Construction Business Management Nick B. Ganaway, 2007-06-01 Only 43 per cent of U S construction firms remain in business after four years Why Inadequate management according to the U S Small Business Administration This is surprising because most construction firms are formed by ambitious construction project managers executives and tradesmen who have excelled at what they have been doing But as experienced as these entrepreneurs may be they are not likely prepared to take on the full range of responsibilities forced on them in managing the business of construction in its entirety While this business failure rate and its causes are based on U S experience available data from a number of other industrialized countries shows they are similar This book describes in detail what the business side of the construction equation requires of the construction firm owner The contractor who quickly learns these

requirements can identify and avoid or manage around the pitfalls that cause the high failure rate in our industry and put his or her construction firm on a level playing field with the best run companies in the business The detailed duties of the owner whether in the U S U K Australia or Canada are a common theme throughout the book The author Nick Ganaway speaks peer to peer and the book is sprinkled with supporting examples from his own experience He is immersed in the industry and this book is based on the things I ve learned used and refined as a light commercial general contractor in the course of starting and operating my own construction firm for 25 years The contractor doing 5 million or 50 million or more in annual sales or the equivalent amount in other countries or the entrepreneur who is just starting up can use the tried and proven material in this book to build a business that is profitable enjoyable and enduring Additionally the book devotes a chapter to specializing in chain store construction

Business Continuity Management in Construction Leni Sagita Riantini Supriadi,Low Sui Pheng,2017-08-19 This book provides an understanding of Business Continuity Management BCM implementation for local international construction operations with a primary focus on Indonesian construction firms as an illustrative example It reviews the whole spectrum of work relating to organizational culture OC and the institutional framework IF as one of the key ways for companies to evaluate and implement BCM in construction operations Once readers have acquired a sound understanding of BCM OC and IF linkages in construction firms the lessons learned can be extended to other companies This is facilitated through a systematic assessment framework presented in the book using a Knowledge Based Decision Support System BCM KBDSS which allows these companies to evaluate their current status quo with respect to BCM OC and IF and then make informed decisions on how and to what extent BCM should be implemented in their operations As such the book offers a unique blend of theory and practice ensuring readers gain a far better understanding of BCM implementation in the construction industry
