## **Constructing Social Theories:**

**Constructing Social Theories** Arthur L. Stinchcombe, 1987-07-15 *Constructing Social Theories* presents to the reader a range of strategies for constructing theories and in a clear rigorous and imaginative manner illustrates how they can be applied Arthur L. Stinchcombe argues that theories should not be invented in the abstract or applied a priori to a problem but should be dictated by the nature of the data to be explained This work was awarded the Sorokin prize by the American Sociological Association as the book that made an outstanding contribution to the progress of sociology in 1970

Constructing Social Theories Arthur L. Stinchcombe, 1968      *Constructing Social Theories* Arthur L. Stinchcombe, 1987

*Constructing Social Theory* David C. Bell, 2009 *Constructing Social Theory* discusses the nature of social theory and theoretical orientations Organized by forty three theoretical orientations in seven domains exchange power adaptation reinforcement social bond altruism functionalism and identity the text includes a tutorial on how to identify an appropriate theoretical orientation and create a theory given a particular research question Bell separates the theoretical orientation of causal logic from theory itself illuminating the mechanisms of scientific revolutions where new theoretical orientations are created and the procedures of normal science in which theories are developed using the logic of existing theoretical orientations      *Constructing Social Research* Charles C. Ragin, Lisa M. Amoroso, 2018-03-30 *Constructing Social Research* answers the question What is social science Updated throughout with new references and examples the Third Edition of this innovative text by Charles C. Ragin and Lisa M. Amoroso shows the unity within the diversity of activities called social research to help students understand how all social researchers construct representations of social life using theories systematic data collection and careful examination of that data      **Constructing Social Research Objects**, 2021-05-03 The third volume on theoretical driven methodology in the social sciences again edited by H. Kon. Leifsrud and Peter Sohlberg explains how to identify sociological research objects and the art of living theory Theoretical concepts such as social structure the Global South social bonds organisations and management are explored and developed by a broad range of authors The methodological chapters including critical notes on sociology and uses of statistics the value of thought experiments in sociology researching subjects in time and space and an academic star war between Pierre Bourdieu and Dorothy E. Smith are indispensable for researchers and students interested in theoretical construction work in the social sciences Contributors are G. R. Ahrne, Michela Betta, Harriet Bjerrum Nielsen, Michael Burawoy, Raju Das, David Fasenfest, Raimund Hasse, John Hjelbrekke, H. Kon. Leifsrud, Emil A. R. yrvik, John Scott, Peter Sohlberg, Karin Widerberg and Richard Swedberg      **Foundations of Theory Construction in The Social Sciences** Dejo A. Abdulrahman, 2025-09-24 The book opens with a discussion of the philosophical foundations of theorising in the social sciences goes on to describe the components of theory and then compares deduction and induction as tools of research and theory construction with particular emphasis on conceptualisation the identification of properties and dimensions constructing theoretical statements

linking properties and dimensions as well as developing and integrating categories in deduction and induction respectively The writer of the book has made a bold attempt to produce an overview of the needful for the production of quality academic research reports beginning with a discussion on theories and theory building methodology and data analysis Attempts are also made to demonstrate the link between theory theorising on one hand and on the other methodology analysis of data and production of quality research reports The book undeniably fills the gap needed at this point helping teachers students of sociology and other social science disciplines in higher institutions of learning to gain mastery of the production of profound social scientific works I heartily commend the book to readers across sub Sahara Africa and beyond Professor Olayiwola Erinoshio PhD Toronto FNASA FSSAN      *The Construction of Social Bonds* Ahrne, Göran, 2021-11-05 This engaging and timely book demonstrates how a deeper understanding of theories about organizations are necessary for the development of a relational sociology and provides an in depth explanation of globalization and social change It also examines how social bonds are constructed through combinations of different forms of communication and investigates the bonds of intimate relationships and partially organized relationships such as street gangs brotherhoods and social movements      **Handbook of Sociological Theory** Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory      *Constructing Social Work Practices* Arja Jokinen, 2018-12-17 First published in 1999 Jokinen Juhila and Poso comprises both theoretical reflexive articles and articles based on empirical social constructionist studies It provokes new ways of looking at social work practices as interpretative and interactive processes In addition to this theoretical and methodological contribution the volume provides empirically based material on the practical implications of an alliance between social work and social constructionism      **Thinking**

**about Social Problems** Donileen R. Loseke, 2011-12-31 The new second edition of this distinctive and widely adopted textbook brings into the classroom an overview of how images of social problems can shape not only public policy and social services but also the ways in which we make sense of ourselves and others It introduces two primary changes First some attention is devoted to the new social movements that emphasize social change through identity transformation rather than through structural change Second the text now also looks more closely at the importance of emotions in constructing public consciousness of social problems When the first edition was published Teaching Sociology noted Loseke does a superb job explaining the relationship between sociology and social problems in a text that is very well researched and engaging yet with tremendous attention to detail and accuracy Would provide a solid base for any social problems class Contemporary Sociology wrote that the book is engagingly well written in a personal unpretentious style and well informed by the author's knowledge of the professional literature

**Mathematical Ideas and Sociological Theory** Thomas J. Fararo, 1984 First Published in 1984 Routledge is an imprint of Taylor Francis an informal company

**Constructing Social Reality** Loretta Brunious, 2017-10-03 This book examines how black children who grow up in an impoverished environment construct their social reality and why this process is a particularly critical factor in their perception and creation of self It argues that black disadvantaged children develop a lifestyle and adopt values based on an identity grounded in racism inequality violence and poverty Constructing Social Reality Self Portraits of poor Black Adolescents makes a valuable contribution to the scholarship by investigating the phenomena of poverty from cognitive linguistic and experiential perspectives in the lives of disadvantaged black adolescents

**Constructing Social Research** Charles C. Ragin, Lisa M. Amoroso, 2018-03-30 The updated Third Edition of this innovative text shows the unity within the diversity of activities called social research to help students understand how all social researchers construct representations of social life using theories systematic data collection and careful examination of that data The book tackles questions like What is social research How does it differ from journalism documentary film making or laboratory research in the natural sciences and What is the researcher's obligation to those he or she is studying Updated throughout with new references and examples this edition is designed to evoke challenging questions regarding the nature of representation and the ethical challenges facing social scientific researchers The text moves beyond standard research challenges to push readers to see the complex relationships among ethics ideas evidence and outcomes

**Constructing Social Problems** Malcolm Spector, 2017-07-05 There is no adequate definition of social problems within sociology and there is not and never has been a sociology of social problems That observation is the point of departure of this book The authors aim to provide such a definition and to prepare the ground for the empirical study of social problems They are aware that their objective will strike many fellow sociologists as ambitious perhaps even arrogant Their work challenges sociologists who have over a period of fifty years written treatises on social problems produced textbooks cataloguing the nature distribution and causes of these problems and taught many sociology

courses It is only natural that the authors work will be viewed as controversial in light of the large literature which has established a sociology of a wide range of social problems the sociology of race relations prostitution poverty crime mental illness and so forth In the 1970s when the authors were preparing for a seminar on the sociology of social problems their review of the literature revealed the absence of any systematic coherent statement of theory or method in the study of social problems For many years the subject was listed and offered by university departments of sociology as a service course to present undergraduates with what they should know about the various social pathologies that exist in their society This conception of social problems for several decades has been reflected in the substance and quality of the literature dominated by textbooks In *Constructing Social Problems* the authors propose that social problems be conceived as the claims making activities of individuals or groups regarding social conditions they consider unjust immoral or harmful and that should be addressed This perspective as the authors have formulated it conceives of social problems as a process of interaction that produces social problems as social facts in society The authors further propose that this process

*Sociological Theory Construction* Jack P. Gibbs, 1972

*Conversation Analysis and Sociological Theory* Melisa Stevanovic, David Inglis, Anssi Peräkylä, Emmi Koskinen, 2024-08-22

The relations between Conversation Analysis CA sociology and social theory are complex often ambiguous and have sometimes been rather fraught While there might be some relatively high level of agreement amongst their practitioners on what CA is what it does and what it is meant to achieve that is not so much the case for the more open and broad terrains of sociology and social theory Moreover each of the domains in question has changed in orientation composition and academic location since CA first came into existence in the late 1960s While initially a child of sociology as CA has matured and extended its substantive and methodological reach it has become a large intellectual domain in its own right with inputs from and relevance for a host of other disciplines notably linguistics anthropology and psychology It is now no longer at all clear how CA relates to sociology and social theory what each side currently does or what it could bring to the other in the future

*(Re)constructing Social Work* Peter James Camilleri, 1996

Providing a thorough examination of the development and purpose of social work this book looks at the discipline asks what social workers do and fundamentally questions their role

*Constructing Social Support Systems for Left-behind and Migrant Children in China* Ling Li, 2021-10-14

The book studies the educational needs of two disadvantaged groups of children in China left behind children in rural areas and migrant children in urban areas aiming to optimize the social support system so that these disadvantaged children can realize their full potential The author conducts two separate researches and introduces the research background methodology related theories and advanced theories Main difficulties of left behind children and migrant children include parents lack of attention to their children's mental health teachers lack of expertise in working with these two groups of children and a lack of collaboration between schools and NGOs It suggests promoting systematic reform helping parents to develop effective parenting skills and establishing positive interactions

among the stakeholders of social support for these disadvantaged children The book will be of interest to people who work with left behind children in rural areas and those who work with migrant students in urban areas including teachers school administrators local educational authorities community based service providers and provincial and central departments of education

*The Legacies of Liberalism* James Mahoney, 2003-04-01 Winner of the Barrington Moore Jr Prize for the Best Book in Comparative and Historical Sociology from the American Sociological Association Winner of the Best Book Award in the Comparative Democratization Section from the American Political Science Association Despite their many similarities Central American countries during the twentieth century were characterized by remarkably different political regimes In a comparative analysis of Guatemala El Salvador Costa Rica Honduras and Nicaragua James Mahoney argues that these political differences were legacies of the nineteenth century liberal reform period Presenting a theory of path dependence Mahoney shows how choices made at crucial turning points in Central American history established certain directions of change and foreclosed others to shape long term development By the middle of the twentieth century three types of political regimes characterized the five nations considered in this study military authoritarian Guatemala El Salvador liberal democratic Costa Rica and traditional dictatorial Honduras Nicaragua As Mahoney shows each type is the end point of choices regarding state and agrarian development made by these countries early in the nineteenth century Applying his conclusions to present day attempts at market creation in a neoliberal era Mahoney warns that overzealous pursuit of market creation can have severely negative long term political consequences The Legacies of Liberalism presents new insight into the role of leadership in political development the place of domestic politics in the analysis of foreign intervention and the role of the state in the creation of early capitalism The book offers a general theoretical framework that will be of broad interest to scholars of comparative politics and political development and its overall argument will stir debate among historians of particular Central American countries
