## **Constructive Thinking The Key To Emotional Intelligence:**

*Constructive Thinking* Seymour Epstein, 1998-08-27 This is a book on how to gain control of one's emotions. It is a serious book that contains a theory of automatic processing, its presentation, and its implications for controlling emotions. Epstein is a professor of personality psychology and a highly regarded research psychologist who has supported his theory with extensive research published in the most demanding professional journals. He was motivated to write the book by the success of a course he taught based on his theory. Students reported obtaining an understanding and control of their emotions that they never thought possible and that they said changed the course of their lives. According to the theory, people operate by two minds: a rational analytical mind and an intuitive experiential mind, the latter being intimately associated with emotions. Each mind operates by its own principles and each has its own form of intelligence. The intelligence of the rational analytical mind is measured by IQ tests, and the intelligence of the intuitive experiential mind, which is related to emotional intelligence, is measured by the Constructive Thinking Inventory (CTI), a test developed by Epstein that is included in the book. By understanding the principles of operation of the intuitive experiential mind, it is possible to train it as well as to learn from it and thereby to improve one's emotional intelligence. The book provides exercises for applying the principles in everyday life and a review of a variety of other procedures for improving emotional intelligence. It is suited for use as a primary or supplementary text in courses on improving emotional intelligence or coping with stress, as well as for individual reading. **Constructive**

**Thinking** Seymour Epstein, 1998-08-27 Most people believe their emotions are automatic reactions to events. Events happen and trigger emotions, and that is all there is to it. Few realize that their emotions are determined by what they think, by how they interpret events, and not by the events themselves. Epstein provides techniques for gaining control of emotions and putting them to positive use while also developing the theoretical insights behind such control. **Cognitive-Experiential**

**Theory** Seymour Epstein, 2014 In this book, Epstein presents a new theory of personality referred to as cognitive experiential theory (CET) that is integrative of all other major personality theories. Handbook of Emotions, Third Edition Michael

Lewis, Jeannette M. Haviland-Jones, Lisa Feldman Barrett, 2008-04-17 Widely regarded as the standard reference in the field, this handbook comprehensively examines all aspects of emotion and its role in human behavior. The editors and contributors are foremost authorities who describe major theories, findings, methods, and applications. The volume addresses the interface of emotional processes with biology, child development, social behavior, personality, cognition, and physical and mental health. Also presented are state-of-the-science perspectives on fear, anger, shame, disgust, positive emotions, sadness, and other distinct emotions. Illustrations include seven color plates.
