international organizations and other entities while an outlook on future development is also presented Dr Gerd Droesse is a recognized specialist in institutional law international administrative law complex institutional and financial policy matters and corporate governance issues with over 30 years of experience in working for international organizations in senior and management positions He was the Legal Counsel Acting General Counsel of the Green Climate Fund and assisted the World Green Economy Organization as General Counsel in its transition to a new type of intergovernmental organization *Decisions and Orders of the National Labor Relations Board*

The Right to Food Guidelines, Democracy and Citizen Participation Katharine S. E. Cresswell Riol, 2016-11-10 It is now more than a decade since the Right to Food Guidelines were negotiated, agreed, and adopted internationally by states. This book provides a review of its objectives and the extent of success of its implementation. The focus is on the first key guideline: Democracy, good governance, human rights, and the rule of law, with an emphasis on civil society participation in global food governance. The five BRICS countries—Brazil, Russia, India, China, and South Africa—are presented as case studies representing major emerging economies; they blur the line between the Global North and South and exhibit different levels of human rights realisation. The book first provides an overview of the right to adequate food, accountability, and democracy and an introduction to the history of the development of the right to adequate food and the Right to Food Guidelines. It presents a historical synopsis of each of the BRICS states' experiences with the right to adequate food and an analysis of their related periodic reporting to the Committee on Economic, Social, and Cultural Rights, as well as a specific assessment of their progress in regard to the first guideline. The discussion then focuses on the effectiveness of the Right to Food Guidelines as both a policy-making and monitoring tool based on the analysis of the guidelines and the BRICS states.

Ailing in Place Michele Morrone, 2020-02-28 In *Ailing in Place*, Michele Morrone explores the relationship between environmental conditions in Appalachia and health outcomes that are too often ascribed to individual choices only. She applies quantitative data to

observations from environmental health professionals to frame the ways in which the environment as a social determinant of health leads to health disparities in Appalachian communities These examples these stories of place trace the impacts of water quality waste disposal and natural resource extraction on the health and quality of life of Appalachian people Public health is inextricably linked to place Environmental conditions such as contaminated water unsafe food and polluted air are as important as culture community and landscape in characterizing a place and determining the health outcomes of the people who live there In some places the state of the environment is a consequence of historical activities related to natural resources and cultural practices In others political decisions to achieve short term economic objectives are made with little consideration of long term public health consequences
