Descriptive Psychology and Historical Understanding W. Dilthey, 2012-12-06 Perhaps no philosopher has so fully explored the nature and conditions of historical understanding as Wilhelm Dilthey His work conceived overall as a Critique of Historical Reason and developed through his well known theory of the human studies provides concepts and methods still fruitful for those concerned with analyzing the human condition Despite the increasing recognition of Dilthey's contributions relatively few of his writings have as yet appeared in English translation It is therefore both timely and useful to have available here two works drawn from different phases in the development of his philosophy The Ideas Concerning a Descriptive and Analytic Psychology 1894 now translated into English for the first time sets forth Dilthey's programmatic and methodological viewpoints through a descriptive psychology while The Understanding of Other Persons and Their Expressions of Life ca 1910 is representative of his later hermeneutic approach to historical understanding DESCRIPTIVE PSYCHOLOGY AND THE HUMAN STUDIES Dilthey presented the first mature statement of his theory of the human studies in volume one of his *Einleitung in die Geisteswissenschaften* Introduction to the Human Studies published in 1883 He argued there that for the proper study of man and history we must eschew the metaphysical speculation of the absolute idealists while at the same time avoiding the scientific reduction of positivism **Handbook of Child Psychology, Theoretical**

Foundations of Chinese Psychology

Kwang-Kuo Hwang, 2011-12-04 Mainstream psychology emanated from European American and Judeo Christian philosophical and scientific traditions The application of this viewpoint which embeds colonial and imperialist concepts is less relevant to Asian and other indigenous cultures Although it has been accepted by non Western scholars in an attempt to emulate Western scientific practice the mainstream viewpoint is in a process of transformation to accommodate geographically relevant perspectives In this light Foundations of Chinese Psychology bridges the gap between western and eastern traditions and elaborates on theories based on local phenomena findings and experiences by research methods that are contextually appropriate Using a guiding principle of cultural psychology one mind many mentalities this book advocates the balancing of a global psychology concept without sacrificing that of a specific locality and people It analyzes the basics of Confucianism and compares them to Western ethical thinking arriving at a series of theories concerning social exchange face achievement motivation organizational behaviors and conflict resolution Beyond the specifics of a particular culture this book exemplifies the act of constructing autonomous social science that may be emulated in other non Western settings It also serves as an excellent guide for cross cultural research as well as a caveat on the limitations of presumptive individualism and exclusionary perspectives
