Constraints and Impacts of Privatisation V. V. Ramanadham, 2002-03-11 This book contains papers on some 25 countries written by experts directly connected with privatisation either as academics or as policy makers and practitioners with a comparative review at the end by the editor It highlights the major factors in the success and the failings of privatisation attempts in different countries in Europe America Latin America Africa Asia and Australasia In particular there are studies on the evolving experience of transformation to free market economy in the former socialist countries of Eastern Europe

The Politics of Privatisation and Trade Union Mobilisation Pablo Ghigliani, 2010 This is a comparative study of how workers and their unions respond to privatisation Drawing upon research from a variety of disciplines the author examines the push toward privatisation in diverse national settings its profound impact on organised labour and the often innovative responses of workers and their unions in the affected industries By means of a detailed analysis of the privatisation of the electricity industries in the United Kingdom and Argentina and the various initiatives of workers and their trade unions in these two countries this book offers an engaging comparative case study that sheds new light on key issues in contemporary labour studies the strategic choices available to workers and their organisations when faced with the radical restructuring of their industries the types of resources available to trade unions and how they are mobilised and the impact of widespread worker unrest on their organisations This book also provides fresh insight into the use of mobilisation theory in the field of labour studies The author employs mobilisation theory to make sense of worker and trade union responses to privatisation and he argues that this theoretical framework can be useful for cross national comparisons

Public Administration and Development United Nations, 1997 This publication addresses the complex questions of improving accountability responsiveness and legal frameworks in the public sector particularly in developing countries The topics covered include the role of the State and the future of public services faced with the problems of transition and development the institutional implications of changing policy management the role and scope of public administration in Central and Eastern European countries recent changes in Asian public service in a context of privatisation a Latin American view of urban transportation as a socio economic policy what form of administration for what State The annexes include the Resolution adopted by the General Assembly UN on Public Administration and Development Highlights of the General Assembly Resumed Session on Public Administration and Development and the historical background of the IIAS and the UN

Measurement of Fiscal Impact International Monetary Fund, 1988-06-16 This paper describes methodological issues pertaining to measurement of fiscal impact The fiscal deficit is under any circumstances a crude tool for assessing the impact of fiscal policy on the economy This paper also analyzes various ways in which the conventional definition of the fiscal deficit is affected by high rates of inflation It has shown that as the rate of inflation rises the picture emerging from the conventional measure may under certain circumstances become somewhat blurred since the conventional measure may magnify the size of the fiscal adjustment that a country needs In fact the size of the debt service that compensates bondholders for the reduction in the real value of their assets arising from inflation should be made explicit so as to indicate that part of the deficit whose impact depends mainly on portfolio decisions regarding the public's demand for government bonds and on the potential effects of these bonds on the monetary and liquidity conditions of the economy

Transition and Economics Gérard Roland, 2000 The transition from socialism to capitalism in former socialist economies has transformed the economic structure This book provides an overview of research on the issues raised by the shift from collective to private ownership

Baltas, George Demopoulos, Joseph Hassid, 2012-12-06 Economic integration is the most noteworthy development in international economic policy at the end of this century Enthusiasm for the European Union has been infectious Yet there are many aspects for the EU that still remain obscure and which warrant further careful scrutiny The subject of this book is the examination of the inherent economic and political inefficiencies in the transition process of Central and East European countries which are apt to slow down its pace divert it from its proper course and in some cases even endanger its sustainability The authors of the contributions in this book economists and political scientists investigate the applicability of the hypothesis of mutual benefits resulting from countries in transition becoming open to international trade and investment
