Muñiz Castro, 2024-11-01 This Dictionary consists of some 100 000 terms in both Spanish and English drawn from the whole range of business finance and banking terminology Over 45 subject areas are covered compiled by a team of international terminologists Contrastive Studies in Construction Grammar Hans Christian Boas, 2010 The papers in this volume provide a contrastive application of Construction Grammar By referencing a well described constructional phenomenon in English each paper provides a solid foundation for describing and analyzing its constructional counterpart in another language This approach shows that the semantic description including discourse pragmatic and functional factors of an English construction can be regarded as a first step towards a tertium comparationis that can be employed for comparing and contrasting the formal properties of constructional counterparts in other languages

Thus the meaning pole of constructions should be regarded as the primary basis for comparisons of constructions across languages the form pole is only secondary This volume shows that constructions are viable descriptive and analytical tools for cross linguistic comparisons that make it possible to capture both language specific idiosyncratic properties as well as cross linguistic generalizations

Discourse Constructions in English Aneider Iza Erviti,2021-05-29 This book emphasizes the advantages of examining discourse connectivity from a constructionist perspective and highlights the role of discourse configurations in the construction of meaning The research contained advances the field of cognitive classification and categorization of discourse constructions The text is a great improvement in the discourse analysis literature since it uniquely clarifies the subtleties of meaning between different discourse markers that are frequently treated as equivalent by lexicographers It is unique in being the first contribution to the creation of a Constructicon at the discourse level and it fills an important gap within cognitively oriented constructionist accounts that have mostly restricted their analyses to argument structure and illocutionary constructions This yearbook appeals to students and researchers working within corpus linguistics
