## **Constructing Global Civil Society Morality And Power In International Relations:**

Constructing Global Civil Society D. Chandler, 2004-09-13 Global Civil Society is a crucial concept in International Relations today used as both a description of new mechanisms of non state actor and NGO engagement in international policy making and as a normative political project of international change David Chandler critically investigates the claims made by the advocates of global civil society analyzing the limits of the concept as a way of describing actual policy processes and the political dynamics behind the search for an international source of collective ethical values and social change

Constructing Global Civil Society David Chandler, 2004-11-27 Chandler investigates the claims made by the advocates of global civil society analyzing the limits of the concept as a way of describing actual policy processes the political dynamics behind the search for an international source of collective ethical values social change *Global Civil Society* Gideon Baker, David Chandler, 2004-11-23 For many commentators global civil society is revolutionising our approach to global politics as new non state based and border free expressions of political community challenge territorial sovereignty as the exclusive basis for political community and identity This challenge from below to the nation state system is increasingly seen as promising nothing less than a reconstruction or a re imagination of world politics itself Whether in terms of the democratisation of the institutions of global governance the spread of human rights across the world or the emergence of a global citizenry in a worldwide public sphere global civil society is understood by many to provide the agency necessary for these hoped for transformations Global Civil Society asks whether this idea is such a qualitatively new phenomenon after all whether the transformation of the nation state system is actually within its reach and what some of the drawbacks might be

*A Foucauldian Approach to International Law* Leonard M. Hammer, 2016-03-23 Foucault's challenging view of power and knowledge as the basis for interpreting the international system forms the central themes of this book As the application of international law expands and develops this book considers how Foucault's approach may create a viable framework that is not beset by ontological issues With International law essentially stuck within an older framework of outmoded statist approaches and overly broad understanding of the significance of external actors such as international organizations current interpretations are either rooted in a narrow attempt to demonstrate a functioning normative structure or interpret developments as reflective of some emerging and somewhat unwieldy ethical order This book therefore aims to ameliorate the approaches of a number of different schools within the disciplines of international law and international relations without being wedded to a single concept Current scholarship in international law tends to favour an unresolved critique a utopian vision or to refer to other disciplines like international relations without fully explaining the significance or importance of taking such a step This book analyses a variety of problems and issues that have surfaced within the international system and provides a framework for consideration of these issues with a view towards accounting for ongoing developments in the international arena The Oxford Handbook of Peaceful Change in International Relations T. V. Paul, Deborah Welch

Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors evaluate the peaceful change that occurred in the world s key regions In the final part the editors address prospective research agenda and trajectories on this important subject matter Keywords Peaceful Change War Security International Relations Theory Sources of Change Systemic Theory Realism Liberalism Constructivism Critical Theories     The Liberal Peace and Post-War Reconstruction Roger MacGinty, Oliver Richmond, 2013-09-13 This critical and comparative book is comprised of arguments for and against the dominant western style of peace interventions and post war reconstruction that has been applied around the world It examines and assesses the nature of the peace that these have achieved or offer for the future     **The United States, the Soviet Union and the Geopolitical Implications of the Origins of the Cold War** Nicolas Lewkowicz, 2018-10-30 The United States the Soviet Union and the Geopolitical Implications of the Origins of the Cold War 1945 1949 describes how the United States and the Soviet Union deployed their hard and soft power resources to create the basis for the institutionalization of the international order in the aftermath of World War Two The book argues that the origins of the Cold War should not be seen from the perspective of a magnified spectrum of conflict but should be regarded as a process by which the superpowers attempted to forge a normative framework capable of sustaining their geopolitical needs and interests in the post war scenario The United States the Soviet Union and the Geopolitical Implications of the Origins of the Cold War 1945 1949 examines how the use of ideology and the instrument of political intervention in the spheres of influence managed by the superpowers were conducive to the establishment of a stable international order It postulates that the element of conflict present in the early period of the Cold War served to demarcate the scope of manoeuvring available to each of the superpowers and studies the notion that the United States and the Soviet Union were primarily interested in establishing the conditions for the accomplishment of their

vital geostrategic interests This required the implementation of social norms imposed in the respective spheres of influence a factor that provided certainty to the spectrum of interstate relations after the period of turmoil that culminated with the onset of World War Two

Rethinking Democracy Promotion in International Relations Jessica Schmidt, 2015-08-20 This book traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies Democracy promotion is widely considered to constitute a hypocritical and failed grand international narrative of the 1990s and has allegedly been replaced by other more pressing and academically more captivating concerns such as conflict management statebuilding and climate change This book challenges this position and argues that the core notions of democracy promotion such as empowerment inclusion and responsiveness are a key concern of contemporary international policymakers Drawing on the work of Michel Foucault Hannah Arendt as well as John Dewey it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management statebuilding and climate change The central development the book observes is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and complex which accounts for democracy's current but neglected centrality This book will be of much interest to students of democracy intervention statebuilding global governance and IR in general

The Concert of Civilizations Jeremy Kleidosty, 2016-03-09 Are Western and Islamic political and constitutional ideas truly predestined for civilizational clash In order to understand this controversy The Concert of Civilizations begins by deriving and redefining a definition of constitutionalism that is suitable for comparative cross cultural analysis The rule of law reflection of national character and the clear delineation and limitation of governmental power are used as lenses through which thinkers like Cicero Montesquieu and the authors of The Federalist Papers can be read alongside al Farabi ibn Khaldun and the Ottoman Tanzimat decrees Bridging the civilizational divide is a chapter comparing the Magna Carta with Muhammad's Constitution of Medina as both documents can be seen as foundational within their traditions For the first time in political theory this text also provides a sustained detailed analysis of Khayr al Din al Tunisi's book The Surest Path which explains his fusion of Muslim and Western ideas in his writing of Tunisia's first modern constitution which is also the first constitution for a majority Muslim state Finally the book discusses the Arab Spring through a brief overview of the revolutions in Egypt Libya and Tunisia and offers some early thoughts about Tunisia's uniquely successful revolution

*Civil Society Regionalization in Southern Africa* Andréas Godsäter, 2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in

the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa

*Global Perspectives in the Geography Curriculum* Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world

in which they live A vital resource for teachers and student teachers alike *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself Politics Without Sovereignty Christopher Bickerton, Philip Cunliffe, Alexander Gourevitch, 2006-12-01 Written by leading scholars this volume challenges the recent trend in international relations scholarship the common antipathy to sovereignty The classical doctrine of sovereignty is widely seen as totalitarian producing external aggression and internal repression Political leaders and opinion makers throughout the world claim that the sovereign state is a barrier to efficient global governance and the protection of human rights Two central claims are advanced in this book First that the sovereign state is being undermined not by the pressures of globalization but by a diminished sense of political possibility Second it demonstrates that those who deny the relevance of sovereignty have failed to offer superior alternatives to the sovereign state Sovereignty remains the best institution to establish clear lines of political authority and accountability preserving the idea that people shape collectively their own destiny The authors claim that this positive idea of sovereignty as self determination remains integral to politics both at the domestic and international levels *Politics Without Sovereignty* will be of great interest to students and scholars of political science international relations security studies international law development and European studies

local environments but mostly due to problems of legitimacy of turning an ideal into a doctrine for action The aim of the book is to scrutinize assumptions about the value of democratization and marketization and realities on the ground by combining theoretical discussions with empirical evidence from key post conflict settings such as Iraq and Afghanistan These show the disparities that exist between the ideals and the reality of the liberal peace project as seen by external peacebuilders and domestic actors The book then proposes various alternatives and modifications to better accommodate local perspectives values and agency in attempts to forge a new consensus This book will be of great interest to students of peacebuilding peacekeeping statebuilding war and conflict studies international security and IR

*Agency in Transnational Memory Politics* Jenny Wüstenberg, Aline Sierp, 2020-07-01 The dynamics of transnational memory play a central role in modern politics from postsocialist efforts at transitional justice to the global legacies of colonialism Yet the relatively young subfield of transnational memory studies remains underdeveloped and fractured across numerous disciplines even as nascent boundary crossing theories on topics such as multi vocal traveling or entangled remembrance suggest new ways of negotiating difficult political questions This volume brings together theoretical and practical considerations to provide transnational memory scholars with an interdisciplinary investigation into agency the who and the how of cross border commemoration that motivates activists and fascinates observers

*Democracy* Roland Axtmann, 2007-05-22 Democracy Problems and Perspectives provides a critical review of the scholarly and political debates about democratic thought and of arguments about democratic practice On the basis of an interpretation of Immanuel Kant's political philosophy the book presents democracy as a regime type in which citizens who are united to give law rule themselves and where such self rule is exercised by citizens who embrace local and global patriotism In the course of developing this idea of democracy the book addresses issues such as human rights and their relationship to democracy the policy of the global promotion of human rights and democracy sovereignty and the nation state popular sovereignty and multicultural citizenship and cosmopolitanism and cosmopolitan democracy The book will stimulate controversial discussions about the varieties of democratic imaginations and visions past and present as well as the future of democracy in the current stage of globalisation

### **Visual Securitization**

Alice Massari, 2021-05-18 This open access book offers an innovative account of how relief organizations visual depiction of Syrian displacement contributes to reproduce and reinforce a securitized account of refugees Through visual analysis the book demonstrates how the securitization process takes place in three different ways First of all even if marginally it occurs through the reproduction of mainstream media and political accounts that have depicted refugees in terms of threats Secondly and more consistently through a representation of Syrian displaced people that despite the undeniable innovative aesthetic patterns focusing on dignity and empowerment continue to reinforce a visual narrative around refugees in terms of victimhood and passivity The reproduction of a securitized account takes also place through the dialectic between what is made visible in the pictures and what is not At the same time the book identifies visual glimmers and minor displacements in

the humanitarian discourse that have the potentiality to produce alternative discourses on refugees and displacement beyond the mainstream securitized ones By showing how relief organizations visual representation contributes to the securitization of the refugee issue this book provides a great resource to students and academics in migration visuality humanitarianism and securitization as well as social scientists and policy makers
