Consultation On Fish Genetic Resources:

Consultation on Fish Genetic Resources Roger S. V. Pullin, Christine Marie V. Casal, 1996 Towards Policies for Conservation and Sustainable Use of Aquatic Genetic Resources Roger S. V. Pullin, Devin M. Bartley, J. Kooiman, 1999

Report of the Expert Consultation on Utilization and Conservation of Aquatic Genetic Resources, 1993-01-01

This report discusses the need and methodologies for the utilization and conservation of genetic resources of aquatic animals. More than a review of genetic principles and technologies, the report addresses the application of such principles and technologies in development and conservation projects and research. Specific recommendations are made with regard to the genetic resources contained in natural populations, fisheries stocks, and aquaculture. Recommendations concerning regulatory policy and legal aspects of aquatic genetic resources are also presented. *Use of Genetically Improved and Alien Species for Aquaculture and Conservation of Aquatic Biodiversity in Africa* Modadugu V. Gupta, Devin M. Bartley, Belen O. Acosta, 2004 *Доклад ФАО По Рыболовству*, 1994 *Blue Genes* Brian Harvey, 2013-06-17

The advance of genetic sciences has led to a blue revolution in the way we use aquatic biodiversity. By 2020, the world will be eating almost as much farmed as wild fish. Marine bacteria could yield the cure for cancer, and deep sea bacteria may be exploited to gobble up oil spills. Science is moving ahead at a staggering speed, and the demand for genetic resources is growing rapidly, yet governance and policy lag far behind. This groundbreaking work is the first to look at the ownership, governance, and trade in aquatic genetic resources. *Blue Genes* describes the growing demand for aquatic genetic resources and the desperate need to fill the policy vacuum about the management and conservation of aquatic biodiversity, which would help create a foundation for rules dictating access to and use of aquatic genetic resources. Special attention is paid to indigenous and local people having the right to access these resources and their role in managing and conserving aquatic biodiversity. The book concludes with policy recommendations specifically tailored to aquatic resources, with the use of six case studies from four continents to illustrate key issues. *Proceedings of the U.S. Strategy Conference on Biological Diversity, November 16-18, 1981*, 1982
