General Principles and Sector-Specific Rules in European

Administrative Laws Giacinto della Cananea,Jean-Bernard Auby,2024-06-19 In the field of administrative law there is no systematic body of rules similar to those characteristic of European civil codes General principles are therefore of fundamental importance This volume the sixth in the series concerning the common core of European administrative laws explores this importance through two strands Firstly it examines in detail the relationship between general principles of law such as due process and sector specific rules established by legislative and regulatory provisions for example in licensing and disciplinary matters Several questions about the nature of general principles emerge through this analysis Are general principles about filling gaps Or do they have a foundational role because they give meaning to the values that are shared by European legal systems such as respect for the rule of law and for fundamental rights Secondly this volume also explores the

interaction between commonality and diversity in European administrative law It considers whether there are shared standards of administrative conduct including the duty to give reasons or if there are fundamental differences with regard to non European legal systems such as that of China and Venezuela These questions are investigated through factual analysis based on a set of hypothetical cases which are discussed by national experts This book then scrutinizes these questions to determine how commonality and diversity have extended and interact with one another within and across legal systems both diachronically and synchronically over the course of a century It shows that there are both unexpected areas of agreement between the European legal systems notably concerning the right to be heard expressed by the maxim audi alteram partem and the duty to give reasons and there are also areas of disagreement for example as far as the right to remain silent vis vis the administration that is nemo tenetur se detegere is concerned
