I have noticed you are frequently arriving late to work. Let's discuss how we can help with your commute to ensure you meet our punctuality policy.

Why are you always late? This is unacceptable behavior. If the commute takes too long, leave earlier!

I noticed a lack of communication within the team. Let's have a meeting this afternoon to update progress and discuss team-building strategies for better synchronization.

Why is no one talking to each other? We're double-working and no one is producing anything of value! Start talking to each other or everyone's fired!

Experience as Philosophy James Campbell,Richard E. Hart,2006 The philosopher John J McDermott comes out of the long American tradition that takes the aim of philosophical inquiry to be interpretation of the open meanings of experience so that we might all live fuller and richer lives Here the authors of these nine essays explore his highly original interpretations of philosophy s various questions about our shared existence How are we to understand the nature of American culture and to carry forward its important contributions What is the personal importance of embodiment of living in the realization of death How does our physical and personal environment nourish bodies and spirits What does the deliberate pursuit of a morality offer us How can we carry forward the fundamental tasks of education to enable those who follow us to use our shared past to address their civic and spiritual problems What are the possibilities for community Together these essays offer a clear multi layered understanding of the compelling vision that McDermott has presented over the years In an Afterword McDermott responds to the authors queries and concerns offering a restatement of his understanding of the American philosopher s task These essays indicate and McDermott s response confirms that for him philosophy is not a purely cerebral activity Philosophy is rather an intellectual means of exploring the fullness of human experience and it functions best when it operates in the context of the broad sweep of the humanities Similarly for McDermott the self is no given substantial entity On the contrary it is relational rooted geographically and socially in its place and its fellows and damaged when these life giving processes fail Further McDermott does not accept any ultimate canopy of meaning The human journey is a personal project within which provisional meanings must be created to sustain our advance
