Consumer Protection Law Geraint Howells,Stephen Weatherill,2017-09-08 This fully revised and updated second edition of Consumer Protection Law introduces the reader to the substantive law of consumer protection in the United Kingdom the emphasis being on the place of United Kingdom law within an evolving European legal system and also on the need to draw upon comparative experience The book not only seeks to place consumer protection in its purely black letter context but also draws upon wider readings to show that consumer protection law is a complex area of law which reflects and

shapes the individual citizen's position within the modern economy **The Modern Consumer Movement** Stephen Brobeck, 1990 An annotated guide that describes nearly a 1000 sources on the consumer movement **Communication and Social Order** Niklas Luhmann, 1993 A great deal of attention has been devoted to risk research Sociologists in general have limited themselves to varying recognitions of a society at risk and have traced out the paths to disaster The detailed research has yet to be undertaken In Risk now available in paperback Niklas Luhmann develops a theoretical program for such research His premise is that the concept of risk projects essential aspects of our description of the future onto the present Risk is conceived as the possibility of triggering unexpected unlikely and detrimental consequences by means of a decision attributable to a decision maker **New Perspectives on Industrial Organization** Victor J. Tremblay, Carol Horton Tremblay, 2012-07-20 This book covers the main topics that students need to learn in a course on Industrial Organization It reviews the classic models and important empirical evidence related to the field However it will differ from prior textbooks in two ways First this book incorporates contributions from behavioral economics and neuroeconomics providing the reader with a richer understanding of consumer preferences and the motivation for many of the business practices we see today The book discusses how firms exploit consumers who are prone to making mistakes and who suffer from cognitive dissonance attention lapses and bounded rationality for example and will help explain why firms invest in persuasive advertising offer 30 day free trials offer money back guarantees and engage in other observed phenomena that cannot be explained by the traditional approaches to industrial organization A second difference is that this book achieves a balance between textbooks that emphasize formal modeling and those that emphasize the history of the field empirical evidence case studies and policy analysis This text puts more emphasis on the micro foundations i.e. consumer and producer theory classic game theoretic models and recent contributions from behavioral economics that are pertinent to industrial organization Each topic will begin with a discussion of relevant theory and models and will also include a discussion of concrete examples empirical evidence and evidence from case studies This will provide students with a deeper understanding of firm and consumer behavior of the factors that influence market structure and economic performance and of policy issues involving imperfectly competitive markets The book is intended to be a textbook for graduate students MBAs and upper level undergraduates and will use examples graphical analysis algebra and simple calculus to explain important ideas and theories in industrial organization Encyclopedia of White-Collar and Corporate Crime Lawrence M. Salinger, 2013-06-14 Since the first edition of the Encyclopedia of White Collar and Corporate Crime was produced in 2004 the number and severity of these crimes have risen to the level of calamity so much so that many experts attribute the near Depression of 2008 to white collar malfeasance namely crimes of greed and excess by bankers and financial institutions Whether the perpetrators were prosecuted or not white collar and corporate crime came near to collapsing the U.S. economy In the 7 years since the first edition was produced we have also seen the largest Ponzi scheme in history Maddoff an ecological disaster caused by British

Petroleum and its subcontractors Gulf Oil Spill and U S Defense Department contractors operating like vigilantes in Iraq Blackwater White collar criminals have been busy and the Second Edition of this encyclopedia captures what has been going on in the news and behind the scenes with new articles and updates to past articles *Legal Bibliography Index* ,1988

Landmark Legislation Stephen W. Stathis,2003-04-01 Documents Congress s most momentous accomplishments in determining the national policies to be carried out by the executive branch in approving appropriations to support those policies and in fulfilling its responsibility to ensure that such actions are being implemented as intended **Regulation**

Anthony I Ogus,2004-10-15 This is a reprint of Anthony Ogus classic study of regulation first published in the 1990s It examines how since the last decades of the twentieth century there have been fundamental changes in the relationship between the state and industry With the aid of economic theory Anthony Ogus critically examines the ways in which public law has been adapted to the task of regulating industrial activity and provides a systematic overview of the theory and forms of social and economic regulation In particular he explores the reasons why governments regulate for which broadly speaking two theoretical frameworks exist First public interest theories determine that regulation should aim to improve social and economic welfare Second economic theories suggest that regulation should aim to satisfy the demands of private interests The book also looks at the evolution of the forms of regulation in Britain extending to the policies of privatization and deregulation which were so characteristic of the period The author skilfully evaluates the advantages and disadvantages of the different forms of regulation particularly in the light of the two theoretical frameworks but also by involving an analysis of how firms respond to the various kinds of incentives and controls offered by government A significant feature of the book is its analysis of the choices made by governments between the different forms of regulation and the influence exerted by interest groups including bureaucrats and EC law **Environmental Policy in Search of New Instruments** B.

Dente,2013-03-09 Environmental policy is undergoing a dramatic transformation The problems connected with global change the need for preventative action and the growing importance of non source pollution call for new courses of action and new institutional arrangements In this situation it is fairly obvious that both the traditional command and control policy instruments and the more modern financial and economic instruments are increasingly under stress This volume deliberately aims to break new ground in providing the conceptual tools necessary for the next generation of environmental policies In doing so it covers a wide interdisciplinary range from public policy analysis to international law and draws upon much international experience well reflected by the mixed composition of the contributors On the basis of a shared theoretical framework the book explores the potential of new policy instruments such as policy evaluation or mediation proposes alternative institutional arrangements for dealing with the issues classifies existing instruments and illuminates the process through which old and new tools can be set into operation **The Best Books for Academic Libraries: Political science, law, education** ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress
