H. Shah, 2017-10-26 Shah uncovers the complex interaction between constitutional law religion and politics in three key plural societies in Asia **The Oxford Handbook of Empirical Legal Research** Peter Cane, Herbert Kritzer, 2012-05-17 The empirical study of law legal systems and legal institutions is widely viewed as one of the most exciting and important intellectual developments in the modern history of legal research Motivated by a conviction that legal phenomena can and should be understood not only in normative terms but also as social practices of political economic and ethical significance empirical legal researchers have used quantitative and qualitative methods to illuminate many aspects of law s meaning operation and impact In the 43 chapters of *The Oxford Handbook of Empirical Legal Research* leading scholars provide accessible and original discussions of the history aims and methods of empirical research about law as well as its achievements and potential The Handbook has three parts The first deals with the development and institutional context of empirical legal research The second and largest part consists of critical accounts of empirical research on many aspects of the legal world on criminal law civil law public law regulatory law and international law on lawyers judicial institutions legal procedures and evidence and on legal pluralism and the public understanding of law The third part introduces readers to the methods of empirical research and its place in the law school curriculum **Constitutional Review in Europe** Maartje De Visser, 2014-07-18 Constitutions serve to delineate state powers and enshrine basic rights Such matters are hardly uncontroversial but perhaps even more controversial are the questions of who should uphold s the Constitution and how constitutional review is organised These two questions are the subject of this book by Maartje de Visser which offers a comprehensive comparative analysis of how 11 representative European countries answer these questions as well as a

critical appraisal of the EU legal order in light of these national experiences Where possible the book endeavours to identify Europe s common and diverse constitutional traditions of constitutional review The raison d tre jurisdiction and composition of constitutional courts are explored and so too are core features of the constitutional adjudicatory process Yet this book also deliberately draws attention to the role of non judicial actors in upholding the Constitution as well as the complex interplay amongst constitutional courts and other actors at the national and European level The Member States featured are Belgium the Czech Republic Finland France Germany Italy Hungary the Netherlands Spain Poland and the United Kingdom This book is intended for practitioners academics and students with an interest in European constitutional law

Constitutional Comparison François Venter,2021-07-26 In our globalized era it has become impossible to deal effectively with constitutional law and related subjects such as fundamental rights administrative law and political science without knowledge of foreign systems A wealth of literature is available on practically all constitutional systems and the intricacies of their application This however presents the constitutionalist with a formidable problem Which foreign systems should I explore in order to make relevant comparisons and how should I go about it This book addresses the core problems of comparability and appropriate comparative methodology in the realm of contemporary constitutionalism The outcome is however not mere theorizing Most of the text is devoted to an incisive application of the chosen comparative method to four geographically historically and culturally divergent but thoroughly comparable constitutional systems In the course of the comparative exercise contemporary constitutional dogma and constitutional mechanics are analyzed and explained in many instances in their historical contexts making the book itself a useful source of comparative and historical information

Legal Reform in Post-Communist Europe Stanislaw J. Frankowski,Paul B. Stephan III,2023-10-20 This book represents an effort to assess the unprecedented political economic and social reforms that have swept through Central and Eastern Europe in the five years since the collapse of Communism The dismantling of the Warsaw Pact the Council for Mutual Economic Assistance the Communist Party apparatus and the various manifestations of the nomenklatura political control system have meant different things in different countries but throughout the region we have witnessed a struggle to replace an authoritarian one party political system and a command economy with something resembling Western style constitutional democracy and market economics Accompanying this struggle have been attempts to transform the legal structure of these countries It is no exaggeration to claim that lawyers and particularly legal scholars have played a central role in the struggle for reform in post communist Europe As conceived by its principal organizer and editor Stanislaw Frankowski this study gives these scholars an opportunity to express their perceptions of the success achieved to date and the work still remaining A secondary goal is to expose a Western audience to the views and insights of legal scholars who have worked within the Central and Eastern

European traditions The four parts of this book reflect the principal areas in which legal reform seemed essential First comes the reconstitutionalization of the societies in question which means above all else the elimination of single party politics and the notion of unity of powers Then comes the creation of the legal institutions that would make possible a civil society under law Then the institutions that moderate and control the uses of state power to discipline and punish persons that have transgressed the society's norms Finally there is the question of how law reform had dealt with industrial democracy and the anticipated transformation of the workplace

Covenant and Civil Society Daniel Judah Elazar, Part 4 of this important series considers issues of communal solidarity on a postmodern basis Elazar traces the transition from the covenanted commonwealth of the Protestant Reformation to the civil society of the modern epoch and explores the covenant's role in the modern statist era and the development of modern democracy Elazar concludes with an examination of the present and future of covenantal thought

Transitional Justice and Socio-Economic Rights in Zimbabwe Prosper Maguchu, 2019-07-26 This book addresses the issue of corruption as a socio economic rights concern at a national level Zimbabwe's widespread corruption inhibited its development in all aspects It weakened institutions especially those called upon to arbitrate political and economic contests leading to potential human rights violations However Zimbabwe saw a change of government in November 2017 Due to this there seemed to be an opening to work towards reform in relation to the anti corruption architecture Specifically the new era provides an opportunity to review how accountability mechanisms including but not limited to amnesties truth commissions institutional reforms and prosecutions can address corruption as a socio economic rights violation As the new government still tries to address competing priorities many moving parts and various matrixes this volume in the International Criminal Justice Series provides a timely frame for revisiting the debate and developing the strategic thinking regarding transitional justice options in Zimbabwe It will be of great interest to practitioners policy makers scholars and students in the fields of anti corruption socio economic and human rights and transitional justice Prosper Maguchu is Visiting Assistant Professor at the Centre for the Politics of Transnational Law of the Vrije Universiteit Amsterdam The Netherlands

Political Repression Linda Camp Keith, 2011-11-29 The world seems to have reached agreement on a set of ideals regarding state human rights behavior and the appropriate institutions to promote and protect those ideals The global script for state legitimacy calls for a written constitution or the equivalent with an embedded bill of rights democratic processes and institutions and increasingly a judicial check on state power to protect human rights While the progress toward universal formal adherence to this global model is remarkable Linda Camp Keith argues that the substantive meaning of this progress is much less clear In *Political Repression* she seeks to answer two key questions Why do states make formal commitments to democratic processes and human rights What effect do these commitments have on actual state behavior especially political repression The book begins with a thorough exploration of a variety of tools of state

repression and presents evidence for substantial formal acceptance of international human rights norms in constitutional documents as well as judicial independence Keith finds that these institutions reflect the diffusion of global norms and standards the role of transnational networks of nongovernmental organizations and an electoral logic in which regimes seek to protect their future interests Economic liberalism on the other hand decreases the likelihood that states adopt or maintain these provisions She demonstrates that the level of judicial independence is influenced by constitutional structures and that levels of judicial independence subsequently achieved in turn diminish the probability of state repression of a variety of rights She also finds strong evidence that rights provisions may indeed serve as a constraint on state repression even when controlling for many other factors
