Constitutional Protection Of Private Property And Freedom Of Contract:

Constitutional Protection of Private Property and Freedom of Contract Richard A. Epstein, 2013-10-15 First Published in 2000 This is a collection of essays that look at the Constitutional protection of private property and freedom of contract and forms part of the Liberty Property and Law series where the materials in this collection are drawn from many disciplines including economics law philosophy and political science Constitutional Protection of Private Property and Freedom of Contract Richard Allen Epstein, 2000 **Constitutional Environments and Economic Growth** Gerald W. Scully, 2014-07-14 In this provocative work Gerald Scully develops and empirically tests a theory about how a nation's constitutional setting affects its economic growth Modern growth theory links the rise in the standard of living to capital formation both physical and human and to technological progress and development economists continue to believe that the transformation of the less developed world cannot occur without massive government control of the economy Scully on the other hand maintains that material advancement is as much affected by the choice of the economic legal and political institutions under which people live and work as it is by resource endowment and technological progress Nothing in the neoclassical theory of growth considers the rules of the game under which capital is accumulated and innovation is made Redressing this neglect Scully proposes ways of measuring the economic civil and political freedom within a society's institutional framework and he reveals that freedom or the lack thereof powerfully and demonstrably influences not only economic progress but also income distribution Politically open societies grow at nearly three times the rate of those where freedom is more circumscribed and they also have a more equitable distribution of income Finally Scully measures the effect of the size of the state on economic progress showing that the larger the amount of government expenditures out of gross domestic product the lower the rate of economic progress Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Encyclopedia of Business Ethics and Society Robert W. Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of business in society The Fall and Rise of Freedom of Contract F. H. Buckley, 1999-08-27 Declared dead some twenty five years ago the idea of freedom of contract has enjoyed a remarkable intellectual revival In *The Fall and Rise of Freedom of Contract* leading scholars in the fields of contract law and law and economics analyze the new interest in bargaining freedom The 1970s was a decade of regulatory triumphalism in North America marked by a surge in consumer securities and environmental regulation Legal scholars predicted the death of contract and its replacement by regulation and reliance based theories of liability Instead we have

witnessed the reemergence of free bargaining norms This revival can be attributed to the rise of law and economics which laid bare the intellectual failure of anticontractarian theories Scholars in this school note that consumers are not as helpless as they have been made out to be and that intrusive legal rules meant ostensibly to help them often leave them worse off Contract law principles have also been very robust in areas far afield from traditional contract law and the essays in this volume consider how free bargaining rights might reasonably be extended in tort property land use planning bankruptcy and divorce and family law This book will be of particular interest to legal scholars and specialists in contract law Economics and public policy planners will also be challenged by its novel arguments Contributors Gregory S Alexander Margaret F Brinig F H Buckley Robert Cooter Steven J Eagle Robert C Ellickson Richard A Epstein William A Fischel Michael Klausner Bruce H Kobayashi Geoffrey P Miller Timothy J Muris Robert H Nelson Eric A Posner Robert K Rasmussen Larry E Ribstein Roberta Romano Paul H Rubin Alan Schwartz Elizabeth S Scott Robert E Scott Michael J Trebilcock Constitutionalism and the Economy in Africa Charles Manga Fombad, Nico Steytler, 2022 This volume looks at the relationship between constitutional law and the African political economy It tackles a range of issues from the impact of globalization to the State's role in the economy and the constitutional foundations for land and natural resources exploitation regulation and protection

Barton Starr, 1988-09-01 The United States Constitution is the oldest written constitution in the world But what were its

origins Is it a living organism or as the only alternative a dead one What influence if any has the U S Constitution had on Asian countries Twenty scholars from around the world set out to pose answers to these questions The result of their efforts is this book which looks at the U S Constitution from a global perspective At times reinforcing existing knowledge at times breaking new ground the authors provide new insights into the role the U S Constitution has played in the development of governments in the two hundred years since its inception in 1787

The Politics of Crises - The Crisis of Politics in Central and Eastern Europe Fanni Tanács-Mandák, Csaba Erdős, 2025-08-18 The field of political science has been significantly shaped by the crises of the last decade particularly in Central and Eastern Europe The migration crisis of 2014 2015 the COVID 19 pandemic of 2020 2021 and the ongoing conflict between Russia and Ukraine have each posed unique challenges to nation states altering the dynamics of political institutions and actors These crises have highlighted the varying responses of European national governments from the welcoming Willkommenskultur to the construction of border fences during the migration crisis to the diverse legal frameworks adopted during the pandemic The escalation of the Russian Ukrainian conflict has further complicated these dynamics prompting different governmental responses Despite these varied approaches a common thread is the necessity for political institutions to interpret and respond to crises often requiring a departure from traditional decision making processes Current research has begun to explore these responses yet there remains a gap in understanding the full impact of these crises on inter institutional relations and the recalibration of policy
