Constructivist Instruction Sigmund Tobias, Thomas M. Duffy, 2009-05-28 Constructivist Instruction Success or Failure brings together leading thinkers from both sides of the hotly debated controversy about constructivist approaches to instruction Although constructivist theories and practice now dominate the fields of the learning sciences instructional technology curriculum and teaching and educational psychology they have also been the subject of sharp criticism regarding sparse research support and adverse research findings This volume presents the evidence for and against constructivism the challenges from information processing theorists and commentaries from leading researchers in areas such as text comprehension technology as well as math and science education who discuss the constructivist framework from their perspectives Chapters present detailed views from both sides of the controversy A distinctive feature of the book is the dialogue built into it between the different positions Each chapter concludes with discussions in which two authors with opposing views raise questions about the chapter followed by the author's responses to

those questions for some chapters there are several cycles of questions and answers These discussions and concluding chapters by the editors clarify and occasionally narrow the differences between positions and identify needed research

Critical Probes into the Instructional Design Literature George Demetrian, 2024-04-25 This book provides a comprehensive study of the work of M David Merrill a major pioneer in the field of instructional design This book centers on his research on his second generation instructional design ID2 theory Instructional Transaction Theory and First Principles of Instruction

which has had a substantial impact on the instructional design field It s appealing to the instructional design research and practitioner based communities who can draw on specific sections of this book to enhance their own work It is also intended for those seeking to learn more about the relationship between the instructional design field learning theory curriculum studies and lifelong learning adult education studies Through this critical yet empathetic study of Merrill s 50 year research agenda this book provides an illuminating field of entry into a broad range of topics both those that are central to Merrill s own research agenda and into areas that extend well beyond his essentially cognitivist epistemological assumptions

Thinking Styles Jieqiong Fan,2020-08-27 Thinking styles defined as one s preferred way of using abilities have been considered as an important factor in explaining human performance However is it worthwhile to pay attention to thinking styles in addition to traditional constructs in individual differences such as personality Are there good styles or bad styles Can thinking style be cultivated Which thinking styles should we aim to cultivate And how to cultivate these styles This book answers these questions and more by addressing three major controversial issues in the field of styles namely whether thinking styles are distinct from or are part of personality traits whether or not thinking styles can be changed and whether or not thinking styles are value laden Based on a comprehensive review of previous literature and the analyses of results from a mixed method longitudinal study the book provides solid and intriguing research evidence to the discussion of the above issues Both academics and graduate students who wish to do research in the field of styles will find the book useful for its insights into the nature of thinking styles

Research Anthology on Developing Critical Thinking Skills in Students Management Association, Information Resources,2020-10-02 Learning strategies for critical thinking are a vital part of today s curriculum as students have few additional opportunities to learn these skills outside of school environments Therefore it is essential that educators be given practical strategies for improving their critical thinking skills as well as methods to effectively provide critical thinking skills to their students The Research Anthology on Developing Critical Thinking Skills in Students is a vital reference source that helps to shift and advance the debate on how critical thinking should be taught and offers insights into the significance of critical thinking and its effective integration as a cornerstone of the educational system Highlighting a range of topics such as discourse analysis skill assessment and measurement and critical analysis techniques this multi volume book is ideally designed for teachers instructors instructional designers curriculum developers education professionals administrators policymakers researchers and academicians

Theoretical Foundations of Learning Environments David Jonassen,David H. Jonassen,Susan Land,2014-04-08 Theoretical Foundations of Learning Environments describes the most contemporary psychological and pedagogical theories that are foundations for the conception and design

of open ended learning environments and new applications of educational technologies In the past decade the cognitive revolution of the 60s and 70s has been replaced or restructured by constructivism and its associated theories including situated sociocultural ecological everyday and distributed conceptions of cognition These theories represent a paradigm shift for educators and instructional designers to a view of learning as necessarily more social conversational and constructive than traditional transmissive views of learning Never in the history of education have so many different theories said the same things about the nature of learning and the means for supporting it At the same time although there is a remarkable amount of consonance among these theories each also provides a distinct perspective on how learning and sense making occur This book provides students faculty and instructional designers with a clear concise introduction to these theories and their implications for the design of new learning environments for schools universities and corporations It is well suited as a required or supplementary text for courses in instructional design and theory educational psychology learning theory curriculum theory and design and related areas

Overcoming Barriers to Student Understanding Jan Meyer, Ray Land, 2006-09-27 It has long been a matter of concern to teachers in higher education why certain students get stuck at particular points in the curriculum whilst others grasp concepts with comparative ease What accounts for this variation in student performance and more importantly how can teachers change their teaching and courses to help students overcome such barriers This book examines the difficulties of student learning and offers advice on how to overcome them through course design assessment practice and teaching methods It also provides innovative case material from a wide range of institutions and disciplines including the social sciences the humanities the sciences and economics

Designing Environments for Constructive Learning Thomas M. Duffy, Joost Lowyck, David H. Jonassen, 2012-12-06 The idea for this book grew out of a NATO Advanced Research Workshop held at the Catholic University at Leuven Belgium We are grateful to NATO for support in conducting this workshop and for support in the preparation of this book We are particularly grateful for their emphasis on designing the workshop to build collegiality They suggested that we hold the meeting in a small town and that we organize evening activities to keep the group together and to promote informal and extended discussions What sage advice The excitement grew over the three days as we shared understandings and enriched our perspectives Indeed there was even a proclaimed near conversion to a constructivist perspective from one colleague trained in traditional instructional design methods While we report this as a bit of a humorous anecdote it most clearly reflects the sense of excitement that developed We would also like to thank the staff at the Catholic University for their great support during the workshop Their efforts and their good cheer were important components in the success of the meeting In particular we would like to thank Jan Elen Catherine Vermunicht and Jef Vanden Branden Finally we would like to thank the personnel at Indiana University for their help in assembling this book Deborah Shaw prepared the index We thank her for the skill and speed with which she was able to work
