Personal Data in Competition, Consumer Protection and Intellectual Property Law Mor Bakhom, Beatriz Conde Gallego, Mark-Oliver Mackenrodt, Gintarė Surblytė-Namavičienė, 2018-11-02 This book analyses the legal approach to personal data taken by different fields of law An increasing number of business models in the digital economy rely on personal data as a key input In exchange for sharing

their data online users benefit from personalized and innovative services But companies collection and use of personal data raise questions about privacy and fundamental rights Moreover given the substantial commercial and strategic value of personal data their accumulation control and use may raise competition concerns and negatively affect consumers To establish a legal framework that ensures an adequate level of protection of personal data while at the same time providing an open and level playing field for businesses to develop innovative data based services is a challenging task With this objective in mind and against the background of the uniform rules set by the EU General Data Protection Regulation the contributions to this book examine the significance and legal treatment of personal data in competition law consumer protection law general civil law and intellectual property law Instead of providing an isolated analysis of the different areas of law the book focuses on both synergies and tensions between the different legal fields exploring potential ways to develop an integrated legal approach to personal data

Competition Law and Consumer Protection Katalin Judit Cseres, 2005-01-01 The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged The theory seems uncontroversial However because a positive interaction between the two is presumed to be self evident the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis with no overarching legal authority There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist Dr Cseres in depth analysis provides that understanding Proceeding from the dual perspective of law and economics that is of justice fairness and reasonableness on the one hand and of efficiency of the other she fully considers such underlying issues as the following the role of competition law and consumer law in a free market economy the notion of consumer welfare the effect of the modernisation of EC competition law for consumers economics theories of information bounded rationality and transaction costs the special significance of vertical agreements and merger control and how consumers are affected by information asymmetries The ultimate focus of the book is on current and emerging EC law in which a rapprochement between the two areas seems to be under way Dr Cseres provides a knowledgeable guide to the various strands of theory policy and jurisprudence that she shows ought to be taken into account in the process including schools of thought and law and policy experience in both Europe and the United States A special chapter on Hungary where post 1989 law and practice reveal a fresh and distinctly forward looking understanding of the matter is one of the book s most extraordinary features Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily It will be of immeasurable value to a wide range of professionals from academics and researchers to officials policymakers and practitioners in competition law consumer protection advocacy economic theory and planning business administration and various pertinent government authorities

Consumer Protection in the Age of the 'information Economy' Jane K. Winn, 2006 This volume considers the impact of technological innovation on the foundations of consumer advocacy contracting behaviour control over intellectual capital and information privacy A unique

Ingeborg Schwenzer, Pascal Hachem, Christopher Kee, 2012-01-26 Although the 1980 United Nations Convention on Contracts for the International Sale of Goods CISG is one of the most successful international conventions to date it remains the case

that those involved in the international sale of goods must refer to a multitude of laws Indeed the CISG itself does not cover all issues relating to international sales contracts so it must necessarily be supplemented by domestic law Global Sales and Contract Law provides a truly comparative analysis of domestic laws in over sixty countries so as to deliver a global view of domestic and international sales law The book reports on the real practice of sales law taking into account present day problems Complex questions on the obligations under a sales contract the ways in which these are established as well as the remedies following the breach of obligations are all discussed By addressing regional uniform projects like OHADA and comparing differences in domestic legal approach where the CISG would not apply the work goes beyond existing commentaries which tend to focus only on the CISG The analysis has been based on an unprecedented survey drawn from the world s top fifty companies as well as international traders lawyers advising international traders arbitral institutions arbitrators and law schools This work encompasses all aspects of a sale of goods transaction and takes a wide view of sale by including general contract law The book gives practitioners invaluable insight into judicial trends and possible solutions in different legal systems whether preparing for litigation or drafting an international contract Global Sales and Contract Law is the most comprehensive and thorough compilation of legal analysis in the field of the sale of goods and is a reliable source for any practitioner dealing in international commerce International Consumer Protection Dennis Campbell,2013-11-11
