Constructing Inequality:

Constructing Inequality Raymond Case Kelly, 1993 Challenges prevailing theories about social inequality

Constructing Inequality in Multilingual Classrooms Luisa Martín Rojo, 2010-07-30 In her groundbreaking and innovative study the author takes us on a fascinating journey through some of Madrid's multilingual and multicultural schools and reveals the role played by linguistic practices in the construction of inequality through such processes as what she calls de capitalization and ethnicization Through a critical sociolinguistic and discourse analysis of the data collected in an ethnographic study the book shows the exclusion caused by monolingualizing tendencies and ideologies of deficit in education and society The book opens a timely discussion of the management of diversity in multilingual and multicultural classrooms both for countries with a long tradition of migration flows and for those where the phenomenon is relatively new as is the case in Spain This study of linguistic practices in the classroom makes clear the need to rethink some key linguistic concepts such as practice competence discourse and language and to integrate different approaches in qualitative research The volume is essential reading for students and researchers working in sociolinguistics education and related areas as well as for all teachers and social workers who deal with the increasing heterogeneity of our late modern societies in their work

Philosophy and the City Sharon M. Meagher, 2008-01-10 Using philosophical works from ancient Greece to contemporary times *Philosophy and the City* demonstrates both why philosophy matters to the city and how cities matter to philosophy The collection addresses questions that remain central to urban planning and everyday urban life such as What is a city What does it mean to be a good citizen By bringing various perspectives together Sharon M Meagher provides readers the opportunity to better understand key philosophical debates concerning not only social and political philosophy but also place and identity formation aesthetics philosophy of race and diversity and environmental philosophy **Regimes of Inequality**

Julia Lynch, 2020-01-02 Why can't politicians seem to make policies that will reduce social inequality even when they acknowledge that inequality is harmful **Model Building in Mathematical Programming** H. Paul Williams, 2013-01-18 The 5th edition of *Model Building in Mathematical Programming* discusses the general principles of model building in mathematical programming and demonstrates how they can be applied by using several simplified but practical problems from widely different contexts Suggested formulations and solutions are given together with some computational experience to give the reader a feel for the computational difficulty of solving that particular type of model Furthermore this book illustrates the scope and limitations of mathematical programming and shows how it can be applied to real situations By emphasizing the importance of the building and interpreting of models rather than the solution process the author attempts to fill a gap left by the many works which concentrate on the algorithmic side of the subject In this article H P Williams explains his original motivation and objectives in writing the book how it has been modified and updated over the years what is new in this edition and why it has maintained its relevance and popularity over the years <http://www.statisticsviews.com/details>

Feldman, 2018-07-05 One of the most troubling aspects of the politics of homelessness Leonard C Feldman contends is the reduction of the homeless to what Hannah Arendt calls the abstract nakedness of humanity and what Giorgio Agamben terms bare life Feldman argues that the politics of alleged compassion

and the politics of those interested in ridding public spaces of the homeless are linked fundamentally in their assumption that homeless people are something less than citizens Feldman's book brings political theories together including theories of sovereign power justice and pluralism with discussions of real world struggles and close analyses of legal cases concerning the rights of the homeless In Feldman's view the bare life predicament is a product not simply of poverty or inequality but of an inability to commit to democratic pluralism Challenging this reduction of the homeless Citizens without Shelter examines opportunities for contesting such a fundamental political exclusion in the service of homeless citizenship and a more robust form of democratic pluralism Feldman has in mind a truly democratic pluralism that would include a pluralization of the category of home to enable multiple forms of dwelling a recognition of the common dwelling activities of homeless and non homeless persons and a resistance to laws that punish or confine the homeless
