informally outside the courtroom Drawing on real life experiences of community mediation practices in British Columbia Canada the author explores informal justice as an event rendered possible by the fragmentation of justice under postmodern conditions He develops some of Foucault s ideas on governmentality to erect an analytical framework that does not view community mediation as necessarily empowering or an inevitable expansion of state control The analysis identifies how one might engage with current versions of community justice and yet avoid the political apathy that too often accompanies such criticism

The Ashgate Research Companion to Planning Theory Patsy Healey,2016-11-03 At a time of potentially radical changes in the ways in which humans interact with their environments through financial environmental and or social crises the raison d tre of spatial planning faces significant conceptual and empirical challenges This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces Through problematising planning itself the values which underpin planning and theory practice relations contributions make visible the limits of established planning theories and illustrate how by thinking about new issues or about issues in new ways spatial planning might be advanced both theoretically and practically There cannot be definitive answers to the conceptual challenges posed but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future A key question is not so much what planning theory is but what might planning theory do in times of uncertainty and complexity An underlying rationale is that planning theory and practice are intrinsically connected The Companion is presented in three linked parts issues which arise from an interactive understanding of the relations between planning ideas and the political institutional contexts in which such ideas are put to work key concepts in current theorising from mainly poststructuralist perspectives and what discussion on complexity may offer planning theory and practice

Decolonisation of Legal Knowledge Amita Dhanda, Archana Parashar, 2012-04-27 The premise of this book is that legal theory in general and critical legal theory in particular do not facilitate the identification of choices being made in the different facets of law whether in the enacting interpreting administering or theorising of law

Carole Pateman Terrell Carver, Samuel Chambers, 2013-03 Carole Pateman's writings have been innovative precisely for their qualities of engagement pursued at the height of intellectual rigour This book draws from her vast output of articles chapters books and speeches to provide a thematic yet integrated account of her innovations in political theory and contributions to the politics of policy making The editors have focused on work in three key areas Democracy Pateman's perspective is rooted in a practical perspective enquiring into and speculating about forms of participation over and above the traditional exclusions through which representative systems have been variously constructed over time Her work pushes hard on theorists and politicians who make easy assumptions about apathy and public opinion who bracket off the workplace and the home and who see politics only in partisan activity voter behaviour and governmental policy Women Pateman's innovative and still cited work on participation antedates the feminist revolution in political theory and many of the practical struggles that developed through the later 1970s While woman centred her concerns were always worked through larger conceptions of social class economic advantage power differentials liberal individualism and contracts including marriage Her feminism was innovative in political theory and within feminism itself As a feminist Pateman defies categorization and her concepts of the sexual contract and Wollstonecraft's dilemma are canonical Welfare Pateman's innovation here is an integration of welfare issues in particular the proposals for a basic income or for a capital stake into her broad but always rigorous conception of democracy This is argued through in terms of citizenship taken as the result of a social contract In that way Pateman puts liberalism itself through an imminent critique drawing in the practicalities and risks of life in late capitalist societies Her theory as always is political taking in neo liberal attacks on welfare states and the stark realities of international inequalities Pateman's career achievements in democratic and feminist theory are brought productively to bear on debates that would otherwise occur in more limited and less provocative academic and political contexts

The Popularization of Malthus in Early Nineteenth-Century England James P. Huzel, 2017-05-15 The political economist Thomas Robert Malthus 1766 1834 has gained increasing and deserved scholarly

attention in recent years As well as the republication of his works and letters a rich body of scholarship has been produced that enlightens our understanding of his thoughts and arguments Yet little has been written on the ways in which his message was translated to and interpreted by a popular audience Malthus first rose to prominence in 1798 with the publication of his Essay on the Principle of Population in which he blamed rising levels of poverty on the inability of Britain's economy to support its growing population His remedy to limit the number of children born to poor families outraged many social reformers most notably William Cobbett but found a ready audience in other quarters Harriet Martineau among others being a famous Malthusian advocate In this new study of Malthus and the impact of his writings James Huzel shows how by being both popularized and demonized he framed the terms of reference for debate on the problems of pauperism and became the beacon against which all proposals seeking to remedy the problem of poverty had to be measured It is argued that the New Poor Law of 1834 was deeply influenced by Malthusian ideals replacing the traditional sources of outdoor relief with the humiliation of the workhouse Dealing with issues of social economic and intellectual history this work offers a fresh and insightful investigation into one of the most influential though misunderstood thinkers of the late eighteenth and early nineteenth centuries and concludes that Malthus was perhaps even more important than Adam Smith and David Ricardo in fostering the rise of a market economy It is essential reading for all those who wish to reach a fuller understanding of how the tremendous social and economic upheavals of the Industrial Revolution shaped the development of modern Britain

Analysing Social Policy Greg Marston, Catherine McDonald, 2006-01-01 This book brings together leading international researchers to discuss governmental approaches to analysing social policies Analysing Social Policy expands the scope of social policy analysis using the insights from post Foucauldian scholarship on the art of governing in liberal democracies One of the main conclusions reached is that policy researchers need to pay much greater attention to the minutiae of policy reform and to the discursive and material ways in which power operates in policy change The chapters comprising this book are purposefully written in a clear accessible and reflective manner with each of the contributions empirically grounded drawing on social policy problems and practices in many countries ranging from North America to Europe to Australasia The editors address key concerns of both policy analysts as well as academic researchers attempting to locate appropriate theoretical frameworks to make sense of welfare state restructuring in the 21st century This book will appeal to researchers and research students in political science social policy social work and sociology through its demonstration of how to apply contemporary social theory to research problems It will also be of interest to policy scholars around the world who are involved in analysing the intersections of power politics and policy

Making a Difference in Theory Gert Biesta, Julie Allan, Richard Edwards, 2013-07-18 Making a Difference in Theory brings together original work from an international group of authors on the roles of theory in educational research and practice The book discusses the different roles theory plays can play and should play both from a historical perspective and in light of contemporary discussions and developments Particular

attention is paid to the question of whether there are or should be distinctively educational forms of theory and theorising. The double engagement with the theory question in education and the education question in theory and theorising provides original insights in what theory does might do or should do in educational research and practice. With contributions from internationally renowned authors in the field of educational theory research and practice, the book will be of value to academics, researchers and postgraduate students in education.

The Body Problematic Laura Hengehold, 2010-09-30. Late in life Foucault identified with the critical tradition of Kant, encouraging us to read both thinkers in new ways. Kant's Copernican strategy of grounding knowledge in the limits of human reason proved to stabilize political, social, scientific and medical expertise as well as philosophical discourse. These inevitable limits were made concrete in historical structures such as the asylum, the prison and the sexual or racial human body. Such institutions built upon and shaped the aesthetic judgment of those considered normal. Following Kant through all of Foucault's major works, this book shows how bodies functioned as problematic objects in which the limits of post-Enlightenment European power and discourse were imaginatively figured and unified. It suggests ways that readers in a neoliberal political order can detach from the imaginative schemes vested in their bodies and experiment normatively with their own security needs.

Public Health and Social Justice in the Age of Chadwick Christopher Hamlin, 1998-02-13. A revisionist account of the story of the foundations of public health in industrial revolution Britain.

The Planning Moment Sarah Blacker, Emily Brownell, Anindita Nag, Martina Schlünder, Sarah Van Beurden, 2024-05-07. Empires and their aftermaths were massive planning institutions in the past two hundred years; the natural and social sciences emerged at least in part as modes of knowledge production for imperial planning. Yet these connections are frequently under-emphasized in the history of science and its corollary fields. *The Planning Moment* explores the myriad ways plans and planning practices pervade recent global history. The book is built around twenty-seven brief case studies that explore the centrality of planning in colonial and postcolonial environments, relationships and contexts through a range of disciplines: the history of science, science and technology studies, colonial and postcolonial studies, urban studies and the history of knowledge. If colonialism made certain landscapes, populations and institutions legible while obscuring others, *The Planning Moment* reveals the frequently disruptive and violent processes of erasure in imperial planning by examining how common sense was produced and how the intransigence of planning persists long after decolonization. In recognizing the resistance and subversion that often met colonial plans, the book makes visible a range of strategies and techniques by which planning was modified and reappropriated and by which decolonial futures might be imagined.

The Making of the

Citizen-Worker Federico Tomasello, 2023-07-31 Over the course of the 19th century European societies started thinking of themselves as civilisations of work In the wake of the political and industrial revolutions labour as a human activity and condition gradually came to embody a general principle of order progress and governance How did work become so central to our systems of citizenship and social recognition The book addresses this question by considering the French context in the long transition between the 1789 and 1848 revolutions and focusing on a specific fragment of history in the early 1830s marked by a pandemic crisis and the first consequences of industrialisation It combines the analysis of both political institutions and social movements to retrace the rise of a labour based social contract revolving around the citizen worker as the quintessential subject of rights The first part of the book highlights the role played by the genesis of the modern social sciences and analyses it as a political process that established work as an object of governance and scientific investigation thus fostering pioneering measures of welfare centred on work conditions The second part focuses on the emergence of the concept of working class and the modern labour movement which structured the world of work as a collective political subject Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Power, Discourse and Victimage Ritual in the War on Terror Michael Blain, 2016-04-08 Blending concepts from dramatism such as victimage ritual with Foucault's approach to modern power and knowledge regimes this book presents a novel and illuminating perspective on political power and domination resulting from the global war on terrorism With attention to media sources and political discourse within the context of the global war on terror the author draws attention to the manner in which power elites construct scapegoats by way of a victimage ritual thus providing themselves with a political pretext for extending their power and authority over new territories and populations as well as legitimating an intensification of domestic surveillance and social control A compelling analysis of ritual rhetoric and political violence *Power Discourse and Victimage Ritual in the War on Terror* will be of interest to sociologists political theorists and scholars of media and communication concerned with questions of surveillance and social control political communication hegemony foreign policy and the war on terror
