Philippopoulos-Mihalopoulos, 2015-08-26 This book introduces a radically spatialised approach to knowledge creation and innovation Reflecting on an array of European urban and regional developments it offers an updated notion of milieu as the conceptual and material space of knowledge and innovation in line with the interpretative turn in social sciences and humanities In view of the unwillingness of mainstream economics to accommodate such a trend the authors pursue a broadly understood hermeneutic approach that expands on the triad of knowledge space innovation The book s main findings are that space is an essential intermediary in the connection between knowledge and innovation and that a renewed notion of milieu provides the knowledge space innovation triad with both an analytical basis and operational power It also offers fresh insights into the significance and potential of the knowledge economy A number of empirical European case studies on various scales organisations cities and territories support the findings and suggest new policy directions
