Construction Of Social Reality:

The Construction of Social Reality John Searle, 1996-09-26 In this fascinating provocative account eminent philosopher John Searle shows how our everyday actions and cultural knowledge are of a metaphysical complexity that is truly staggering He explores the character of the structures of our daily work that exist by human agreement and from this the nature of objective reality For example how can it be completely objective fact that coins are money if something is money only because we believe it is money And what is the role of language constituting such facts In examining the difference between what can and what cannot be socially constructed he also shows how biology which offers facts that are independent of human opinion and is often seen in opposition to the social sciences forms the basis of these cultural and constitutional forms

Black Separatism and Social Reality Raymond L. Hall, 2013-10-22 Black Separatism and Social Reality Rhetoric and Reason deals with the contemporary debate over black separatism in America It brings together for the first time many of the perspectives ideas orientations and ideologies that all directly or indirectly address the question of black separatism pro and con from the vantage point of their own realities It raises fundamental issues that have recurred throughout the last century and continue unabated today such as whether black Americans should seek their political destiny apart from white Americans or whether economic growth within the black community can eventually lead to true black power This book is comprised of 31 chapters and begins with a historical overview and social reality of black separatism in America how and why black separatist movements emerge and why separatism appeals to some individuals and not to others The next section explores the similarities of white racist assumptions and black separatism as well as the arguments for and against separatism The prospects of black separatism are analyzed along with Pan Africanism and black studies A comprehensive review of the history of separatist thought and a bibliography concerning the relation of Afro Americans with Africa are presented The possibility of a violent confrontation between whites and blacks is also considered Finally the book ponders the question of whether there is a need for a distinct black social science This monograph will appeal to sociologists social scientists political scientists politicians blacks and scholars of black studies

Social Reality Finn Collin, 1997 The nature of social reality is a key problem in the philosophy of social science This book outlines the major issues historical and contemporary raised by social reality and social facts What after all are we talking about when we talk about social reality and the facts of social life Social constructivism has become a very influential position and Finn Collin reviews a number of traditional doctrines in philosophy and social science which support the constructivist position whilst also exposing the excesses of that particular view

John Searle and the Construction of Social Reality Joshua Rust, 2005-12-15 In 1995 John Searle published *The Construction of Social Reality* a text which not only promises to disclose the institutional backdrop against which speech takes place but initiate a new philosophy of society Since then *The Construction of Social Reality* has been subject to a flurry of criticism While many of Searle's interlocutors share the sense that the text marks an important

breakthrough he has time and again accused critics of misunderstanding his claims Despite Searle s characteristic crispness and clarity there remains some confusion among both philosophers and sociologists regarding the significance of his proposals This book traces some of the high points of this dialogue leveraging Searle s own clarifications to propose a new way of understanding the text In particular Joshua Rust looks to Max Weber in suggesting that Searle has articulated an ideal type In locating The Construction of Social Reality under the umbrella of one of sociology s founding fathers this book not only makes Searle s text more accessible to the readers in the social sciences but presents Max Weber as a thinker worthy of philosophical reconsideration Moreover the recharacterization of Searle s claims in terms of the ideal type helps facilitate a comparison between Searle and other social theorists such as Talcott Parsons Alfred Schutz, Phenomenology, and the Renewal of Interpretive Social Science Besnik Pula,2024-04-16 In recent decades the historical social sciences have moved away from deterministic perspectives and increasingly embraced the interpretive analysis of historical process and social and political change This shift has enriched the field but also led to a deadlock regarding the meaning and status of subjective knowledge Cultural interpretivists struggle to incorporate subjective experience and the body into their understanding of social reality In the early twentieth century philosopher Alfred Schutz grappled with this very issue Drawing on Edmund Husserl s phenomenology and Max Weber s historical sociology Schutz pioneered the interpretive analysis of social life from an embodied perspective However the recent interpretivist turn influenced by linguistic philosophies discourse theory and poststructuralism has overlooked the insights of Schutz and other phenomenologists This book revisits Schutz s phenomenology and social theory positioning them against contemporary problems in social theory and interpretive social science research The book extends Schutz s key concepts of relevance symbol relations theory of language and lifeworld meaning structures It outlines Schutz s critical approach to the social distribution of knowledge and develops his nascent sociology and political economy of knowledge This book will appeal to readers with interests in social theory phenomenology and the methods of interpretive social science including historical sociology cultural sociology science and technology studies political economy and international relations **International Law as Social Construct** Carlo Focarelli,2012-05-24 This book explores international law as a social construct by analysing its social foundations and by re conceptualizing the way in which it is commonly understood It asks what law is and how it works in society and shows why it is worth to struggle for new and better working rules in the international legal order **The Nature of Social Reality** Emanuele Fadda,Alfredo Givigliano,Claudia Stancati,2014-10-17 Searle s theory of social reality is increasingly meeting with worldwide recognition and is undoubtedly the most prominent theory of social ontology at least in the post analytical tradition even if actual research in this domain is engaged in critical confrontation with it Searle s approach continues to shape the debate but his construction is more and more sharply dissected both in its details and in its general assumptions Furthermore new perspectives not rooted in the analytical The Logic of Social Practices II Raffaella Giovagnoli,Robert Lowe,2023-12-27

This book reports on cutting edge research concerning social practices Merging perspectives from various disciplines including philosophy biology psychology and cognitive science and economy it discusses theoretical aspects of social behavior along with models to investigate them and presenting key case studies as well Further it describes concepts related to habits routines and rituals and examines important features of human action such as intentionality and choice exploring the influence of specific social practices in different situations Based on a workshop held on April 2022 at the World Congress on Universal Logic UNILOG 22 in Crete and including additional invited chapters the book offers fresh insights into the fields of social practice and the cognitive computational and philosophical tools to understand them **The Social**

Construction of Reality Peter L. Berger, Thomas Luckmann, 2011-04-26 A watershed event in the field of sociology this text introduced a major breakthrough in the sociology of knowledge and sociological theory generally George Simpson American Sociological Review In this seminal book Peter L Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society Unlike earlier theorists and philosophers Berger and Luckmann go beyond intellectual history and focus on commonsense everyday knowledge the proverbs morals values and beliefs shared among ordinary people When first published in 1966 this systematic theoretical treatise introduced the term social construction effectively creating a new thought and transforming Western philosophy **Contemporary Social and Sociological Theory** Kenneth

Allan, 2006 An upper division undergraduate social theory textbook that introduces the student to the multitude of different theorists This book helps students grasp theories and their relevance and application to modern life **Fiction and Social Reality** Mariano Longo, 2016-03-09 In spite of their differing rhetorics and cognitive strategies sociology and literature are often concerned with the same objects social relationships action motivation social constraints and relationships for example As such sociologists have always been fascinated with fictional literature This book reinvigorates the debate surrounding the utility of fiction as a sociological resource examining the distinction between the two forms of writing and exploring the views of early sociologists on the suitability of subjecting literary sources to sociological analysis Engaging with contemporary debates in this field the author explores the potential sociological use of literary fiction considering the role of literature as the exemplification of sociological concepts a non technical confirmation of theoretical insights and a form of empirical material used to confirm a set of theoretically oriented assumptions A fascinating exploration of the means by which the sociological eye can be sharpened by engagement with literary sources Fiction and Social Reality offers a set of methodological principles according to which literature can be examined sociologically As such it will appeal to scholars of sociology and literary studies with interests in research methods and interdisciplinary approaches to scholarly research

Constructionism in Vocational Psychology and Career Development Peter McIlveen, Donna Schultheiss, 2012-12-23

The contemporary world of work makes demands upon the field of career development and vocational psychology to ensure that theories and practices retain their relevance amidst the complexity of work and learning in people's lives Social Constructionism is the emerging paradigm that can reformulate theories and practices of career development that have come before Social Constructionism opens new perspectives and raises questions about phenomena that have captured the imagination of scholars and practitioners for a century In this fourth book in the Sense Career Development Series a host of international authors open the window of Social Constructionism to reveal the challenges that lay ahead in the next generation of research and practice This little book is ideal for the graduate scholar researcher and seriously curious practitioner who seek to understand Social Constructionism the questions it raises and how those questions may be answered Readers will be challenged to think hard review their assumptions and see the world of work and learning anew The rewards are worth the effort

Sociology Anthony Giddens, Simon Griffiths, 2006

This fully revised and updated version of Anthony Giddens's Sociology now in its fifth edition offers an unrivalled introduction for students new to the subject lucid lively authoritative and original Written by one of the world's leading sociologists this comprehensive textbook manages to be clear accessible and jargon free but without oversimplifying complex debates Earlier editions of Sociology broke new ground by incorporating cutting edge debates such as the impact of globalisation into an introductory text This fifth edition remains a state of the art textbook with fresh and engaging new material added throughout While covering all of the core topics of sociology the fifth edition also includes a great deal of substantive new material ensuring that students are introduced to the most recent sociological debates Throughout the book weaves together classical and contemporary theory and data and provides a wide range of everyday examples to which students can easily relate The fifth edition also benefits from New

SCIENCE SKEPTICISM Simona-Nicoleta VULPE, 2025-01-01 Mistrust towards mainstream science and evidence based expertise or science skepticism is embedded in postmodernity Vaccine hesitancy and climate change skepticism are both forms of rejecting expertise and searching for alternative bodies of knowledge In this sociological research I studied the social construction of skeptical discourses on vaccination and climate change One of the key findings of this research is that vaccine hesitancy and climate change skepticism as skeptical discourses do not support the postmodern claim for a plurality of knowledge Skeptics of vaccination and climate change do not contest the epistemic advantages of science but they strongly reject mainstream science and official authorities Instead they support experts who are marginal within the scientific community and promote their contrarian claims as factually true Discourses on vaccination and climate change that are skeptical of mainstream science are socially constructed using three types of resources selective trust temporal agency and religious agency This is a key similarity that contributes to expanding the knowledge on the social construction of skepticism and the specific strategies used to reject mainstream science Another similarity is that skeptics of both vaccination and climate change structure their discourse around themes that are anchored in systemic problems causing risks and vulnerabilities for society at large and for particular social categories Numerous problems and vulnerabilities emerged during the COVID 19 pandemic as regards public health measures and economic disruptions thus consolidating the vaccine hesitant discourse and skepticism of a just green transition In terms of dissimilarities the climate skeptical discourse is underdeveloped in Romania in comparison with the vaccine hesitant discourse This is related to the neglect manifested by Romanian public authorities and media representatives on this topic contrasting with policy proposals and public debates on vaccination My research contributes to overcoming the knowledge deficit model by showing that skepticism of mainstream science is not an individual problem caused by deficient cognitive processes but is a socially constructed phenomenon that gains legitimacy because of societal problems and systemic dysfunctions
